Road to Net Zero Oliver Zipse, Joachim Hornegger, Thomas Becker, Markus Beckmann, Michael Bengsch, Irene Feige, Markus Schober, 2023-11-17 With this open access book delve into the insights of respected leaders from academia and industry as they unravel the intricacies of sustainability driven business transformation This meticulously curated edited volume reflects on The Road To Net Zero underscoring the need for pioneering pathways Embark on a collaborative learning journey and explore key issues along the road to transformation such as crafting corporate sustainability strategies new forms of corporate disclosure transforming value chains and harnessing the power of technological innovation Packed with guiding questions and distilled findings from research this book is a must read for all decision makers strategists engaged citizens educators and learners committed to driving change and shaping a more sustainable future [A Look at Zambia's Road Financing Strategies: The Impact of Incongruent Policies and Budgets](#) Yohane Tembo, 2015-01-01 There are various reasons why the road asset in Zambia has been deteriorating over the past five decades since independence Much effort to restore the road asset to its original value and keep it maintained in a good and safe condition was initiated in mid 1990s with the launch of the Road Sector Investment Plan Phase I which was immediately followed by the launch of a Phase II to run from 2003 to 2013 It is my appreciation that many diagnostic studies into road financing strategies which could have led to inefficient road asset management in Zambia have been undertaken and various solutions tendered The author takes cognizance that resource mobilization for road construction and maintenance and subsequent allocation to respective road programs can often be problematic for an emerging country like Zambia It has the potential to lead to inefficiencies in road asset management as has evidently been demonstrated in the declining road asset value over time The political as well as the economic landscape plays a vital role in resource mobilization and allocation strategies as much as the institutional and the legal framework do The failure to clear the backlog of maintenance which normally results largely from deferment of scheduled maintenance due to insufficient annual budgetary allocation to the road sector maintenance programs has led to the significant deterioration in road network condition Exorbitant road construction costs have posed additional challenges to the fiscus thereby constraining both the quantity and quality of road infrastructure that could be constructed and maintained at any given time Recent policy drives have been categorical in their preference of new road construction aimed at linking Zambia over road maintenance which plays a pivotal role in road asset management This creates a perception that policy pronouncements are at variance to policy documents which promote sustainable economic development through efficient road investments and could be seen as being paradoxical in that the actual financing strategies are skewed towards road construction a recipe of comfort for the next election challenge due to increased visibility on the ground rather than to maintenance as an astute and effective way of managing the road asset The difficult of establishing congruence between government pronouncements and actual road business strategies in the implementing agencies has over the **Federal**

Register ,2013-08 **Secure Data Management in Decentralized Systems** Ting Yu,Sushil Jajodia,2007-05-11 The field of database security has expanded greatly with the rapid development of global inter networked infrastructure Databases are no longer stand alone systems accessible only to internal users of organizations Today businesses must allow selective access from different security domains New data services emerge every day bringing complex challenges to those whose job is to protect data security The Internet and the web offer means for collecting and sharing data with unprecedented flexibility and convenience presenting threats and challenges of their own This book identifies and addresses these new challenges and more offering solid advice for practitioners and researchers in industry **Macroprudential Regulatory Policies: The New Road To Financial Stability?** Douglas D Evanoff,George G Kaufman,Stijn Claessens,Laura E Kodres,2011-11-02 This book is a collection of papers presented in the conference held at the Federal Reserve Bank of Chicago in September 2010 that examines the role of macroprudential regulation in the financial industry Shocked by the experience of the last few years many argue that the more traditional microprudential regulatory tools are inadequate to create a safe and stable financial system The microprudential paradigm relies on the presumption that the financial system as a whole can be made safe by ensuring individual financial institutions are made safe This ignores interconnections and externalities whereby the actions of one financial institution or events in financial markets can lead to spillover effects that adversely affect general market conditions other financial institutions and ultimately the economy as a whole Instead it is argued there is a need for both microprudential approaches to regulate individual institutions and macroprudential approaches to manage the overall financial system risks Conference participants discussed macroprudential regulation and related issues including What are the theoretical motivations for macroprudential regulation How would it interact with other regulatory and macroeconomic policies especially monetary policy What would be the specific macroprudential tools Who should have control over the macroprudential tools How should a macroprudential regulator be structured Where should it be housed How can macroprudential policies be structured across national borders What role if any can market discipline play in supporting macroprudential objectives Concentrating on public policy issues the conference featured keynote addresses by influential past and present public policy figures including Paul Volcker Chairman of the US President s Economic Recovery Advisory Board and former Chairman of the Federal Reserve System Tommaso Padoa Schioppa Chairman Promontory Financial Group Europe and Former Chairman of the Basel Committee on Banking Supervision Jaime Caruana General Manager of the Bank for International Settlements and Former Chairman of the Basel Committee on Banking Supervision and Charles Taylor Director of the Pew Charitable Trust Financial Reform Project and Former Executive Director of the Group of Thirty

Rules of the Road for Nonprofit Leaders Elizabeth M. Schmidt,2025 The United States has the most robust nonprofit sector in the world It is guided by rules that have enabled countless nonprofits to achieve their missions These rules have also helped shape the sector into a remarkable expression of the disparate and collective aspirations that Americans hold

both for their communities and the planet However the rules governing nonprofits are confusing for anyone who is not trained as a lawyer They are written in negative and convoluted language that stresses what is forbidden and they tend to paralyze those who are trying to change the status quo Nonprofit leaders need and deserve clear rules and regulations that tell them what they can and should do to achieve their missions A reframing of these rules does more than explain however Once we look at nonprofit rules from a different lens we can think more clearly about how these laws can be more responsive to the changing needs of the nonprofit sector and of our society

Green finance & carbon neutrality: strategies and policies for a sustainable future Wei Zhang,Tian Tang,Satar Bakhsh,Xuemeng Liu,2025-09-01 The accelerating global climate crisis demands innovative and sustainable financial strategies to mitigate its impacts and facilitate the transition to a carbon neutral economy Green finance and carbon neutrality are instrumental in this endeavor Green finance entails financial investments directed towards sustainable development projects and initiatives that promote environmental benefits Its growth is critical in supporting the transition to a low carbon economy Simultaneously the concept of carbon neutrality which refers to achieving net zero carbon dioxide emissions by balancing or eliminating emissions entirely has become a central goal for many governments and organizations worldwide The urgent global challenge that this Research Topic aims to address is how to effectively integrate green finance strategies into our path towards achieving carbon neutrality Despite the increasing importance of both these areas there remains a significant knowledge gap on how they can synergistically drive a shift towards a low carbon sustainable economy Moreover the absence of standardized

regulations and lack of broad understanding of these concepts have contributed to slower adoption and implementation rates than what is urgently required. The goal of this Research Topic is to consolidate recent advancements, present innovative strategies and highlight successful case studies in the nexus of green finance and carbon neutrality. This includes exploring novel financial instruments and models that encourage sustainable investments, comprehending the socio-economic impacts of moving towards a carbon neutral economy and showcasing policy mechanisms that have effectively integrated green finance and carbon neutrality. By amalgamating these insights, we aim to guide policymakers, inform business practices, stimulate further academic exploration and ultimately accelerate the global journey towards a sustainable carbon neutral future. The scope of this Research Topic encompasses a broad range of themes at the intersection of green finance and carbon neutrality. We are particularly interested in empirical Original Research articles in depth Reviews of current literature Policy and Practice Reviews and case studies demonstrating the successful application of green finance strategies in achieving carbon neutrality. Potential topics include but are not limited to following areas: Development of innovative green financial instruments; Analysis of policy frameworks and regulations promoting carbon neutrality; Examination of the role of ESG (Environmental, Social, Governance) factors in investment decisions; Studies on the socio-economic impacts of transitioning to a carbon neutral economy. Manuscripts that provide novel insights, propose unique models or offer critical perspectives on existing approaches are highly encouraged. By collating these diverse viewpoints, we aim to further enrich the dialogue on sustainable development and carbon neutrality.

Chinese Strategic Decision-making on CSR Shuo Wang, 2014-11-20

This research study attempts to provide a comprehensive CSR literature review, analyze corporate social responsibility (CSR) issues from the strategic decision making (SDM) perspective and investigate the process of managers' CSR related SDM in China. In particular, it utilizes content analysis to examine selected CSR articles from published studies in order to evaluate the trends in CSR theory development as well as to identify the variables, constructs and relationships within CSR theory. The review indicates that CSR should be involved in organizational strategies. Therefore, this study reviews the relevant theoretical and empirical literature in the SDM area. Firstly, it summarizes the broader context of strategic decisions and points out factors in the external environment and organizational characteristics that influence the SDM process of managers. Secondly, it articulates the influences of individual characteristics on the SDM. Thirdly, it examines the process of SDM using the rational and bounded rationality theory of decision making. Finally, on the basis of the SDM model, the author generates a research model which proposes the links between vital and influential factors from an integrated perspective. This book also provides a detailed description of how to choose a proper method for the CSR related SDM research, the process of survey design, sampling methods and survey administration. In particular, the author utilized a policy capturing method to develop a series of scenarios concerning CSR activities and an explanation of this method is provided. It reports research findings of this study and provides an extensive and thorough discussion and compares it with previous empirical studies. The conclusion

summarizes the research findings and their theoretical and practical implications **Globalization and International Organizations** Edward Kwakwa, 2017-05-15 The last few years have witnessed several significant developments in respect of international organizations most of which are best encapsulated in the word change In particular international organizations have moved from their traditional role of facilitator of the activities of their members to that of director of their own activities As a result there is increased scrutiny over issues relating to the governance control accountability and the privileges and immunities of international organizations These subjects are all the focus of this book Edward Kwakwa has collected together the best published work by leading authorities in the field on subjects of crucial importance and relevance to international organizations particularly in the context of today's ever increasing globalization This book is of interest to scholars and students of law as well as government and non government practitioners and international civil servants
