Commission, 1985 *The Language of the Soul in Narrative Therapy* Laura Béres, 2022-07-08 The Language of the Soul in
Narrative Therapy uniquely bridges the gap between narrative therapy and spirituality to describe how the theory and
practice of narrative therapy may be expanded and enriched by incorporating the language of the soul Divided into three
parts the book begins by contextualizing the approach of narrative therapy and spirituality Chapters then debate the
complexity of the soul as a term drawing on the work of Christian mystics and philosophers such as Teresa of Avila Edith
Stein Merleau Ponty and Bakhtin to show how their theoretical ideas can be incorporated in counseling practice and spiritual
direction The book concludes by discussing how the language of the soul can be integrated and applied in postmodern
practice With case examples from faith belief systems such as Christianity Buddhism Paganism Wicca and Yazidism
throughout this book is essential reading for therapists clinical social workers and counsellors in practice and graduate
training as well as spiritual directors and pastoral counselors interested in the ideas and practices of narrative therapy

About Dementia** Annette Leibing, Lawrence Cohen, 2006-02-15 Cultural responses to most illnesses differ dementia is no
exception These responses together with a society s attitudes toward its elderly population affect the frequency of dementia
related diagnoses and the nature of treatment Bringing together essays by nineteen respected scholars this unique volume
approaches the subject from a variety of angles exploring the historical psychological and philosophical implications of
dementia Based on solid ethnographic fieldwork the essays employ a cross cultural perspective and focus on questions of age
mind voice self loss temporality memory and affect Taken together the essays make four important and interrelated
contributions to our understanding of the mental status of the elderly First cross cultural data show the extent to which the
aging process while biologically influenced is also very much culturally constructed Second detailed ethnographic reports
raise questions about the behavioral criteria used by health care professionals and laymen for defining the elderly as

demented Third case studies show how a diagnosis affects a patient's treatment in both clinical and familial settings Finally the collection highlights the gap that separates current biological understandings of aging from its cultural meanings As Alzheimer's disease and other forms of dementia continue to command an ever increasing amount of attention in medicine and psychology this book will be essential reading for anthropologists social scientists and health care professionals

Taking Stock Francis T. Cullen, John Paul Wright, Kristie R. Blevins, 2008-12-01 Criminology is in a period of much theoretical ferment Older theories have been revitalized and newer theories have been set forth The very richness of our thinking about crime however leads to questions about the relative merits of these competing paradigms Accordingly in this volume advocates of prominent theories are asked to take stock of their perspectives Their challenge is to assess the empirical status of their theory and to map out future directions for theoretical development The volume begins with an assessment of three perspectives that have long been at the core of criminology social learning theory control theory and strain theory Drawing on these traditions two major contemporary macro level theories of crime have emerged and are here reviewed institutional anomie theory and collective efficacy theory Critical criminology has yielded diverse contributions discussed in essays on feminist theories radical criminology peacemaking criminology and the effects of racial segregation The volume includes chapters examining Moffitt's insights on life course persistent adolescent limited anti social behavior and Sampson and Laub's life course theory of crime In addition David Farrington provides a comprehensive assessment of the adequacy of the leading developmental and life course theories of crime Finally Taking Stock presents essays that review the status of perspectives that have direct implications for the use of criminological knowledge to control crime Taken together these chapters provide a comprehensive update of the field's leading theories of crime The volume will be of interest to criminological scholars and will be ideal for classroom use in courses reviewing contemporary theories of criminal behavior
