Low Living And High Thinking At Modern Times New York:

Low Living and High Thinking at Modern Times, New York Roger Wunderlich, 1992-06-01 In the mid 1800s deep in the Long Island pine barrens Modern Times was established as an experimental community whose members would not be bound by any government church constitution or bylaws Never more than 150 strong set on a plot of only 90 acres here was a haven for nonconformists Its currency was words its religion was discussion its standard of conduct was unfettered individual freedom Low Living and High Thinking at Modern Times New York rescues this model village from obscurity and demonstrates its importance in the history of American communitarianism and social reform especially in its pursuit of economic justice women's rights and free love The first full length study of Modern Times Wunderlich's account offers telling portraits of this small but significant group of reformers pioneers freethinkers and sexual radicals For 13 years they tested the precepts of the founders of the community the philosophical anarchists Josiah Warren and Stephen Pearl Andrews who advocated the sovereignty of the individual and private but profitless enterprise Each person lived as he or she pleased provided this did not impair the right of another to do the same and each traded goods and services at cost rather than market value enabling cash poor pioneers to own homesteads The community championed every kind of reform from abolitionism women's rights and vegetarianism to hydropathy pacifism total abstinence and the bloomer costume Indifference to marital status and the advocacy of a free love vanguard contributed to the community's controversial and somewhat illicit reputation In 1864 seeking to remove themselves from the limelight Modern Times's remaining settlers renamed the village Brentwood Wunderlich pieces together the village person by person by relying on primary sources such as land deeds census entries and eyewitness accounts He also sheds new light on Warren and Andrews two key figures in the communitarian movement and discusses at length such important contemporaries as Thomas and Mary Gove Nichols Robert Owen John Humphrey Noyes Horace Greeley John Stuart Mill Henry David Thoreau Ralph Waldo Emerson and George Ripley

Horace Greeley's New-York Tribune Adam-Max Tuchinsky, 2009 Historians and biographers have struggled to reconcile these seemingly contradictory tendencies Tuchinsky's history of the Tribune by placing the newspaper and its ideology squarely within the political economic and intellectual climate of Civil War era America illustrates the connection between socialist reform and mainstream political thought It was democratic socialism favoring free labor and bridging the divide between individualism and collectivism that allowed Greeley's Tribune to forge a coalition of such disparate elements as the old Whigs new Free Soil men labor and staunch abolitionists This progressive coalition helped ensure the political success of the Republican Party Indeed even in 1860 proslavery ideologue George Fitzhugh referred to socialism as Greeley's lost book The overlooked but crucial source of the Tribune's and by extension the Republican Party's antagonism toward slavery and its more general free labor ideology *A Measure of Perfection* Charles Colbert, 1997 Despite its widespread popularity in antebellum America phrenology has rarely been taken seriously as a cultural phenomenon Charles Colbert seeks to redress

this neglect by demonstrating the important contributions the theory made to artistic developmen **Socialism, Markets, and the Critique of Money** Tsuyoshi Yuki,2021-09-20 This book provides a comprehensive overview of historical and international debates on the theory of labor money or labor notes These debates exist in a triangular context of market socialism communism community based socialism and local currency joining numerous socialists anarchists and Marx and Engels Labor note theory encompasses theoretical ideological and practical doctrines aimed at designing a fair and desirable labor based market or non market economy by reforming the monetary and credit system This theory was considered an unfeasible utopian idea in the context of orthodox Marxism which is typically based on a historical study of surplus value doctrines However this book eschews Marx s critique of labor money that limits the debate regarding a concrete alternative society and instead proposes practical and gradual approaches to social reform by scrutinizing the primary sources of labor money theories and practical experiences and reconstructs their theoretical relationships Intentional Community Susan Love Brown,2002-01-01 Uses classical anthropological theory to understand intentional communities in the United States

Richard Congreve, Positivist Politics, the Victorian Press, and the British Empire Matthew Wilson,2025-04-08 This book is about the life and times of Richard Congreve This polemicist was the first thinker to gain instant infamy for publishing cogent critiques of imperialism in Victorian Britain As the foremost British acolyte of Auguste Comte Congreve sought to employ the philosopher s new science of sociology to dismantle the British Empire With an aim to realise in its place Comte s global vision of utopian socialist republican city states the former Oxford don and ex Anglican minister launched his Church of Humanity in 1859 Over the next forty years Congreveengaged in some of the most pressing foreign and domestic controversies of his day despite facing fierce personal attacks in the Victorian press Congreve made overlooked contributions to the history of science political economy and secular ethics In this book Matthew Wilson argues that Congreve s polemics in the name of Humanity served as the devotional practices of his Positivist church Region Simon Richards,Robert Schmidt III,Cagri Sanliturk,Falli Palaiologou,2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and

practitioners as well as the design work of international students tasked to explore what region means to them **Llewellyn Castle** Gary R.
