Selections from De Rerum Natura Bonnie A. Catto,1998-01-01 A brief biography of Lucretius History of materialist theory of the universe Detailed discussion of Lucretian originality and style Section on meter Bibliography The text includes 53 passages 1291 lines total spanning the entire *The Atomic Theory of Lucretius Contrasted with Modern Doctrines of Atoms and Evolution* John Masson,1884 **The Genius of Erasmus Darwin** Christopher Upham Murray Smith,Robert Arnott,2005 The Genius of Erasmus Darwin provides insight into the full extent of Erasmus Darwin s exceptional intellect He is shown to be a major creative thinker and innovator one of the minds behind the late eighteenth century industrial revolution and one of the first if not the first to perceive the living world including humans as part of a unified evolutionary scenario The contributions here provide contextual understandings of Erasmus Darwin s thought as well as studies of particular works and accounts of the later reception of his writings In this way it is possible to see why the young Samuel Taylor Coleridge was moved to describe Darwin as the first literary character in Europe and the most original minded man Erasmus Darwin Charles Darwin s grandfather was one of the leading intellectuals of eighteenth century England He was a man with an extraordinary range of interests and activities he was a doctor biologist inventor poet linguist and botanist He was also a founding member of the Lunar Society an intellectual community that included such eminent men as James Watt and Josiah Wedgwood *On the Literature and Thought of the German Classical Era* Hugh Barr Nisbet,2021-05-20 This volume provides a valuable contribution to our knowledge of eighteenth and nineteenth century intellectual life inside and outside Germany Prof Karl S Guthke Harvard University This elegant collection of essays ranges across eighteenth and

nineteenth century thought covering philosophy science literature and religion in the Age of Goethe A recognised authority in the field Nisbet grapples with the major voices of the Enlightenment and gives pride of place to the figures of Lessing Herder Goethe and Schiller These eleven essays range widely in their compass of thought and intellectual discourse dealing incisively with themes including the philosophical implications of literature and the relationship between religion science and politics The result is an accomplished reflection on German thought but also on its rebirth as Nisbet argues for the relevance of these Enlightenment thinkers for the readers of today The first half of this collection focuses predominantly on eighteenth century thought where names like Lessing Goethe and Herder but also Locke and Voltaire feature The second has a wider chronological scope discussing authors such as Winckelmann and Schiller while branching out from discussions of religion philosophy and literature to explore the sciences Issues of biology early environmentalism and natural history also form part of this volume The collection concludes with an examination of changing attitudes towards art in the aftermath of the Age of Goethe The essays in this volume have been previously published separately but are brought together in this collection to present Nisbet's widely acclaimed perspectives on this fascinating period of German thought It will be of interest to scholars and students of the intellectual life of Europe during the Enlightenment while its engaging and lucid style will also appeal to the general reader

Blood, Sweat and Tears - The Changing Concepts of Physiology from Antiquity Into Early Modern Europe Manfred Horstmannshoff, Helen King, Claus Zittel, 2012-06-22 Drawing on the methods of a wide range of academic disciplines this volume shifts the focus of the history of the body exploring the many different ways in which its physiology and its fluids were understood in pre modern European thought

Science and Civilisation in China: Volume 2, History of Scientific Thought Joseph Needham, Ling Wang, 1956-01-03 The second volume of Dr Joseph Needham's great work Science and Civilisation in China is devoted to the history of scientific thought Beginning with ancient times it describes the Confucian milieu in which arose the organic naturalism of the great Taoist school the scientific philosophy of the Mohists and Logicians and the quantitative materialism of the Legalists Thus we are brought on to the fundamental ideas which dominated scientific thinking in the Chinese middle ages The author opens his discussion by considering the remote and pictographic origins of words fundamental in scientific discourse and then sets forth the influential doctrines of the Two Forces and the Five Elements Subsequently he writes of the important sceptical tradition the effects of Buddhist thought and the Neo Confucian climax of Chinese naturalism Last comes a discussion of the conception of Laws of Nature in China and the West

Killer Books Aníbal González, 2010-07-05 Writing and violence have been inextricably linked in Spanish America from the Conquest onward Spanish authorities used written edicts laws permits regulations logbooks and account books to control indigenous

peoples whose cultures were predominantly oral giving rise to a mingled awe and mistrust of the power of the written word that persists in Spanish American culture to the present day In this masterful study Anibal González traces and describes how Spanish American writers have reflected ethically in their works about writing's relation to violence and about their own relation to writing Using an approach that owes much to the recent turn to ethics in deconstruction and to the works of Jacques Derrida and Emmanuel Levinas he examines selected short stories and novels by major Spanish American authors from the late nineteenth through the twentieth centuries Manuel Gutiérrez Nájera Manuel Zeno Gandía Teresa de la Parra Jorge Luis Borges Alejo Carpentier Gabriel García Márquez and Julio Cortázar He shows how these authors frequently display an attitude he calls graphophobia an intense awareness of the potential dangers of the written word **The Aeneid of Virgil: book vi, ed. by H.B. Cotterill** Publius Vergilius Maro, Virgil, 1901 **David Lynch Swerves** Martha P. Nochimson, 2013-04-15 Beginning with *Lost Highway* director David Lynch swerved in a new direction one in which very disorienting images of the physical world take center stage in his films Seeking to understand this unusual emphasis in his work noted Lynch scholar Martha Nochimson engaged Lynch in a long conversation of unprecedented openness during which he shared his vision of the physical world as an uncertain place that masks important universal realities He described how he derives this vision from the Holy Vedas of the Hindu religion as well as from his layman's fascination with modern physics With this deep insight Nochimson forges a startlingly original template for analyzing Lynch's later films the seemingly unlikely combination of the spiritual landscape envisioned in the Holy Vedas and the material landscape evoked by quantum mechanics and relativity In **David Lynch Swerves** Nochimson navigates the complexities of *Lost Highway* *The Straight Story* *Mulholland Drive* and *Inland Empire* with uncanny skill shedding light on the beauty of their organic compositions their thematic critiques of the immense dangers of modern materialism and their hopeful conceptions of human potential She concludes with excerpts from the wide ranging interview in which Lynch discussed his vision with her as well as an interview with Columbia University physicist David Albert who was one of Nochimson's principal tutors in the discipline of quantum physics **Through the Daemon's Gate** Dean Swinford, 2013-10-08 This book tells the story of the early modern astronomer Johannes Kepler's *Somnium* which has been regarded by science historians and literary critics alike as the first true example of science fiction Kepler began writing his complex and heavily footnoted tale of a fictional Icelandic astronomer as an undergraduate and added to it throughout his life The *Somnium* fuses supernatural and scientific models of the cosmos through a satirical defense of Copernicanism that features witches lunar inhabitants and a daemon who speaks in the empirical language of modern science Swinford's looks at the ways that Kepler's *Somnium* is influenced by the cosmic dream a literary genre that enjoyed considerable popularity among medieval authors including Geoffrey Chaucer Dante John of Salisbury Macrobius and Alan of Lille He examines the generic conventions of the cosmic dream also studying the poetic and theological sensibilities underlying the categories of dreams formulated by Macrobius and Artemidorus that were widely used to interpret specific

symbols in dreams and to assess their overall reliability Swinford develops a key claim about the form of the Somnium as it relates to early science Kepler relies on a genre that is closely connected to a Ptolemaic or earth centered model of the cosmos as a way of explaining and justifying a model of the cosmos that does not posit the same connections between the individual and the divine that are so important for the Ptolemaic model In effect Kepler uses the cosmic dream to describe a universe that cannot lay claim to the same correspondences between an individual's dream and the order of the cosmos understood within the rules of the genre itself To that end Kepler's Somnium is the first example of science fiction but the last example of Neoplatonic allegory

Mendeleyev's Dream Paul Strathern, 2019-06-04 One of Bill Gates Top Five Book Recommendations The wondrous and illuminating story of humankind's quest to discover the fundamentals of chemistry culminating in Mendeleyev's dream of the Periodic Table In 1869 Russian scientist Dmitri Mendeleyev was puzzling over a way to bring order to the fledgling science of chemistry Wearing by the effort he fell asleep at his desk What he dreamed would fundamentally change the way we see the world Framing this history is the life story of the nineteenth century Russian scientist Dmitri Mendeleyev who fell asleep at his desk and awoke after conceiving the periodic table in a dream the template upon which modern chemistry is founded and the formulation of which marked chemistry's coming of age as a science From ancient philosophy through medieval alchemy to the splitting of the atom this is the true story of the birth of chemistry and the role of one man's dream In this elegant erudite and entertaining book Paul Strathern unravels the quixotic history of chemistry through the quest for the elements

Reinvention Of Science, The: Slaying The Dragons Of Dogma And Ignorance Bernard J T Jones, Vicent J Martinez, Virginia Trimble, 2023-11-02 Throughout the history of science different thinkers philosophers and scientists postulated the existence of entities that in spite of their not being visible or detectable in their time or perhaps ever were nevertheless useful to explain the real world We started this book by looking at a handful of these entities These included phlogiston to account for fire the luminiferous ether for propagation of radiation the homunculus to provide for heredity and crystalline spheres to carry the wandering planets around the earth Many of these erroneous beliefs had held up progress just as dragons drawn on the edges of a map discouraged exploration This pattern of science evolution continued through the centuries up to the present day The book evolved into a more extensive history of how science evolved through controversy suppression and the desire to maintain the status quo Our story passes from the Babylonians and Greeks through the middle ages the renaissance and the scientific revolution to almost current events We discuss the evolution of our world the controversy about the extinction of dinosaurs and open questions in contemporary science such as dark matter black holes and the origin of the Universe including how we understand the subatomic world of elementary particles Most of the chapters deal with astronomy cosmology and physics but there are brief ventures into geosciences continental drift biosciences the homunculus atmospheric physics Heaviside layer paleontology the extinction of dinosaurs and computer science artificial intelligence The authors present a sequence of how mistakes and fallacies have

been purged from our quest to understand nature The way these changes have come about are skillfully set in their relevant historical contexts *The Gentleman's Magazine* ,1894
