After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In The Implications of Evolution for Metaphysics Theism Idealism and Naturalism David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power

Bittersweet Destiny Del Thiessen, 2017-09-08 Bittersweet Destiny combines discourse on the evolution of human behavior with a philosophical perspective It explores evolutionary theory aimed at determining human behavior Del Thiessen presents this material against the broad background of everyday life allowing the reader to see the theory of evolution as it has shaped his or her own behavior However he points out that when evolutionary theory is aimed at human behavior the critics object and controversy results Thiessen argues that nothing in our lives makes sense unless we look at it through a biological lens We can thereby understand our origin our affiliation with all animals and plants and our cultural destination However we can also discover a dark side to our destiny our favoritism to those who share our own genes our ability to deceive and our capacity for abuse rape and murder Good bad and indifferent we serve the replication of our DNA Critics extrapolate evolutionary theory to a wide range of animal species and even human morphology and physiology but when the same perspective is applied to human behavior there is strong dissent What these critics fear according to Thiessen is that accepting evolutionary notions about human behavior strikes at the heart of free will self determination and social equality Bittersweet Destiny describes the heroic efforts of naturalists Charles Darwin and Alfred Wallace to unlock the secrets of evolution It continues with a vivid description of our fossil history and our chance beginnings From there the story implicates disease processes in evolution highlights our rational and irrational nature focuses on those characteristics of brain evolution and language that make us distinctive and illustrates our most basic survival and reproductive mechanisms Thiessen warns the reader that things are as they are no matter what we might wish we ignore facts and controversy at our own risk This book will be significant to anthropologists psychologists biologists and sociologists **The World Book Encyclopedia**, 2002 An encyclopedia designed especially to meet the needs of elementary junior high and senior high school students

Deep Truth Gregg Braden, 2012-10-15 The Crisis Best selling author and visionary scientist Gregg Braden suggests that the hottest topics that divide us as families cultures and nations seemingly disparate issues such as war terrorism abortion

genocide poverty economic collapse climate change and nuclear threats are actually related They all stem from a worldview based upon the false assumptions of an incomplete science The History The obsolete beliefs of our modern worldview have brought us to the brink of disaster and the loss of all that we cherish as a civilization Our reluctance to accept new discoveries about our relationship to the earth one another and our ancient past keeps us locked into the thinking that has led to the crises threatening our lives today The Facts The scientific method allows for and expects new information to be revealed and assimilated into our existing beliefs It s the updating of scientific knowledge with the new facts from new discoveries that is the key to keeping science honest current and meaningful To continue teaching science that is not supported by the new discoveries ones based upon accepted scientific methods is not in fact scientific But this is precisely what we see happening in traditional textbooks classrooms and mainstream media today The Opportunity Explore for yourself the discoveries that change 150 years of scientific beliefs yet are still not reflected in mainstream thinking including Evidence of advanced near ice age civilizations The origin of and reasons for war in our ancient past and why it may become obsolete in our time The false assumptions of human evolution and of the Darwinian theory Let the strongest live and the weakest die and how this plays out in corporations societies warfare and civilization today Deep Truth reveals new discoveries that change the way we think about everything from our personal relationships to civilization itself When the facts become clear our choices become obvious

From Lucy to Language Donald C. Johanson, Blake Edgar, 1996 Now revised and updated this groundbreaking volume by one of the world s foremost paleontologists presents the most complete visual proof ever assembled of the evidence for human evolution displaying in full color all the key fossils and artifacts of human prehistory

Pan's Travail Johnson Donald Hughes, 1994 Many people express surprise writes J Donald Hughes when they are told that environmental problems existed in the ancient world they are used to thinking of the environment as an exclusively modern concern But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene but in many cases they were aware of them and commented on them In Pan s Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world Focusing on Greece and Rome as well as on areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing soil erosion depletion of wildlife and natural resources pollution and urban problems such as water supply and sewage disposal He also compares the ancient world s environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature
