Mechanisms Of Immigration Control A Comparative Analysis Of European Regulation Policies:

Mechanisms of Immigration Control Grete Brochmann, Tomas Hammar, 2020-06-03 Perhaps the most vexing question facing Europe today is what to do about asylum seekers and people in search of work who arrive daily some escaping nations where poverty and persecution are for them facts of life Given its costs both human and economic immigration policy has understandably become a highly politicized issue With the abolition of internal borders within the EU new controls are needed to stop immigration and to prevent non citizens from working illegally New external policies are being used such as early warning systems and visa controls with the long term aim of reducing emigration from poor and war ridden nations Europe has also intensified its control of internal aliens But there are limits to how tight a control can be made without violating the norms and values of the democratic state where human rights should be valid for citizens and non citizens alike However free immigration is not in the interests of the European states It might undermine labour and housing markets make planning impossible and alter the preconditions for welfare states This timely book addresses the politics and mechanisms of immigration control in Europe in an effort to unravel its complexities and propose sensible solutions It covers recent events including racist and populist party politics as well as changes in the international setting such as the development within the European Union and Schengen and the recent refugee crisis in the former Yugoslavia It will be essential reading for anyone interested in immigration studies European politics international relations anthropology and sociology

The Politics of Migration and Immigration in Europe Andrew Geddes, 2003-03-26 This text fulfills a major gap by comprehensively reviewing one of the most salient policy issues in Europe today migration and immigration It is the first book to address the question of whether we can legitimately speak of a European politics of migration that links states in terms of their policy response to each other and to an evolving EU policy The book carefully differentiates between different types of migration introduces the main concepts and debates and provides a broad comparative framework from which to assess the role and impact of individual states and the European Union EU and European integration to this key contemporary issue Topical and up to date the author fully reviews the politics and policies of immigration across the breadth and depth of Europe including the older immigration countries of France Germany and the United Kingdom the newer southern European countries and the enlargement states of East and Central Europe The Politics of Immigration and Migration in Europe is essential reading for all undergraduate and post graduate students of European politics political science and the social sciences more generally Andrew Geddes lectures at the School of Politics and Communications Studies University of Liverpool This book will be essential reading for students of migration and European integration but will also be important for decision makers and indeed anyone who wants to understand one of the burning issues of our times Stephen Castles Professor of Migration and Refugee Studies Director of the Refugee Studies Centre University of Oxford

Migration Control Logics and Strategies in Europe Claudia Finotelli, Irene Ponzio, 2023-04-24 Building upon the concept of

migration regime this open access book brings together the works of scholars who have investigated logics and routines of action in the field of immigration control within a single and innovative theoretical framework The chapters cover a wide range of policy domains from visa policy to the externalisation of controls labour migration to asylum internal controls towards irregular migration to restrictions for intra EU mobility By unravelling organisational strategies and practices across Europe the book does not only contribute to dismantling the very idea of the European North South divide in migration but also shows how Europe really works in the field of migration in times of deep economic asylum and health crises In this perspective the book questions the widespread understanding of migration control outcomes as simply the result of more or less effective state policies without considering the embeddedness of the national policy goals and strategies in the dynamic interplay of different economies institutional cultures and geopolitical positions

Modes of Migration Regulation and Control in Europe Jeroen Doomernik, Michael Jandl, 2025-10-01 In Europe immigration is a politically burning issue especially when it comes to the arrival of asylum seekers and illegal labour migrants Governments want to keep them under control in order to limit their numbers Yet traditionally there were strong differences between European states in the extent to which they sought to do so and the instruments employed to that end Currently the contours become visible of a common approach towards notably irregular migration This becomes clear from the country studies comprising this volume

Irregular Migrants in Belgium and the Netherlands Masja Meeteren, 2025-10-01 In *Irregular Migrants in Belgium and the Netherlands* Masja van Meeteren studies the different ways in which irregular migrants live in Belgium and the Netherlands The book offers an empirically grounded theoretical critique of the dominant research practice that focuses on survival strategies relies on comparisons of migrant communities and overemphasizes structural explanations Instead *Irregular Migrants* takes irregular migrants aspirations as a starting point of analysis Based on this innovative research approach key questions are answered regarding the lives of irregular migrants How can we understand their patterns of economic and social incorporation the transnational activities they engage in and the significance of different forms of capital Drawing on intensive participant observation as well as more than two hundred in depth interviews with irregular migrants and representatives of organizations that are involved with them *Irregular Migrants* develops much needed contextualized insights As such it sheds new light on previous research findings and various deadlocked scholarly debates on irregular migrants in Western societies

Security, Insecurity and Migration in Europe Gabriella Lazaridis, 2016-04-01 Having often been framed in terms of security concerns migration issues have simultaneously given rise to issues of insecurity on the one hand security of borders political societal and economic security insecurity in the host country on the other social legal and economic concerns about human security with regard to both EU citizens and migrants entering Europe In terms of state security migration is a core target of increasingly globally networked surveillance capabilities whilst with respect to human security it exposes the gap between the protections that migrants formally enjoy under international law and the realities

they experience as they travel and work across different countries Drawing on the latest research from across the EU Security Insecurity and Migration explores the concerns of states with regard to migration and the need to protect the fundamental rights of migrants An interdisciplinary examination of the issues of security and insecurity raised by migration for states their citizens and migrants themselves this book will be of interest to scholars of politics sociology and geography researching migration race and ethnicity human and state security and EU politics and policy **Migration and Social**
