In the foreground, a horse-drawn carriage is being pulled by two horses, with several figures walking nearby. The scene is set against a backdrop of rolling hills and a cityscape under a blue sky with clouds.

Papacy And The Art Of Reform In Sixteenth Century Rome:

The Papacy and the Art of Reform in Sixteenth-Century Rome Nicola Courtright, 2003-01-12 From his election in 1572 to his death in 1585 Pope Gregory XIII spent a great deal of money on the building and restoration of Rome's streets, churches and public monuments. One major monument, the three-story apartment rising from the Vatican Palace called the Tower of the Winds, was built to celebrate the most famous achievement of Gregory's papacy: the calendar reform. Its innovations in architecture and decoration and its wider religious and political purpose are the subject of this book. **The Cambridge Companion to the Council of Trent** Nelson H. Minnich, 2023-03-16 The Council of Trent was a major event in the history of Christianity. It shaped Roman Catholicism's doctrine and practice for the next four hundred years and continues to do so today. The literature on the Council is vast and in numerous languages. This Companion, written by an international group of leading researchers, brings together the latest scholarship on the principal issues treated at the Council: the relationship between Scripture and Tradition, original sin, justification, the sacraments (Baptism, Penance, Confirmation, Eucharist, Holy Orders, Marriage, and the Anointing of the Sick), sacred images, sacred music, and its reform of religious orders, the training of the clergy, the provision of pastoral care in the parish setting, and the implementation of its decrees. The volume demonstrates that the Council unwittingly furthered the papal centralization of authority by allowing the interpretation of its decrees to be the exclusive prerogative of the Holy See and entrusting it with their implementation. Andrea del Sarto: Splendor and Renewal in the Renaissance Altarpiece Steven J. Cody, 2020-08-25 Over the course of his career, Andrea del Sarto (1486-1530) created altarpieces rich in theological complexity, elegant in formal execution, and dazzlingly brilliant in chromatic impact. This book investigates the spiritual dimensions of those works, focusing on six highly significant panels. According to Steven J. Cody, the beauty and splendor of Andrea's paintings speak to a profound engagement with Christian theories of spiritual renewal, an engagement that only intensified as Andrea matured into one of the most admired artists of his time. From this perspective, *Andrea del Sarto: Splendor and Renewal in the Renaissance Altarpiece* not only shines new light on a painter who has long deserved more scholarly attention; it also offers up fresh insights regarding the Renaissance altarpiece itself. A Companion to Gregory the Great Bronwen Neil, Matthew J. Dal Santo, 2013-09-05 What made Pope Gregory I great? If the Middle Ages had no difficulty recognizing Gregory as one of its most authoritative points of reference, modern readers have not always found this question as easy to answer. As with any great figure, however, there are two sides to Gregory: the historical and the universal. The contributors to this handbook look at Gregory's greatness from both of these angles: what made Gregory stand out among his contemporaries, and what is unique about Gregory's contribution through his many written works to the development of human thought and described human experience. Contributors include Jane Baun, Philip Booth, Matthew Dal Santo, Scott DeGregorio, George E. Demacopoulos, Bernard Green, Ann Kuzdale, Stephen Lake, Andrew Louth, Constant J. Mews, John Moorhead, Barbara M. M. Neil, Richard M. Pollard, Claire Renkin, Cristina Ricci, and

Carole Straw **The Temporality of Building** Yun Gao, Nicholas Temple, Jing Xiao, 2025-03-31 This book examines the role that time plays in the life of buildings adopting a comparative study of this influence between European and Chinese traditions Whilst issues of time in architecture have attracted increasing interest by academics in the West challenging the dominant modernist precepts of space there is little understanding of the subject in China and how these compare to historical and contemporary perspectives in Europe A guiding premise of the investigation is that notions of building time require insight into how cultural habits commingle with natural rhythms or what David Leatherbarrow calls concurrency Rather than examining specific buildings the first three chapters apply three key themes language ritual and heritage as cultural lenses to reveal differences and similarities between the two traditions Through these lenses buildings interiors and their exterior spaces churches cathedrals temples palaces gardens and courtyard houses are explored to demonstrate how building time involves particular situations settings and their correlating relationships to past traditions In the final chapter we consider notions of time in the context of contemporary buildings in Europe and China drawing on the earlier historical investigations and addressing globalising influences This book would be of interest to architects architectural theorists historians philosophers sociologists and anthropologists

The Sensuous in the Counter-Reformation Church Marcia B. Hall, Tracy E. Cooper, 2013-07-22 This book examines the promotion of the sensuous as part of religious experience in the Roman Catholic Church of the early modern period During the Counter Reformation every aspect of religious and devotional practice was reviewed including the role of art and architecture and the invocation of the five senses to incite devotion became a hotly contested topic The Protestants condemned the material cult of veneration of relics and images rejecting the importance of emotion and the senses and instead promoting the power of reason in receiving the Word of God After much debate the Church concluded that the senses are necessary to appreciate the sublime and that they derive from the Holy Spirit As part of its attempt to win back the faithful the Church embraced the

sensuous and promoted the use of images relics liturgy processions music and theater as important parts of religious experience Reforming Reformation Thomas F. Mayer, 2016-12-05 The Reformation used to be singular a unique event that happened within a tidily circumscribed period of time in a tightly constrained area and largely because of a single individual Few students of early modern Europe would now accept this view Offering a broad overview of current scholarly thinking this collection undertakes a fundamental rethinking of the many and varied meanings of the term concept and label reformation particularly with regard to the Catholic Church Accepting the idea of the Reformation as a process or set of processes that cropped up just about anywhere Europeans might be found the volume explores the consequences of this through an interdisciplinary approach with contributions from literature art history theology and history By examining a single topic from multiple interdisciplinary perspectives the volume avoids inadvertently reinforcing disciplinary logic a common result of the way knowledge has been institutionalized and compartmentalized in research universities over the last century The result of this is a much more nuanced view of Catholic Reformation and once that extends consideration much further both chronologically geographically and politically than is often accepted As such the volume will prove essential reading to anyone interested in early modern religious history
