**Constructing Inequality in Multilingual Classrooms** Luisa Martín Rojo, 2010-07-30 In her groundbreaking and innovative study the author takes us on a fascinating journey through some of Madrid's multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work
