Boys, Bodies, and Physical Education Göran Gerdin, 2017-01-12 Using visual ethnography this book explores the many forms of pleasures that boys derive in and through the spaces and their bodies in physical education Employing the works of Michel Foucault and Judith Butler Gerdin examines how pleasure is connected to identity schooling and power relations and demonstrates how discourses of sport fitness health and masculinity work together to produce a variety of pleasurable experiences At the same time the book provides a critique of such pleasurable experiences within physical education by illustrating how these pleasures can still for some boys quickly turn into displeasures and can be associated with exclusion humiliation bullying and homophobia Boys Bodies and Physical Education argues that pleasure can both be seen as an educational and productive practice in physical education but also a constraint that both engenders and privileges some boys over others as well as re producing narrow and limited conceptions of masculinity and pleasures for all boys This book works to problematize these pleasures and their articulations with gender bodies and spaces

Teachers as Health Workers Louise McCuaig, Eimear Enright, Tony Rossi, Doune Macdonald, 2021-12-30 Schooling has long been held responsible for the health and well being of children However against an international background of rising concern about students performance and well being schools and teachers have faced escalating expectations of their health related work While various stakeholders have ideas about what teachers health work entails we know little about teachers contributions engagement and personal satisfaction with this work As teachers work represents a significant national investment insight into the cost benefit of teachers health work is vital to establishing the broader economic contribution of schools to society Teachers as Health Workers offers a critical perspective on these matters documenting the day to day work of Australian teachers as they grapple with the challenges and joys of balancing education and health related responsibilities Whilst shifts in policy economics and globalisation influence localised enactment of teachers health work the economic modelling theorising and methodological innovations of this research address enduring themes and challenges Consequently this book s critical perspective reveals policy practice gaps in government strategies seeking to create a healthy and productive population The book will inform education health and industrial policies and provide direction for teachers initial or ongoing preparation as health workers
