**Quest for Equity and Excellence** Brown & Associates, Thomas J. Brown, 1999-01-01 *Resources in Education*, 2001-04 **Building Inclusive Education in K-12 Classrooms and Higher Education: Theories and Principles** Koreeda, Kiyoji, Tsuge, Masayoshi, Ikuta, Shigeru, Dalton, Elizabeth Minchin, Ewe, Linda Plantin, 2023-06-12 Most people recognize the importance of inclusive education and hope to promote it everywhere at all levels and situations in education. However, the road to realizing this ideal is by no means a smooth one; due to this, further study is required. *Building Inclusive Education in K-12 Classrooms and Higher Education: Theories and Principles* discusses various inclusive practices in K-12 classrooms and higher education all over the world and presents problems and challenges that educators are struggling to overcome. Covering key topics such as educational technology, global movement, and inclusive education, this major reference work is ideal for administrators, policymakers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students. *Teaching and Learning Online* Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high-quality experiences to secondary students in an online environment that leads to age-grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al (2014), Wong et al (2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al (2021), Seaman et al (2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran (2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. **Black Issues in Higher Education**, 2004-09

**Professional Development** Jack Rhoton, Patricia Bowers, 2001 There's got to be more to professional development than in-service workshops. This thoughtful book paves the way to change. It shows the circumstances under which professional development has the most impact on student learning, reviews programs that work, and offers practical ideas about how professional development can sustain science education reform.
