The Manuscript and Meaning of Malory's Morte Darthur Kevin Sean Whetter, 2017 An examination of the rubricated letters in the Morte makes a convincing case for the design being by Malory himself The red ink names that decorate the Winchester manuscript of Malory's Morte Darthur are striking yet until now no one has asked why the rubrication exists This book explores the uniqueness and thematic significance of the physical layout of the Morte in its manuscript context arguing that the layout suggests and the correlations between manuscript design and narrative theme confirm that the striking arrangement is likely to have been the product of authorial design rather than something unusual dreamed up by patron scribe reader or printer The introduction offers a thorough account of not only the textual tradition of

the Morte but also the ways in which scholarship to date has not done enough with the manuscript contexts of Malory's *Arthurian*. The book then goes on to establish the singularity and likely provenance of Winchester's rubrication of names. In the second half of the study the author elucidates the narrative significance of this rubrication pattern outlining striking connections between manuscript layout and major narrative events, characters and themes. He suggests that the manuscript's mise en page underscores Malory's interest in human character and knighthood, creating a memorializing function similar to the many inscribed tombs that dominate the landscape of the Morte's narrative pages. In short, Winchester's design creates a memorializing tomb for Arthurian chivalry.

K. S. WHETTER is Professor of English at Acadia University, Canada. *The Meaning of Meat and the Structure of the Odyssey* Egbert J. Bakker, 2013-04-18. A literary study of the *Odyssey* based on the central economic and symbolic importance of the eating of meat. *Meaning* Michael Polanyi, Harry Prosch, 2024-05-31. Published very shortly before his death in February 1976, *Meaning* is the culmination of Michael Polanyi's philosophic endeavors. With the assistance of Harry Prosch, Polanyi goes beyond his earlier critique of scientific objectivity to investigate meaning as founded upon the imaginative and creative faculties. Establishing that science is an inherently normative form of knowledge and that society gives meaning to science instead of being given the truth by science, Polanyi contends here that the foundation of meaning is the creative imagination. Largely through metaphorical expression in poetry, art, myth and religion, the imagination is used to synthesize the otherwise chaotic and disparate elements of life. To Polanyi, these integrations stand with those of science as equally valid modes of knowledge. He hopes this view of the foundation of meaning will restore validity to the traditional ideas that were undercut by modern science. Polanyi also outlines the general conditions of a free society that encourage varied approaches to truth and includes an illuminating discussion of how to restore to modern minds the possibility for the acceptance of religion.

Patriotism and Other Mistakes George Kateb, 2006-01-01. George Kateb has been one of the most respected and influential political theorists of the last quarter century. His work stands apart from that of many of his contemporaries and resists easy summary. In these essays, Kateb often admonishes himself in Socratic fashion to keep political argument as far as possible negative, to be willing to assert what we are not and what we will not do, and to build modestly from there some account of what we are and what we ought to do. Drawing attention to the non-rational character of many motives that drive people to construct and maintain a political order, he urges greater vigilance in political life and cautions against mistakes not usually acknowledged as such. Patriotism is one such mistake too often resulting in terrible brutality and injustices. He asks us to consider how commitments to ideals of religion, nation, race, ethnicity, manliness and courage find themselves in the service of immoral ends, and he exhorts us to remember the dignity of the individual. The book is divided into three sections. In the first, Kateb discusses the expansion of state power, including such topics as surveillance and the justifications for war recently made by American policy makers. The second section offers essays in moral psychology, and the third comprises fresh interpretations of major thinkers in the tradition of

political thought from Socrates to Arendt
