shows how the rhetorical and dramatic shaping of the book emphasises the conflict of good and evil at many levels between Jesus and the Jewish authorities Jesus and the Roman authorities and the conflict of values within the disciples themselves These matters of content are integral to this original approach to Mark's theodicy while the stylistic issue raises the question of Mark's intended readership John Painter's succinct yet thorough treatment of Mark's gospel opens up not only these rhetorical issues but the social context of the gospel which Painter argues to be that of the Pauline mission to the nations

Keeney, 2017-05-15 Academic ethics are currently much in the news but there is a great deal of uncertainty both as to what constitutes specifically academic ethics and about a number of issues that are taken to be issues of academic ethics This collection of papers focuses on both questions moving from consideration of the very idea of a University and what that entails via attempts to locate the major current concerns to particular issues relating to the University's relations with the corporate world the professor's role relations between student and teacher credentialling the demands of collegiality and plagiarism The editors have provided both a full and reasoned introduction and a critical end piece that attempt to bring some order to the often inchoate nature of this field raising the further question of whether institutions should or should not frame formal codes of conduct The selected papers are drawn from diverse sources and together provide one of the first comprehensive overviews of academic ethics
