Quest For The Northeast Passage A Sea Adventure:

Quest for the Northeast Passage A. Richard Mansir, 1989 **The Woodenboat**, 1990 **Blackwood's Magazine**, 1925 **The Sea** Frederick Whympere, 1872 *Narrative of Discovery and Adventure in the Polar Seas and Regions* John Leslie, 1845 **Case Studies in Oceanography and Marine Affairs** Joan Brown, 2013-10-24 This is the last volume in the six volume Open University set Each volume is required by students as a relevant part of the Open University course but designed so that it can equally be used as an individual textbook This volume differs from the others in the series in that it does not draw specifically upon traditional scientific disciplines The first part of the book provides an historical review of the Law of the Sea culminating in the present day situation The second part is devoted to two case studies covering not only the scientific aspects of a particular oceanographic environment but also the social political and legal consequences and implications of human interactions with that environment Each volume in this set is well laid out and copiously illustrated with full colour photographs Questions to help develop arguments can be found in the text with answers provided at the back Each chapter concludes with a summary to help consolidate understanding before proceeding with the next section **The Arctic Climate System** Mark C. Serreze, Roger G. Barry, 2014-07-21 This second edition brings this definitive book up to date with the many advances in our understanding of Arctic climate since the first edition was published in 2005 The book has also been extensively reorganized to weave issues of Arctic change throughout the text rather than confining them to a single chapter It is the first to provide an integrated assessment of the Arctic climate system recognizing that a true understanding of how the Arctic functions lies in appreciating the interactions among its various components The book begins with a historical perspective followed by discussion of the basic physical and climatic characteristics of the Arctic Following a review of past climates paleoclimates the book closes with an assessment of the Arctic's uncertain future Though targeted mainly at advanced students and researchers this book is accessible to anyone with an interest in the Arctic and a basic understanding of climate science *Narrative of Discovery and Adventure in the Polar Seas and Regions* Sir John Leslie, Robert Jameson, Hugh Murray, 1835 **Catalogue of the Library of the City Library Association ...** Springfield City Library Association (Springfield, Mass.), 1871 **The Boundless Sea** David Abulafia, 2019-09-16 From the beginning of history to the present a sweep of the world's oceans and seas and how they have shaped the course of civilization From the author of the acclaimed *The Great Sea* Magnificent radiates scholarship and a sense of wonder and fun Simon Sebag Montefiore Book of the Year *The Economist* David Abulafia's new book guides readers along the world's greatest bodies of water to reveal their primary role in human history The main protagonists are the three major oceans the Atlantic the Pacific and the Indian which together comprise the majority of the earth's water and cover over half of its surface Over time as passage through them gradually extended and expanded linking first islands and then continents maritime networks developed evolving from local exploration to lines of regional communication and commerce and eventually to major arteries

These waterways carried goods plants livestock and of course people free and enslaved across vast expanses transforming and ultimately linking irrevocably the economies and cultures of Africa Europe Asia and the Americas Far more than merely another history of exploration The Boundless Sea shows how maritime networks gradually formed a continuum of interaction and interconnection Working chronologically Abulafia moves from the earliest forays of peoples taking hand hewn canoes into uncharted waters to the routes taken daily by supertankers in the thousands History on the grandest scale and scope written with passion and precision this is a project few could have undertaken Abulafia whom The Atlantic calls superb writer with a gift for lucid compression and an eye for the telling detail proves again why he ranks as one of the world s greatest storytellers *The sea: its stirring story of adventure, peril & heroism. [4 vols., publ. in 40 pt.].* Frederick Whympers, 1877

Into the Ice Sea JaapJan Zeeberg, 2005 Synthesizes several expeditions by archeologists connected with Amsterdam s Rijksmuseum in the Novaya Zemlya archipelago between 1991 and 2000 and their historical parallels of four centuries
