Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and

future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

A Treasure Hard to Attain David Howard Day,1997 Covers the archaeological content of approximately 120 popular films most of which have been produced in the United States since 1912 A unique feature is the inclusion of archaeologically significant dialogue from films that reveal how the industry portrays archaeology Key words at the top of each page in the filmography allow readers to locate a particular film by title Extensive commentaries appear for the newer pictures while briefer remarks are found for older films
