Quest For Quality Special Pb 2003

Jean-Daniel Chiche

Quest For Quality Special Pb 2003:

American Educational Research Association Annual Meeting Program American Educational Research Association, 2003

Patient Safety and Quality of Care in Intensive Care Medicine Jean-Daniel Chiche, 2009 The maxim *Primum non nocere* is almost as old as the practice of medicine In combination with the principles of beneficence autonomy and justice and whilst keeping in mind the confidence and dignity of the patient it should constitute the basis of our behaviours as physicians and nurses Since diagnostic and therapeutic interventions have become more complex and their risk benefit ratios more difficult to assess the importance of safety and quality of care rises Avoiding the infliction of harm on our patients has moved into the focus of clinical medicine Publisher's description Organizing for Quality Paul Bate, Peter Mendel, Glenn Robert, 2008 This challenging and highly practical book draws on the findings from an international study designed to help practitioners and researchers understand the factors and processes that enable healthcare organisations in the United States and Europe to achieve and sustain high quality services for their users The in depth case studies from seven leading hospitals give an international evidence based outlook that focuses on both the organisational and cultural processes of quality improvement Implication for research and practice are considered and a checklist of possible challenges has been drawn up to help identify any gaps in initiatives Healthcare policy makers and shapers including hospital chief executives and NHS directors will find this book enlightening as will healthcare quality improvement and service development researchers and professionals Clinicians with an interest in quality improvement will also find much of interest **Managing Health Services** M. G. Harris, Mary G. Harris, 2006 *Managing Health Services Concepts and Practice* 2nd edition provides a valuable practice resource for health service management students and managers While new concepts and strategies of multidisciplinary health service management and leadership have been added the focus remains on providing comprehensive coverage of management topics and issues faced by health services managers *School Media Centers as Instructional Resources* Rebecca Molineaux, 2007 *Leading Evidence Informed Value Improvement in Healthcare* John Ovretveit, 2009-10-04 Improvement in healthcare has not delivered on its promise outside of a few examples This is because it has not sufficiently been linked to resources thus argues this book Value improvement focuses on changes which raise quality and lower costs This is effective because it unites professions patients payers and purchasers in a common cause and uses tested solutions and methods Value improvement works with the realities of resources and politics and with knowledge of what is effective in different situations The purpose of healthcare is to reduce avoidable suffering This includes the suffering unknowingly caused by a service when we do not use an effective treatment or make an error These events are also waste and they have a financial cost The good news is that we now have more knowledge about these adverse or suboptimal events and about effective solutions We now know these organisational events are not inevitable and we can prevent them We are also beginning to discover that many if prevented will reduce the costs of healthcare Improving diagnosis and

prescribing reduces both avoidable suffering and higher costs as do hygiene strategies and changes to ensure professionals pass on correct information about patients to the next caregiver We are entering an exciting time in healthcare equivalent to earlier periods of medical discoveries The discoveries of improvement and implementation science in organisations are now being linked to the discoveries about the costs and savings of quality and safety changes This knowledge is beginning to be used by clinicians management and purchasers and alliances are forming to bring in a new era of quality and safety improvement The aim of this book is to show how ordinary leaders can combine improvement knowledge with resource knowledge to reduce suffering and the costs of healthcare It does not assume good information technology or special resources to help improvement It recognises that our colleagues may not want to spend time on this work and often do not do what they are asked to do It recognises some improvements are not value improvements they do not add value for patients and reduce costs Where improvements do both we may find that the financing system penalises the provider for making the change or we cannot convert the saved resources into lower costs or higher income Thus it is also about both short term and long term value improvements It is about how managers and other leaders find and awaken energy in themselves to make improvement and bring this energy to life in the people they work with How we channel this energy in effective ways and enable others to make improvement It is about tomorrow and next week and about where the real innovation creativity and inspiration happens in the routine but changing short staffed semi chaos of most health services We are not powerless and can choose not to accept failings of the health system as being outside of our influence A few others have shown what can be achieved when we join in a common cause and use these effective methods The challenge is for us is to do this in our local service and to connect our services

Positive Aging and Precarity Irina Catrinel Crăciun, 2019-05-10 This book explores positive aging through the lens of precarity aiming to ground positive aging theories in current social contexts In recent years research on aging has been branded by growing disagreements between supporters of the successful aging model and critical gerontologists who highlight the widening inequalities disadvantages and precarity that characterize old age This book comes to fill a gap in knowledge by offering an alternative view on positive aging informed by precarity and its impact on projections concerning aging The first part of the book places aging in broader theoretical and empirical context exploring the complex links between views on aging successful aging theories policy and social reality The second part uses results from a qualitative research conducted in Germany to illustrate the dissonance between successful aging ideals and both negative and positive views on aging as well as aging preparation strategies inspired by precarity Findings from this section provide a solid starting point for comparisons with countries that are both similar and different from Germany in terms of welfare regimes and aging policies The final part of the book discusses the psychological implications of these findings within and beyond the German case study and outlines potential solutions for practice This book provides health psychologists gerontologists sociologists social workers health professionals as well as students and aging individuals themselves with better understanding of the meaning of aging in precarious times and builds confidence about aging well despite precarity

Operation Management B. Mahadevan, 2009 Aligning Business Processes and Information Systems Robert Heinrich, 2014-07-10 Business processes and information systems mutually affect each other in non trivial ways Frequently processes are designed without taking the systems impact into account and vice versa Missing alignment at design time results in quality problems at run time Robert Heinrich gives examples from research and practice for an integrated design of process and system quality A quality reference model characterizes process quality and a process notation is extended to operationalize the model Simulation is a powerful means to predict the mutual quality impact to compare design alternatives and to verify them against requirements The author describes two simulation approaches and discusses interesting insights on their application in practice

home and how to achieve this status in outpatient clinics Make the most effective care decisions with help from Evidence vs Harm icons that guide you through key treatments of common medical conditions *The Future of Education and Labor*
Gerald Bast,Elias G. Carayannis,David F. J. Campbell,2019-12-10 This book explores the ways in which education impacts labor markets Specifically the contributions in this book indicate that the future of labor is creative socially aware and interdisciplinary while identifying the changes and innovations needed in our educational systems to meet this demand Due to an increasing automatization robotic manufacturing the character of labor and work in general will change dramatically in the near future This will be the case not only in the western countries but also in the larger emerging economies in Asia for example China and India While societal environments economy and the character of labor are increasingly in a process of dramatic changes the educational systems and the leading principles of research about labor and employment are not changing adequately Cross disciplinary inter disciplinary and trans disciplinary thinking and learning is not the main focus of our educational systems Consequently the systems of academic research follow and apply disciplinary or even sub disciplinary strategies avoiding cross disciplinary research approaches and not supporting inter disciplinary academic career models This book introduces such strategic models to better prepare the next generation of workers for the new knowledge economy and the future of democratic societies
