The Formative Influences, Theories, and Campaigns of the Archduke Carl of Austria Lee W. Eysturlid, 2000-08-30 Archduke Carl of Austria lived during a time fractured by the collision of revolution and reaction and he drew upon the French Revolution as the source for most of his experiences as a field commander and theoretician He firmly believed that there were certain uncontradictable truths that governed warfare This first English language study of his theoretical writings offers a new perspective on understanding the mind of this military theorist through study of his intellectual background The archduke s military career lasted from 1792 to 1809 and his serious work as a military theoretician and historian ranged from the 1790s to the 1830s Eysturlid explores Archduke Carl s formative military education and experiences by examining the readings that formed the basis of his education and the instructors that exercised an influence over him Archduke Carl was a definite product of his Enlightenment education and a diehard proponent of limited warfare Chapters look carefully at Carl s major works on military strategy and tactics and observe in detail his actions and efforts during the 1796 and 1809 campaigns Two historiographical chapters provide valuable contextual material about this poorly understood historical figure

Ramified Natural Theology in Science and Religion Rodney Holder,2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible Traditionally knowledge of God has been seen to come from two sources nature and revelation However a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible Hence the distinction between bare natural theology and ramified natural theology The book begins with bare natural theology as background to its main focus on ramified natural theology Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science Natural Theology Philosophy of Religion Biblical Studies Systematic Theology and Science and Culture
