Question Concerning Technology And Other Essays:

The Question Concerning Technology, and Other Essays Martin Heidegger, 1982-01-19 To read Heidegger is to set out on an adventure The essays in this volume intriguing challenging and often baffling to the reader call him always to abandon all superficial scanning and to enter wholeheartedly into the serious pursuit of thinking Heidegger is not a primitive or a romantic He is not one who seeks escape from the burdens and responsibilities of contemporary life into serenity either through the re creating of some idyllic past or through the exalting of some simple experience Finally Heidegger is not a foe of technology and science He neither disdains nor rejects them as though they were only destructive of human life The roots of Heidegger's thinking lie deep in the Western philosophical tradition Yet that thinking is unique in many of its aspects in its language and in its literary expression In the development of this thought Heidegger has been taught chiefly by the Greeks by German idealism by phenomenology and by the scholastic theological tradition In him these and other elements have been fused by his genius of sensitivity and intellect into a very individual philosophical expression William Lovitt from the Introduction

future of the 21st century in the language of technological destiny Presenting Martin Heidegger Karl Marx and Friedrich Nietzsche as prophets of technological nihilism Kroker argues that every aspect of contemporary culture society and politics is coded by the dynamic unfolding of the will to technology Moving between cultural history our digital present and the biotic future Kroker theorizes on the relationship between human bodies and posthuman technology and more specifically wonders if the body of work offered by thinkers like Heidegger Marx and Nietzsche is a part of our past or a harbinger of our technological future Heidegger Marx and Nietzsche intensify our understanding of the contemporary cultural climate Heidegger s vision posits an increasingly technical society before which we have become objectless objects driftworks in a culture of boredom In Marx the disciplining of capital itself by the will to technology is a code of globalization first announced as streamed capitalism Nietzsche mediates between them envisioning in the gathering shadows of technological society the emergent signs of a culture of nihilism Like Marx he insists on thinking of the question of technology in terms of its material signs In *The Will to Technology and the Culture of Nihilism* Kroker consistently enacts an invigorating and innovative vision bringing together critical theory art and politics to reveal the philosophic apparatus of technoculture **Routledge**

Encyclopedia of Philosophy: Index Edward Craig,1998 Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are **Foucault's Legacy** C.G. Prado,2011-10-20 Foucault s Legacy brings together the work of eight Foucault specialists in an important collection of essays marking the 25th anniversary of Foucault s death Focusing on the importance of Foucault s most central ideas for present day philosophy the book shows how his influence goes beyond his own canonical tradition and linguistic milieu The essays in this book explore key areas of Foucault s thought by comparing aspects of his work with the thought of a number of major philosophers including Nietzsche Heidegger Rorty Hegel Searle Vattimo and Williams Crucially the book also considers the applicability of his central ideas to broader issues such as totalitarianism religion and self sacrifice Presenting a fresh and exciting vision of Foucault as a philosopher of enduring influence the book shows how important Foucault remains to philosophy today [The Movement of Nihilism](#) Laurence Paul Hemming,Kostas Amiridis,Bogdan Costea,2011-03-03 When Nietzsche announced the advent of nihilism in 1887-88 he argued that he was sketching the history of the next two centuries For some time now he wrote our whole European culture has been moving as toward catastrophe restlessly violently headlong like a river that want to reach the end that no longer reflects that is afraid to reflect Can we gain a ground for reflection upon our own condition Can we heed Nietzsche s warning Can we respond to the challenge In this book eleven newly commissioned essays from leading scholars offer an attempt to grasp Nietzsche s prescience through Heidegger s critique of it attempting to think through the philosophical consequences of the last century in reading the signs of our own condition The book also provides and fascinating and unique discussion of some of the lesser known texts of the later Heidegger **Michel Foucault** Barry

Smart,1994 **Navigating Technomedia** Sam Han,2008 This is an introductory survey of what the author calls the technomedia the generation of communication technologies after television cell phones and the first wave of the Internet Beginning with a history of media the book explores the nature and effects of technomedia like the blogosphere Blackberries and related technologies Because they are transforming the relations of their users to the social environment the topic is fast becoming an important focus of modern social theory Philosophy of Technology Robert C. Scharff,Val Dusek,2013-12-02 The new edition of this authoritative introduction to the philosophy of technology includes recent developments in the subject while retaining the range and depth of its selection of seminal contributions and its much admired editorial commentary Remains the most comprehensive anthology on the philosophy of technology available Includes editors insightful section introductions and critical summaries for each selection Revised and updated to reflect the latest developments in the field Combines difficult to find seminal essays with a judicious selection of contemporary material Examines the relationship between technology and the understanding of the nature of science that underlies technology studies **The Ruthless Critique of Everything Existing** Andrew Feenberg,2023-02-28 For several years after 1968 Herbert Marcuse was one of the most famous philosophers in the world He became the face of Frankfurt School Critical Theory for a generation in turmoil His fame rested on two remarkable books *Eros and Civilization* and *One Dimensional Man* These two books represent the utopian hopes and dystopian fears of the time In the 1960s and 70s young people seeking a theoretical basis for their revolution found it in his work Marcuse not only supported their struggles against imperialism and race and gender discrimination he foresaw the far reaching implications of the destruction of the natural environment Marcuse s Marxism was influenced by Husserl and Heidegger Hegel and Freud These eclectic sources grounded an original critique of advanced capitalism focused on the social construction of subjectivity and technology Marcuse contrasted the one dimensionality of conformist experience with the new sensibility of the New Left The movement challenged a society that delivered the goods but devastated the planet with its destructive science and technology A socialist revolution would fail if it did not transform these instruments into means of liberation both of nature and human beings This aspiration is alive today in the radical struggle over climate change Marcuse offers theoretical resources for understanding that struggle **Becoming who We are** Andrew Norris,2017 *Becoming Who We Are* clarifies the political and existential aspects of Stanley Cavell s understanding of ordinary language and of skepticism and shows the close connection between his reception of Kant Heidegger and Austin and his exploration of what Emersonian Perfectionism offers to democracy and modern life **The Crisis of Meaning and the Life-World** Lubica Učník,2016-12-15 In *The Crisis of Meaning and the Life World* ubica U n k examines the existential conflict that formed the focus of Edmund Husserl s final work which she argues is very much with us today how to reconcile scientific rationality with the meaning of human existence To investigate this conundrum she places Husserl in dialogue with three of his most important successors Martin Heidegger Hannah Arendt and Jan Pato ka For

Husserl 1930s Europe was characterized by a growing irrationalism that threatened to undermine its legacy of rational inquiry Technological advancement in the sciences Husserl argued had led science to forget its own foundations in the primary life world the world of lived experience Renewing Husserl s concerns in today s context U n k first provides an original and compelling reading of his oeuvre through the lens of the formalization of the sciences then traces the unfolding of this problem through the work of Heidegger Arendt and Pato ka Although many scholars have written on Arendt none until now has connected her philosophical thought with that of Czech phenomenologist Jan Pato ka U n k provides invaluable access to the work of the latter who remains understudied in the English language She shows that together these four thinkers offer new challenges to the way we approach key issues confronting us today providing us with ways to reconsider truth freedom and human responsibility in the face of the postmodern critique of metanarratives and a growing philosophical interest in new forms of materialism

Human Life is Radical Reality Howard Nelson Tuttle,2005 The twenty first century needs a new paradigm for philosophy because both Anglo American and Continental philosophy have ended in analytic sterility and deconstructive nihilism They have ignored the radical reality of human life which all other realities must presuppose Three European philosophers in the twentieth century Dilthey Heidegger and Ortega y Gasset began to develop this idea but never before has it been systematically conceptualized and adequately expounded With reference to the works of these philosophers this book examines the major categories and essential properties of human life as it is lived for example in time circumstance history and understanding

The Philosophical Roots of the Ecological Crisis Joshtrom Isaac Kureethadam,2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences

Robin Boyd: Spatial Continuity Mauro Baracco,Louise Wright,2017-01-20 Australian architect Robin Boyd 1919 1971 advocated tirelessly for the voice of Australian architects so that there could be an architecture that might speak to Australian conditions and sensibilities His legacy continues in the work of contemporary Australian architects yet also prompts a way forward for architecture particularly in relationship to the landscapes they inhabit through a quality of continuous space found in his work where the buildings are spatially reliant and sympathetic to the places they occupy A selection of 22 projects are documented comprehensively in this book for the first time This slice through Boyd s body of work reveals a gifted complex and contemporary thinker

Tectonics as a Process in Architecture Yonca Hurol,2025-07-22 Detailed research based review of the intersection of building processes and tectonics with case studies and theoretical reflections Tectonics as a Process in Architecture explores the dynamic nature of

building processes and their impact on architectural tectonics Detailed case studies and theoretical reflections are included to help readers see how recognizing tectonics as a process can be beneficial The book is based on research that was conducted to document all changes during the building processes of a house through close engagement between the researcher and the building the researcher was also the building s owner a neighbor to it its architect and a construction control This close connection enabled the capture of numerous changes some resulting in tectonic affects while others reflected innovative approaches These changes were introduced by various actors in the process including contractors builders and foremen In Tectonics as a Process in Architecture readers will find Invaluable insights on why tectonics is not merely as an outcome but an inclusive collaborative process that enhances architectural quality Two process maps one for tectonic affects and one for innovative approaches Evolving changes during construction and their potential to foster innovation A theory on procedural and inclusive tectonics primarily focused on details Due to its multifaceted nature Tectonics as a Process in Architecture will appeal to academics students and professionals interested in the intersection of architectural engineering construction and tectonic principles

Technology and the Philosophy of Religion

David Lewin,2010-09-13 The last one hundred years has seen unimaginable technological progress transforming every aspect of human life Yet we seem unable to shake a profound unease with the direction of modern technology and its ideological siblings global capitalism and massive consumption Philosophers such as Marcuse Borgmann and especially Heidegger have developed important analyses of technological society however in this book David Lewin argues that their ideas have remained limited either by their secular context or by the narrow conception of religion that they do allow This study guides the reader along the newly formed paths of the philosophy of technology arguing that where those paths come to an abrupt end a religious discourse is needed to articulate the ultimate concerns that drive technological action It calls for a meditation on the central insight of many religious traditions that in an ultimate sense we know not what we do To acknowledge that we know not what we do is the first step towards a theology of technology that draws upon insights from the mystical theological tradition as well as from recent developments in the continental philosophy of religion

Prophetic Politics

Philip J. Harold,2009-09-01 In Prophetic Politics Philip J Harold offers an original interpretation of the political dimension of Emmanuel Levinas s thought Harold argues that Levinas s mature position in Otherwise Than Being breaks radically with the dialogical inclinations of his earlier Totality and Infinity and that transformation manifests itself most clearly in the peculiar nature of Levinas s relationship to politics Levinas s philosophy is concerned not with the ethical per se in either its applied or its transcendent forms but with the source of ethics Once this source is revealed to be an anarchic interruption of our efforts to think the ethical Levinas s political claims cannot be read as straightforward ideological positions or principles for political action They are instead to be understood prophetically a position that Harold finds comparable to the communitarian critique of liberalism offered by such writers as Alasdair MacIntyre and Charles Taylor In developing this interpretation

which runs counter to formative influences from the phenomenological tradition Harold traces Levinas's debt to phenomenological descriptions of such experiences as empathy and playfulness Prophetic Politics will highlight the relevance of the phenomenological tradition to contemporary ethical and political thought a long standing goal of the series while also making a significant and original contribution to Levinas scholarship
