Thought Mira Balberg, 2017-09-26 Blood for Thought delves into a relatively unexplored area of rabbinic literature the vast corpus of laws regulations and instructions pertaining to sacrificial rituals Mira Balberg traces and analyzes the ways in which the early rabbis interpreted and conceived of biblical sacrifices reinventing them as a site through which to negotiate intellectual cultural and religious trends and practices in their surrounding world Rather than viewing the rabbinic project as an attempt to generate a nonsacrificial version of Judaism she argues that the rabbis developed a new sacrificial Jewish tradition altogether consisting of not merely substitutes to sacrifice but elaborate practical manuals that redefined the processes themselves radically transforming the meanings of sacrifice its efficacy and its value Report of the Director,

The Clinical Journal, 1901 **International Clinics**, 1907 **The Genocide Paradox** Anne O'Byrne, 2023-04-25 We regard genocidal violence as worse than other sorts of violence perhaps the worst there is But what does this say about what we value about the genos on which nations are said to be founded This is an urgent question for democracies We value the mode of being in time that anchors us in the past and in the future that is among those who have been and those who might yet be If the genos is a group constituted by this generational time the demos was invented as the anti genos with no criterion of inheritance and instead only occurring according to the interruption of revolutionary time Insofar as the demos persists we experience it as a sort of genos for example the democratic nation state As a result democracies are caught in a bind disavowing genos thinking while cherishing the temporal forms of genos life they abhor genocidal violence but perpetuate and disguise it This is the genocide paradox O Byrne traces the problem through our commitment to existential categories from Aristotle to the life taxonomies of Linneaus and Darwin through anthropologies of kinship that tether us to the social world the shortfalls of ethical theory into the history of democratic theory and the defensive tactics used by real existing democracies when it came to defining genocide for the U N Genocide Convention She argues that although models of democracy all make room for contestation they fail to grasp its generational structure or acknowledge the generational content of our lives They cultivate ignorance of the contingency and precarity of the relations that create and sustain us The danger of doing so is immense It leaves us unprepared for confronting democracy's deficits and its struggle to entertain multiple temporalities In addition it leaves us unprepared for understanding the relation between demos and violence and the

The Therapeutics of Gynecology and Obstetrics William Biddle Atkinson,1881 **The Sunnyside** ,1927 *The History of Blood Transfusion in Sub-Saharan Africa* William H. Schneider,2013-07-15 This first extensive study of the practice of blood transfusion in Africa traces the history of one of the most important therapies in modern medicine from the period of colonial rule to independence and the AIDS epidemic The introduction of transfusion held great promise for improving health but like most new medical practices transfusion needed to be adapted to the needs of sub Saharan Africa for which there was no analogous treatment in traditional African medicine This otherwise beneficent medical procedure also created a royal road for microorganisms and thus played a central part in the emergence of human immune viruses in epidemic form As with more developed health care systems blood transfusion practices in sub Saharan Africa were incapable of detecting the emergence of HIV As a result given the wide use of transfusion it became an important pathway for the initial spread of AIDS Yet African health officials were not without means to understand and respond to the new danger thanks to forty years of experience and a framework of appreciating long standing health risks The response to this risk detailed in this book yields important insight into the history of epidemics and HIV AIDS Drawing on research from colonial era governments European Red Cross societies independent African governments and directly from health officers themselves this book is the only historical study of the practice of blood transfusion in Africa
