Question Time at the ICJ in Contentious Cases Karel Wellens, 2025-09-13 This book written from a practice oriented perspective examines whether and how questioning from the Bench actually achieves its objective i.e. to assist the Court Particular circumstances such as incidental proceedings and the time factor have an impact on the act of questioning while the provisional relevance of issues raised perceived as such by both the Court and the parties may later turn out to be effective and rather important Judicial actors have raised both conceptual and contextual questions as well as procedural and substantive and even hypothetical ones The subject matter of questions depends on the Court's champ opératoire while the parties' litigation strategy and their co-operational duties provide the framework to respond to the Court and to comment on the other party's replies A survey of this practice by both the judicial actors and the parties well established now after almost eight decades constitutes the groundwork for the qualitative analysis of the manner in which questions replies and comments have found their way into the judicial reasoning of the Court and of individual judges In the overwhelming majority of judgments and individual opinions this judicial engagement has been co-decisive This is the first in depth and comprehensive monograph providing a functional analysis of this managerial tool at the Court's disposal making it essential reading for both scholars and practitioners studying and involved with the Court's jurisprudence Karel Wellens is Emeritus Professor of International Law at the Radboud University Nijmegen in The Netherlands

content either AL RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook *Principles of Real Estate Practice*, one of the most widely used principles textbooks in the country. Finally, our national content as well as our question selection is further tailored to the state testing outline promulgated by Pearson Vue for Alabama. Thus, the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your Alabama license exam. A word about the test questions: AL RELEP's testing practice section consists of ten national practice tests, five state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length, and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews, which reinforces your learning of the total body of information tested by your state exam. The questions are direct to the point and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation or rationale to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your Alabama real estate exam. So good luck!
