Questioning Outside The Lines Interdisciplinary General Education:

Interdisciplinary General Education Marcia Bundy Seabury, 1999 **Interdisciplinary Research** Allen F.

Repko, Rick Szostak, 2016-03-31 The Third Edition of Interdisciplinary Research Process and Theory offers a comprehensive and systematic presentation of the interdisciplinary research process and the theory that informs it Authors Allen F Repko and Rick Szostak illustrate each step of the decision making process by drawing on student and professional work from the natural sciences social sciences humanities and applied fields Designed for active learning and problem based approaches as well as for more traditional approaches the book now includes more examples from real student research projects and adds more tables and figures to enliven the discussion *Creating Interdisciplinary Campus Cultures* Julie Thompson Klein, 2010-01-11 Praise for Creating Interdisciplinary Campus Cultures Klein s analysis shows convincingly that from research in the sciences to new graduate level programs and departments to new designs for general education interdisciplinarity is now prevalent throughout American colleges and universities Klein documents trends traces historical patterns and precedents and provides practical advice Going directly to the heart of our institutional realities she focuses attention on some of the more challenging aspects of bringing together ambitious goals for interdisciplinary vitality with institutional budgetary and governance systems A singular strength of this book then is the practical advice it provides about such nitty gritty issues as program review faculty development tenure and promotion hiring and the political economy of interdisciplinarity We know that readers everywhere will find this book simultaneously richly illuminating and intensively useful from the foreword by Carol Geary Schneider president Association of American Colleges and Universities Klein reveals how universities can move beyond glib rhetoric about being interdisciplinary toward pervasive full interdisciplinarity Institutions that heed her call for restructured intellectual environments are most likely to thrive in the new millennium William H Newell professor Interdisciplinary Studies Miami University and executive director Association for Integrative Studies In true interdisciplinary fashion Julie Klein integrates a tremendous amount of material into this book to tell the story of interdisciplinarity across the sciences social sciences and humanities And she does so both from the theoretical perspective of understanding interdisciplinarity and from the practical vantage of doing interdisciplinarity This book is a must read for faculty and administrators thinking about how to maximize the opportunities and minimize the challenges of interdisciplinary programming on their campuses Diana Rhoten director Knowledge Institutions Program and director Digital Media and Learning Project Social Science Research Counsel **Symmetries in Science XI** Bruno Gruber, Giuseppe Marmo, Naotaka Yoshinaga, 2005-12-27 This book is a collection of reviews and essays about the recent developments in the area of Symmetries and applications of Group Theory Contributions have been written mostly at the graduate level but some are accessible to advanced undergraduates The book is of interest to a wide audience and covers a broad range of topics with a strong degree of thematic unity The book is part of a Series of books on Symmetries in Science and may be compared to

the published Proceedings of the Colloquia on Group Theoretical Methods in Physics Here however prevails a distinguished character for presenting extended reviews on present applications to Science not restricted to Theoretical Physics

Disciplinary Styles in the Scholarship of Teaching and Learning Mary Taylor Huber, Sherwyn P.

Morreale, 2023-07-21 Ten sets of disciplinary scholars respond to an orienting essay that raises questions about the history of discourse about teaching and learning in the disciplines the ways in which disciplinary styles influence inquiry into teaching and learning and the nature and roles of interdisciplinary exchange The authors hope to contribute to a common language for trading ideas enlarging our pedagogical imaginations and strengthening our scholarly work Disciplines represented chemistry communication studies engineering English studies history management sciences mathematics psychology and sociology A collaboration of The Carnegie Foundation for the Advancement of Teaching and AAHE Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Beyond Interdisciplinarity Julie Thompson Klein, 2021 Beyond Interdisciplinarity examines the broadening meaning of core concept across academic disciplines and other forms of knowledge In this book Associate Editor of The Oxford Handbook of Interdisciplinarity and internationally recognized scholar Julie Thompson Klein depicts the heterogeneity and boundary work of inter and trans disciplinarity in a conceptual framework based on an ecology of spatializing practices in transaction spaces including trading zones and communities of practice The book includes both crossdisciplinary work encompassing multi inter and trans disciplinary forms as well as cross sector work spanning disciplines fields professions government and industry and communities The first section of the book defines and explains boundary work discourses of interdisciplinarity and the nature of interdisciplinary fields In the second section Klein examines dynamics of working across disciplines including communication collaboration and learning with concrete examples and lessons from research projects and programs that transcend traditional fields The closing chapter examines reasons for

failure and success then presents gateways to literature and other resources Throughout the book Klein emphasizes the roles of contextualization and historical change while factoring in the shifting relationship of disciplinarity and interdisciplinarity ascendancy of transdisciplinarity and intersections with other constructs including Mode 2 knowledge production convergence team science and postdisciplinarity The conceptual framework she provides also includes the role of boundary objects agents and organizations in brokering differences and creating for platforms for change Klein further explains why translation interlanguage and a communication boundary space are vital to achieving intersubjectivity and collective identity They foster not only pragmatics of negotiation and integration but also reflexivity transactivity and co production of knowledge with stakeholders beyond the academy Rhetorics of holism and synthesis compete with instrumentalities of problem solving and transgressive critiques However typical warrants today include complexity contextualization collaboration and socially robust knowledge Crossing boundaries remains complex but this book guides readers through the density of pertinent literature while expanding understandings of crossdisciplinary and cross sector work

Innovations in Interdisciplinary Teaching Carolyn Haynes, 2002-04-30 Specialists in interdisciplinary studies either as teachers or administrators offer advice to new and experienced faculty members teaching a no trump course primarily at the undergraduate level They address such questions as how faculty can best prepare how to ensure excellence in learning and the foundational tenets in interdisciplinary teaching Annotation copyrighted by Book News Inc Portland OR

Natural Literacy Doug Dix, 2008-02-27 Harold Shapiro the former president of Princeton ventured to say that theology had been divorced from the liberal Professor Doug Dix s book is about arranging a remarriage His analysis suggests the divorce goes deeper than Shapiro may have realized Love has been divorced from learning because money has replaced truth as the object of affection Now students learn to earn Natural Literacy strives to motivate students and faculty to instead learn to love What do we truly want to know Doug Dix proposes that readers discover authentic answers by repairing their motives and returning to their natural roots His perspective is innovative and certain to be controversial

General Education Essentials Paul Hanstedt, 2024-02-05 Supplying an insightful introduction to current trends in general education reform this second edition of General Education Essentials A Guide for College Faculty gives an important timely overview of general education curricular design General education curricula provide students with the intellectual flexibility they need to adapt thoughtfully and productively to the rapid changes of the workplace and the world at large This book offers methods for engaging in curricular reform efforts that support university culture and teachers and examines the implications of general education reform in the classroom with a keen eye toward syllabi course content and student work By expertly blending theory with curricular ideas for implementation this text offers an impactful illustration of the shift from distributive to integrative to high impact models of general education Featuring plentiful examples from a variety of fields and disciplines this book is essential reading for any higher education faculty member tasked with equipping students with the skills they

need to become perceptive scholars and productive citizens A Co Publication with AAC U The Changing Face of Higher Education Dennis Ahlburg, 2018-07-04 Over the last decade a heated debate has raged in the US and the UK over whether the humanities are in crisis and if there is one what form this crisis takes and what the response should be Questioning how there can be such disagreement over a fundamental point The Changing Face of Higher Education explores this debate asking whether the humanities are in crisis after all by objectively evaluating the evidence at hand and opening the debate up to a global scale by applying the questions to twelve countries from different continents Each carefully chosen contributor considers the debate from the perspective of a different country The chapters present data on funding student enrolment in the humanities whether the share of total enrolment in this area is falling and answer the following questions What does each country mean by the humanities Is there a crisis in the humanities in this country What are the causes for the crisis What are the implications for the humanities disciplines Uniquely offering an objective evaluation of whether this crisis exists the book will appeal to international humanities and higher education communities and policy makers including postgraduate students and academics **Higher Education in the United States [2 volumes]** James J. F. Forest, Kevin Kinser, 2002 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity **Applying Anthropology to General Education** Jennifer R. Wies, Hillary J. Haldane, 2022-03-30 The current higher education policy and practice landscape is simultaneously marked by uncertainty and hope and nowhere are these tensions more present than in discussions and actions around general education This volume uses an anthropological approach to contemplate ways of reimagining general education for the 21st century and how faculty teachers administrators and others can transform the educational endeavor to be holistic comprehensive and aligned with the needs of people and the planet in the decades to come Included are analyses of general education concepts such as diversity case studies of general education and connecting curricula opportunities for faculty development unique general education student populations assessment strategies and philosophical pedagogical challenges Contributors make the case that far from receding from a central role in higher education there is a need to strengthen general education curricula as key to the educational needs of students for the skills and competencies they require in the workplace and for civic engagement **1997 Compilation of Responses to Questions Regarding Agricultural Research, Extension, and Educational Programs** United States. Congress. Senate. Committee on Agriculture, Nutrition, and Forestry, 1997 *Resources in Education* , 1996 Neuroscience in Education Sergio Della Sala, Mike Anderson, 2012-04-05 In the past ten years there has been growing interest in applying our knowledge of the human brain to the field of education including reading learning language and mathematics This has resulted in the development of a number of new practices in education some good some bad and some just crazy Hence we have had theories suggesting that listening to Mozart can boost intelligence foot massages can help unruly pupils fish oil can boost brain power even the idea that breathing through your

left nostril can enhance creativity Sadly there is a gap between what neuroscientists or cognitive psychologists know about brain mind functions and the supposedly scientific theory underlying the practices used daily in our schools So what has caused this wholesale embrace of neuroscience in the classroom a well intentioned but naive misunderstanding of how science works ideological reasons or financial incentives Neuroscience in Education brings together an international group of leading psychologists neuroscientists and geneticists to critically review some of these new developments examining the science behind these practices the validity of the theories on which they are based and whether they work It will be fascinating reading for anyone involved in education including psychologists teachers and policy makers **Advances in**

Experimental Philosophy of Law Karolina Prochownik, Stefan Magen, 2023-05-18 Only recently have philosophers and psychologists begun to consider empirical research methods to inform questions and debates in legal philosophy With the field ripe for further experimental inquiry this collection explores the most topical empirical developments and anticipates future research directions Bringing together legal scholars psychologists and philosophers chapters address questions such as Do people share a stable set of intuitions about what the law is What are common perceptions about causation intentionality and culpability and are they consistent with the corresponding legal concepts To what extent can experimental research methods advance theoretical debates in legal philosophy about the nature of law With fascinating implications for legal philosophy ethics and moral psychology Advances in Experimental Philosophy of Law sets the agenda for the emerging field of experimental jurisprudence and will be of interest to both researchers and practitioners alike Public Health Service Publication , Reauthorization of the Higher Education Act United States.
