Jones, 2013-01-11 This book addresses the question of what it might mean today to be a Luddite that is to take a stand against technology Steven Jones here explains the history of the Luddites British textile workers who from around 1811 proclaimed themselves followers of Ned Ludd and smashed machinery they saw as threatening their trade *Against Technology* is not a history of the Luddites but a history of an idea how the activities of a group of British workers in Yorkshire and Nottinghamshire came to stand for a global anti technology philosophy and how an anonymous collective movement came to be identified with an individualistic personal conviction Angry textile workers in the early nineteenth century became romantic symbols of a desire for a simple life certainly not the original goal of the actions for which they became famous *Against Technology* is in other words a book about representations about the image and the myth of the Luddites and how that myth was transformed over time into modern neo Luddism **Cyberprotest** Jenny Pickerill, 2013-07-19 Uses case studies and voices of activists themselves to examine the role of the internet at all levels of environmental activism Contemporary analysis of forms and processes of radical environmental activism Contemporary analysis of forms and processes of radical environmental activism Documents the negotiations and achievements of environmentalists both in dealing with the tensions of using environmentally damaging technology and in avoiding surveillance and counter strategies Will be of interest to students and academics of politics sociology environmental studies and anyone who has ever wondered if signing an email petition will make a difference

qui l'entourait l'homme de l'Ouest a vu son horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisée. Sommes-nous des lycanthropes ou des vampires. Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement d'avastateur. Prédicateurs nous pompons sans remords les énergies qui nous entourent. Jusqu'où ira-t-on.

Lamalif: A Critical Anthology of Societal Debates in Morocco during the "Years of Lead" (1966-1988) Brahim El Guabli, Ali Alalou, 2022-11-17. The LAMALIF anthology presents a wide variety of articles from LAMALIF, Morocco's longest-serving Francophone journal. Active between 1966 and 1988, LAMALIF covered the most critical periods of Moroccan history and engaged in crucial debates about democratization, feminism, culture, education, Third World relations, and decolonization. However, LAMALIF was not just a journal; it was a real school where Morocco's, North Africa's, and the developing world's emerging and established writers, artists, and thinkers found a space to disseminate their ideas and address readerships across different cultures and geographical areas in French. This anthology is the first comprehensive translation into English of a wide selection of LAMALIF's articles covering literary and art criticism, as well as critical theory, feminism, Islam, and emigration. In addition to making available to Anglophone readerships articles about transnational solidarities and connections between North Africa and the rest of the world, LAMALIF anthology

Religion David Lewin,2010-09-13 The last one hundred years has seen unimaginable technological progress transforming every aspect of human life Yet we seem unable to shake a profound unease with the direction of modern technology and its ideological siblings global capitalism and massive consumption Philosophers such as Marcuse Borgmann and especially Heidegger have developed important analyses of technological society however in this book David Lewin argues that their ideas have remained limited either by their secular context or by the narrow conception of religion that they do allow This study guides the reader along the newly formed paths of the philosophy of technology arguing that where those paths come to an abrupt end a religious discourse is needed to articulate the ultimate concerns that drive technological action It calls for a meditation on the central insight of many religious traditions that in an ultimate sense we know not what we do To acknowledge that we know not what we do is the first step towards a theology of technology that draws upon insights from the mystical theological tradition as well as from recent developments in the continental philosophy of religion
