bodies of research around empowerment growing interest in qualitative methods and measurement research especially the conceptualization and adaptations of the Women's Empowerment in Agriculture Index Employing mixed methods over more than a decade of cooperation among researchers from the Global South and the Global North has challenged the methods and findings of each approach The work has led to new insights about gender differences in what empowerment means to women and to men the importance of context interrelationships among dimensions of empowerment and the need for greater precision in terms and measures particularly around decision making asset ownership and time use Such collaborative research benefits from a long timeframe to build trust and shared understandings across disciplines The paper concludes with suggestions for the next phase of research

Reaching for the Sky: Empowering Girls Through Education Urvashi Sahni, 2017-09-12 Transforming the Lives of Impoverished Girls in Patriarchal Societies Since 2003 a privately funded high school in India has provided desperately needed education for girls from impoverished families in Lucknow the capital and largest city in Uttar Pradesh Urvashi Sahni the founder of Prerna Girls School has written a compelling narrative of how this modest school in northeast India has changed the lives of more than 5 000 girls and their families Most important it is through the perspectives of the girls themselves rather than through a remote academic viewpoint that Prerna's success unfolds The book focuses on the importance of education in bringing about gender equality in a patriarchal society It shows how girls learn to be equal and autonomous persons in school as part of their official curriculum and how they use this learning to transform their lives and those of their families The book's central argument is that education can be truly transformative if it addresses the everyday reality of girls' lives and responds to their special needs and challenges with respect and care The example of just one relatively small school in one corner of India the message and the stories it tells will inspire anyone concerned about the necessity of girls' education especially in developing countries The lives of the girls at Prerna Girls School are largely representative of those of millions living in poor regions in countries where patriarchal structures and norms prevail

Participatory Development in Kenya Dr Robert Craig Strathdee, Ms Josephine Syokau Mwanzia, 2012-11-28 Participatory Development PDev has been embraced by Third World governments and international organizations such as the World Bank as a means to reduce poverty and empower disadvantaged communities The emphasis on creating partnerships and using participatory and people centred approaches has obvious political appeal yet there is evidence that in practice interventions designed to increase PDev and reduce poverty have yet to have the desired empowerment transformation and sustainability effect Using an in depth study of the Basic Education Improvement Project BEIP implemented by the Government of Kenya the authors of this book critically assess the fit between policy practice and theory of PDev to shed light on theoretical debates that are on going in development

Recognizing Connectedness Rajib Nandi, Ratna M. Sudarshan, 2021-09-17 The concept of programme evaluation now more than half a century old refers to the practice of professional assessment of a programme that is informed by evidence and guided by evaluative thinking to arrive at a judgement about value merit worth significance and utility Good programme evaluations in general adopt an inclusive development approach rather than a transformative

approach Feminist evaluations by contrast identify a wide range of stakeholders and engage the larger community in order to identify and encourage the programme to challenge social norms that perpetuate inequalities between men and women and other genders The essays in this volume in different ways suggest that gender transformative change cannot happen through the actions or exercise of agency by one group alone whether it is girls or boys or women Instead the authors draw out the importance of connectedness between groups of people and between individual agents and the larger structures within which they are located In doing so they apply a feminist lens to a range of programme evaluations and policies at both the national level and at the level of specific states Uttarakhand Delhi Bihar Haryana Rajasthan and Tamil Nadu *Women and Fairness* Eva Lambertsson Björk, Jutta Eschenbach, Johanna M.
