Grollman, 1996-08-31 Bringing together fourteen experts from across the United States and Canada Bereaved Children and Teens is a comprehensive guide to helping children and

adolescents cope with the emotional religious social and physical consequences of a loved one's death. The result is an indispensable reference for parents, teachers, counselors, health care professionals, and clergy. Topics covered include what to say and what not to say when explaining death to very young children; how teenagers grieve differently from children and adults; how to translate Protestant, Catholic, or Jewish beliefs about death into language that children can understand; how ethnic and cultural differences can affect how children grieve; what teachers and parents can do to help bereaved young people at school; and activities, books, and films that help children and teens cope.

Access to Language and Cognitive Development Michael Siegal, Luca Surian, 2012. One of the most important questions about children's development involves how knowledge acquisition depends on the effect of language experience. To what extent and in what ways is a child's cognitive development influenced by their early experience of and access to language? Likewise, what are the effects on development of impaired access to language? This book is the first to confront directly the issue of how possessing an enhanced or impaired access to language influences children's development. Its focus is on learning environments, theory of mind, understanding, and the process of deriving meaning from conversations. The book features state-of-the-art chapters written by leading scholars, psychologists, linguists, and educators who are concerned with bilingualism, deafness, atypical child development, and development in cultures with limited vocabularies in areas such as number concepts. Throughout, it maps out what is known about the interface between language and cognitive development and the prospects for the future directions in research and applied settings. *Access to Language and Cognitive Development* will be of considerable interest to all those who are concerned with the development and welfare of children. It will be of particular interest to researchers and professionals interested in the effects of bilingualism and deafness on young children and in advances in assessment of atypically developing children, for example, those with autism or cerebral palsy who have an impaired access to participation in conversation.
