Quetzal In Flight Guatemalan Immigrant Families In The United States:

Guatemala-U.S. Migration Susanne Jonas, Nestor Rodríguez, 2015-01-05 Guatemala U S Migration Transforming Regions is a pioneering comprehensive and multifaceted study of Guatemalan migration to the United States from the late 1970s to the present. It analyzes this migration in a regional context including Guatemala, Mexico, and the United States. This book illuminates the perilous passage through Mexico for Guatemalan migrants as well as their settlement in various U S venues. Moreover, it builds on existing theoretical frameworks and breaks new ground by analyzing the construction and transformations of this migration region and transregional dimensions of migration. Seamlessly blending multiple sociological perspectives, this book addresses the experiences of both Maya and ladino Guatemalan migrants, incorporating gendered as well as ethnic and class dimensions of migration. It spans the most violent years of the civil war and the postwar years in Guatemala, hence including both refugees and labor migrants. The demographic chapter delineates five phases of Guatemalan migration to the United States since the late 1970s, with immigrants experiencing both inclusion and exclusion very dramatically during the most recent phase in the early twenty-first century. This book also features an innovative study of Guatemalan migrant rights organizing in the United States and transregionally in Guatemala, Central America, and Mexico. The two contrasting in-depth case studies of Guatemalan communities in Houston and San Francisco elaborate in vibrant detail the everyday experiences and evolving stories of the immigrants' lives.

Immigration in America Today James Loucky, Jeanne M. Armstrong, Larry J. Estrada, 2006-08-30 America today is witnessing the largest and most sustained wave of immigrants its borders have ever seen. Although factors like the Great Depression, World War II, and quota restrictions had slowed the massive influx of Europeans from the early part of the 20th century, policies like the 1965 Immigration and Nationality Act have relaxed quotas and opened America's doors to hundreds of thousands of immigrants a year from both Eastern and Western hemispheres, to reach a height of over 9 million immigrants in the 1990s. Today, immigrants and policy makers alike grapple with issues regarding employment, education, refugee status, and family reunification, as well as illegal immigrants, many from Mexico, whose legal immigration alone accounts for more than 20% of immigrants in the US. Despite this, this comprehensive reference source allows a glimpse of the same motivating factors that drove earlier immigrants through Ellis Island's gates: the promise of economic opportunity and the hope of a better life. Over 70 A-Z entries address topical and timely aspects of modern US immigration, including bilingual education, domestic work, employer sanctions, gangs, gender, homeland security, migrant education, posttraumatic stress disorder, stereotypes.

The Quetzal in Flight Norita Vlach, 1992-10-26 *The Quetzal in Flight* examines the motives for immigration of Guatemalan families to the United States and explores the processes of psychological change and adaptation that take place within the families during the early period of resettlement. Norita Vlach interviews six families, illustrating how each family's culture reflects its origins, decision to move, journey, and settling in process. Unique to this study are its focus on a previously undocumented Central American population.

the demonstrated interrelation of historical structural and acculturation perspectives and the use of the nuclear family as a model with which to study the immigration process Following a discussion of migration and mental health and a description of the historical and geographical context of migration in Guatemala Vlach briefly reviews literature in the field of family studies and migration The six case studies follow each one characterized as either centripetal in which families pull together to face the new world or centrifugal in which members are disengaged and in conflict The author summarizes how the families cope under stressful circumstances how they use resources and how they exhibit conflicting perceptions of both Guatemala and the United States The effect of civil war in Guatemala the role of the evangelical church the consequences of marital and family separation and reunification and the disquieting reaction of Guatemalan migrant youth to their transplantation into the United States are all addressed Vlach concludes by discussing the implications for anthropological theory and applied work Although this study is specific to Guatemalan families its findings apply readily to recent immigrants and refugees of other Latin American countries

[Voices of Guatemalan Women in Los Angeles](#) Gabriele Kohpahl, 2018-10-24 First published in 1999 Guatemalan immigration is part of a trend where more women in an increasing number of countries than men participate in transnational migration This research attempts to clarify the causes for this phenomenon First it evaluates which Guatemalan women initiators and pioneers in the decision to migrate Second it looks at women's diverse reasons for leaving Guatemala and third what are the conditions particular to women left behind This study will also contribute to an understanding of the increasing diversification of the Latin American immigrant population in the United States

Transnational Ruptures Catherine Nolin, 2017-05-15 A key development in international migration in recent years has been the increasing feminization of migrant populations Research attention now focuses not only on the growing number of women on the move

but also on their changing gender roles as more female migrants participate as principal wage earners and heads of household rather than as dependants. The tensions between population displacement within and beyond Guatemala and the multiple local, regional and national realities encountered and reconfigured by these refugee and migrants allow a fascinating window onto the connections and ruptures experienced in a global local world. *Transnational Ruptures* holds great interest and value for a wide readership from scholars who are interested in transnational and refugee studies and international migration to upper level university students in disciplines such as human geography, anthropology, sociology, Latin American Studies, gender studies, political science and international studies. *Encyclopedia of North American Immigration* John Powell, 2009. Presents an illustrated A-Z reference containing more than 300 entries related to immigration to North America including people, places, legislation and more. **Philanthropy in Communities of Color** Bradford Smith, Sylvia Shue, Jennifer Lisa Vest, Joseph Villarreal, 1999-03-22. Philanthropy is often associated with wealthy people giving large amounts of money to charitable organizations and indirectly to people they don't personally know. Ethnic philanthropy is almost totally different; it consists primarily of people sharing modest wealth with other people most of whom the givers know well. Too often communities of color are portrayed as takers rather than givers; this important study debunks that myth.

The Quetzal in Flight Norita Vlach, 1992-10-26. *The Quetzal in Flight* examines the motives for immigration of Guatemalan families to the United States and explores the processes of psychological change and adaptation that take place within the families during the early period of resettlement. Norita Vlach interviews six families illustrating how each family's culture reflects its origins, decision to move, journey and settling in process. Unique to this study are its focus on a previously undocumented Central American population, the demonstrated interrelation of historical, structural and acculturation perspectives, and the use of the nuclear family as a model with which to study the immigration process. Following a discussion of migration and mental health and a description of the historical and geographical context of migration in Guatemala, Vlach briefly reviews literature in the field of family studies and migration. The six case studies follow, each one characterized as either centripetal in which families pull together to face the new world or centrifugal in which members are disengaged and in conflict. The author summarizes how the families cope under stressful circumstances, how they use resources and how they exhibit conflicting perceptions of both Guatemala and the United States. The effect of civil war in Guatemala, the role of the evangelical church, the consequences of marital and family separation and reunification, and the disquieting reaction of Guatemalan migrant youth to their transplantation into the United States are all addressed. Vlach concludes by discussing the implications for anthropological theory and applied work. Although this study is specific to Guatemalan families, its findings apply readily to recent immigrants and refugees of other Latin American countries. *Selected Papers on Refugees and Immigrants*, 2000. **Recent Immigration from Latin America** Joan Nordquist, 1995. **Mujeres en las fronteras** Esperanza Tuñón Pablos, 2001.
