David, Robert B. Taylor, Scott A. Fields, D. Melessa Phillips, Joseph E. Scherger, 2005-11-13 In the end, most of our patients and also most of us clinicians will die a cardiovascular death. During life, many will experience discomfort and disability caused by diseases of the heart and blood vessels. This book is intended to be a primer on these causes of morbidity and mortality. This book is comprised of chapters from the sixth edition of the large reference book *Family Medicine Principles and Practice*. Publishing chapters on selected topics provides volumes that are easy to carry in the pocket, are available at lower cost than large comprehensive volumes, and that allow clinicians to select books on areas that meet their specific needs. This book on cardiovascular diseases includes the chapter on Hypertension, which afflicts approximately 60 million Americans and contributes to many instances of heart disease, stroke, and kidney disease. Chapters related directly to the heart are those on Ischemic Heart Disease, Cardiac Arrhythmias, Valvular Heart Disease, and Heart Failure. I included the chapter on Dyslipidemia because elevated serum lipid levels contribute to many instances of cardiovascular disease. Venous Thromboembolism and Cerebrovascular Disease are the chief diseases of blood vessel. The chapter on Cardiovascular Emergencies includes what the primary care clinician needs to know when the unexpected strikes. When the primary care clinician provides Medical Care of the Surgical Patient, cardiovascular disease is often the main area of concern.      *The Quick-Reference Guide to Addictions and Recovery Counseling* Dr. Tim Clinton, Dr. Eric Scalise, 2013-10-15 The newest addition to the popular *Quick Reference Guide* collection. *The Quick Reference Guide to Addictions and Recovery Counseling*
