Quine Questions De Mots Questions De Faits:

The Death of Philosophy Isabelle Thomas-Fogiel, 2011 Philosophers debate the death of philosophy as much as they debate the death of God Kant claimed responsibility for both philosophy's beginning and end while Heidegger argued it concluded with Nietzsche In the twentieth century figures as diverse as John Austin and Richard Rorty have proclaimed philosophy's end with some even calling for the advent of postphilosophy In an effort to make sense of these conflicting positions which often say as much about the philosopher as his subject Isabelle Thomas Fogiel undertakes the first systematic treatment of the end of philosophy while also recasting the history of western thought itself Thomas Fogiel begins with postphilosophical claims such as scientism which she reveals to be self refuting for they subsume philosophy into the branches of the natural sciences She discovers similar issues in Rorty's skepticism and strands of continental thought Revisiting the work of late nineteenth and early twentieth century philosophers when the split between analytical and continental philosophy began Thomas Fogiel finds both traditions followed the same path the road of reference which ultimately led to self contradiction This phenomenon whether valorized or condemned has been understood as the death of philosophy Tracing this pattern from Quine to Rorty from Heidegger to Levinas and Habermas Thomas Fogiel reveals the self contradiction at the core of their claims while also carving an alternative path through self reference Trained under the French philosopher Bernard Bourgeois she remakes philosophy in exciting new ways for the twenty first century

L'épistémologie Miguel ESPINOZA, 2024-06-04 En épistémologie la dyade principale oppose les principes rationalistes aux doctrines idéalistes D'après le rationalisme contrairement à la croyance idéaliste l'objet n'est pas constitué par les capacités mentales du sujet il n'est pas identique à l'expérience et la connaissance que nous en avons D'où la nécessité de la métaphysique Avec la science elles forment un continuum La nature est ordonnée par une série de causes multiples et variées Grâce à cet ordre la raison existe d'abord dans la nature et ensuite de façon dérivée dans l'intellect La première partie de cette méditation sur la connaissance épistémologie générale examine une série de problèmes relatifs aussi bien à la connaissance du sens commun qu'à la connaissance scientifique La deuxième épistémologie des sciences de la vie est centrée sur des problèmes existant à la base de la biologie et de la psychologie La troisième partie est consacrée à l'épistémologie de la physique et la quatrième à l'épistémologie de la logique et des mathématiques L'un des objectifs de ce livre est de sensibiliser le lecteur à la valeur de l'épistémologie française moderne et contemporaine Miguel Espinoza Ph.D et HDR est un philosophe franco-chilien de la nature et des sciences Son œuvre mêle ses trois cultures scientifico-philosophiques hispanique anglo-saxonne et française *Quine* Jean Largeault, 1980 Willard Van Orman Quine Rita Bruschi, 1986 *La force des raisons* Ali Benmakhlouf, 2018-10-17 Certaines questions parmi les plus contemporaines comme celle du projet parental pour inscrire l'embryon in vitro dans une lignée humaine ou celle d'une activité cérébrale détectée par imagerie cérébrale fonctionnelle dans le cas des comas avancés sont à la fois médicales existentielles et logiques Pour les aborder et défaire ainsi les crampes mentales la conscience a peur d'un

Russell auxquels il a consacré de nombreux ouvrages Il est actuellement engagé dans les débats sur la bioéthique notamment dans l'Académie nationale de pharmacie dont il est membre correspondant

Ascent to Truth Paul Gochet, 1986 W. van Orman Quine is one of the leading philosophers in America today His thinking however has received little attention from philosophers in continental Europe This book is a systematic and critical account of Quine's philosophy which aims at isolating what is of lasting value in his work Each of his major theses is submitted to a thorough examination both from within and from without his general standpoint Quine's positions have changed a great deal over the years in response to external criticism and to internal stresses and strains These changes are described and assessed Quine's rejection of the analytic synthetic dichotomy is considered in the light of non-monotonic logic The multifarious versions of his holism are brought together and evaluated Dummett's objection to the effect that holism is inconsistent with empiricism is refuted It is argued however that the controversial thesis of the indeterminacy of translation becomes implausible as soon as learnability constraints are brought to bear on the matter Quine's new definition of logical truth in terms of grammatical structure is vindicated It is shown how the apparent conflict between his earlier and his later views on ontology can be superseded Can Quine hold a relativist view of ontology and at the same time maintain a non-relativist theory of truth Can he hold that truth is internal to theories and claim that scientific theories are underdetermined by observational data without lending support to relativism An affirmative answer to the first question is defended It is argued however that Quine could not meet the second challenge Quine's penetrating criticism of modal logic has prompted several research programs Paul Gochet exhibits the interrelations between these programs and argues that Quine's objections against modal logic can be met without any commitment to doctrines such as essentialism Of interest to Philosophers logicians linguists
