Inorganic chemistry Ira Remsen, 1889 Pentadic Redaction in the Manichaean Kephalaia Timothy Pettipiece, 2009 Discovered in 1929 the Manichaean Kephalaia have opened up an important window on the early development of Manichaean doctrine This study identifies a significant redactional tendency whereby the compilers of the text sought to clarify ambiguities in canonical Manichaean tradition by means of five part numerical series This discovery challenges the conventional wisdom of Manichaean scholarship which has long maintained that since Mani recorded his own teachings in a series of what later became canonical writings Manichaean doctrines were transmitted relatively unchanged from the master to successive

generations of disciples Since this assumption is now called into question it now becomes necessary to re evaluate received notions about the shape of both the Manichaeen canon and tradition Spellbound Daniel Z. Lieberman,2022-08-23

computer languages and codes that captured technologist David Auerbach's imagination. With a philosopher's sense of inquiry, Auerbach recounts his childhood spent drawing ferns with the programming language Logo on the Apple IIe, his adventures in early text-based video games, his education as an engineer, and his contributions to instant messaging technology developed for Microsoft and the servers powering Google's data stores. A lifelong student of the systems that shape our lives, from the psychiatric taxonomy of the Diagnostic and Statistical Manual to how Facebook tracks and profiles its users, Auerbach reflects on how he has experienced the algorithms that taxonomize human speech, knowledge, and behavior, and that compel us to do the same. Into this exquisitely crafted, wide-ranging memoir of a life spent with code, Auerbach has woven an eye-opening and searing examination of the inescapable ways in which algorithms have both standardized and coarsened our lives. As we engineer ever more intricate technology to translate our experiences and narrow the gap that divides us from the machine, Auerbach argues, we willingly erase our nuances and our idiosyncrasies, precisely the things that make us human.
