**Why?** Charles Tilly,2012-08-23 An eminently readable and interesting analysis of the four basic reasons people give to explain events or behaviors Library Journal In the tradition of the legendary sociologist Erving Goffman Tilly seeks to decode the structure of everyday social interaction and the result is a book that forces readers to reexamine everything from the way they talk to their children to the way they argue about politics Malcolm Gladwell New Yorker Why is a book about the explanations we give and how we give them a fascinating look at the way the reasons we offer every day are dictated by and help constitute social relationships Written in an easy to read style by distinguished social historian Charles Tilly the book explores the manner in which people claim establish negotiate repair rework or terminate relations with others through the

reasons they give Tilly examines a number of different types of reason giving For example he shows how an air traffic controller would explain the near miss of two aircraft in several different ways depending upon the intended audience for an acquaintance at a cocktail party he might shrug it off by saying This happens all the time or offer a chatty colloquial rendition of what transpired for a colleague at work he would venture a longer more technical explanation and for a formal report for his division head he would provide an exhaustive detailed account Tilly demonstrates that reasons fall into four different categories Convention I m sorry I spilled my coffee I m such a klutz Narratives My friend betrayed me because she was jealous of my sister Technical cause effect accounts A short circuit in the ignition system caused the engine rotors to fail Codes or workplace jargon We can t turn over the records We re bound by statute 369 Tilly illustrates his topic by showing how a variety of people gave reasons for the 9 11 attacks He also demonstrates how those who work with one sort of reason frequently convert it into another sort For example a doctor might understand an illness using the technical language of biochemistry but explain it to his patient who knows nothing of biochemistry by using conventions and stories Replete with sparkling anecdotes about everyday social experiences including the author s own Why makes the case for stories as one of the great human inventions Living within a Fair Share Ecological Footprint Robert Vale,Brenda Vale,2013-09-02

According to many authorities the impact of humanity on the earth is already overshooting the earth s capacity to supply humanity s needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity

September 11, 2001 Wilborn R. Hampton,2011-08-09 The award winning Wilborn Hampton recounts one horrifying day in history through the eyes of several who experienced it firsthand Age 10 and up Ten years after the tragic event that changed the course of America s history the interviews and accounts of survivors heroes and terrorists are no less poignant Seasoned reporter and award winning author Wilborn Hampton creates an intimate portrait of life and loss and offers a deeper understanding of that tragic day Back matter includes a bibliography and a filmography *Sociocultural Perspectives on Youth Ethical Consumerism* Giuliano Reis,Michael Mueller,Rachel Gisewhite,Luiz Siveres,Renato Brito,2017-11-07 This exciting new book advances current practice based and theoretical knowledge around how youth

defines and engages with consumerism to provoke a larger conversation within science and environmental education. It is also geared towards unveiling those literacy praxes that can assist youth to adopt more ethically oriented consumerist habits. More specifically, this book studies how youth's participation in the global consumer market intersects with media technologies, new literacies, as well as science and the environment from sociocultural perspectives. In addition, it considers how school science has mediated youth participation in hyper consumerism from food and technology to shelter and transportation. This important and timely book is a must read for those interested in topics such as critical youth studies, critical media literacy, STEM arts based research, STSE education, citizenship education, cultural studies, policy studies, curriculum studies, socio scientific issues, technology sustainability, food studies, social justice, poverty and consumer behaviour. A wide range of science, technology and environmental educators from Australia, Brazil, Canada, Netherlands and the United States have combined their perspectives to produce this exciting, innovative, timely and important book. It should be essential reading for all teachers, teacher educators and curriculum developers keen to address key issues raised by a commitment to assist students in refining their understanding of what constitutes socially, culturally, ethically and politically responsible consumer practices and supporting them in formulating and engaging in effective individual and collective action.

Derek Hodson, Emeritus Professor of Science Education, Ontario Institute for Studies in Education, OISE, University of Toronto  
Professor of Science Education at The University of Auckland, New Zealand and Founding Editor of the Canadian Journal of Science, Mathematics and Technology Education, CJSMT. The authors in the book deconstruct and analyse intricate economic, sociopolitical and affective networks that are behind the cycles of production, distribution and consumption of objects that are present in youngsters' daily lives and their attitudes towards them. Apart from breaking new ground by proposing and discussing socioculturally informed research about the topic, the book connects with pedagogical approaches that value critical perspectives on the nature of the relationship between science, technology, society and environment. It is a must read for both researchers and practitioners interested in issues related to sustainability and citizenship education.

**The Quotable George W. Bush** Bill Adler, 2011-05-13 I want you to tell your children that when they hear all the talk and all the speculation and all the thousands of hours of so called experts babbling away about this, that or the other, that the true policy of this government is to achieve peace for generations to come. And we can show the world the true face of America as well. Oh, it's a diverse face, no question about it, which is our strength, not our weakness. But it's a face that can be bound by common goals and common values. It's a face that can stand squarely in the face of evil by the collective acts of people doing good in America. You've read the Bushisms, but here is another portrait of the man and the politician. Long before then Governor of Texas, George W. Bush ran for the presidency; he was acknowledged

by the media as someone who could be counted on to provide memorable quotes seemingly without much effort. Instead of focusing on the malapropisms and verbal stumblings for which this Bush is most infamous, *The Quotable George W. Bush* offers illuminating insights into the ideals, political and social philosophy, and leadership agenda of one of our most decisive straightforward presidents. This book is the closest thing we have to a living memoir of the important years of President Bush's life, and it presents a true portrait of the man. The audience for *The Quotable George W. Bush* includes stalwart Republicans, conservatives, and the voting majority that consistently gives the president high marks and supports his administration without question. **The Believer**, 2003 **Journal of East Asian Libraries**, 2003 *Forthcoming Books* Rose Army, 2002-04 □□ □□ □□ □□, 2025-08-04 21 9 11 **The Italian 100** Stephen J. Spignesi, 2003 An invaluable addition to the Citadel 100 series that ranks the most prominent Italian figures in history from the Chairman of the Board to the Mayor of New York City. Now more than ever, Americans have entered into a passionate love affair with all things Italian, from the world-changing adventures of Christopher Columbus to the drama of opera to Italian cinema to the epic family saga of *The Sopranos*. *The Italian 100* chronicles the rich legacy of Italians and Italian Americans in a ranking of the most influential 100 and the enduring nature of their contributions. The giants who immeasurably changed the size and shape of our world: Galileo ranked 1, Christopher Columbus 2, and Marconi 3, grace the top of the list, while artistic and literary giants such as Michaelangelo, Leonardo da Vinci, Botticelli, Petrarch, and Dante feature prominently. Also profiled are the brilliant and sometimes despotic political leaders such as Niccolò Machiavelli, Lorenzo de' Medici, Garibaldi, Rudolph Giuliani, and Benito Mussolini, and geniuses of music, theater, and film such as Vivaldi, Puccini, Pavarotti, Fellini, Scorsese, and Sinatra. *The Italian 100* also highlights less familiar figures who have left legacies of equal magnitude such as Guido of Arezzo, who invented the musical staff; Leonardo Fibonacci, who introduced Arabic numerals to the Western world; Saint Fabiola, the Roman matron credited with cofounding the first public hospital in Western Europe; and Bartolommeo Cristofori, inventor of the modern piano. Part cultural companion, part historical reference, and part celebration, *The Italian 100* is a fresh and sometimes controversial look at a people who throughout more than fifteen centuries have had an enormous and profound effect on every aspect of the modern world. *Five Families* Selwyn Raab, 2014-05-13 The New York Times bestseller chronicling the history of NYC's infamous five mafia families is now the basis for the upcoming The HISTORY Channel documentary series *American Godfathers: The Five Families*. Genovese, Gambino, Bonnano, Colombo, and Lucchese. For decades, these Five Families ruled New York and built the American Mafia, or Cosa Nostra, into an underworld empire. Today, the Mafia is an endangered species, battered and beleaguered by aggressive investigators, incompetent leadership, betrayals, and generational changes that produced violent and unreliable leaders and recruits. A twenty-year assault against the five families, in particular, blossomed into the most successful law enforcement campaign of the last century. Selwyn Raab's *Five Families* is the vivid story of the rise and fall of New York's premier dons, from Lucky Luciano to Paul Castellano to John Gotti and more. The book

also brings the reader right up to the possible resurgence of the Mafia as the FBI and local law enforcement agencies turn their attention to homeland security and away from organized crime      **The New York Times Index** ,2002

**Turnaround** William Bratton,Peter Knobler,2009-03-04 When Bill Bratton was sworn in as New York City's police commissioner in 1994 he made what many considered a bold promise The NYPD would fight crime in every borough and win It seemed foolhardy even everybody knows you can't win the war on crime But Bratton delivered In an extraordinary twenty seven months serious crime in New York City went down by 33 percent the murder rate was cut in half and Bill Bratton was heralded as the most charismatic and respected law enforcement official in America In this outspoken account of his news making career Bratton reveals how his cutting edge policing strategies brought about the historic reduction in crime Bratton's success made national news and landed him on the cover of Time It also landed him in political hot water Bratton earned such positive press that before he'd completed his first week on the job the administration of New York's media hungry mayor Rudolph Giuliani threatened to fire him Bratton gives a vivid behind the scenes look at the sizzle and substance and he pulls no punches describing the personalities who really run the city Bratton grew up in a working class Boston neighborhood always dreaming of being a cop As a young officer under Robert di Grazia Boston's progressive police commissioner he got a ground level view of real police reform and also saw what happens when an outspoken dynamic reform minded police commissioner starts to outshine an ambitious mayor He was soon in the forefront of the community policing movement and a rising star in the profession Bratton had turned around four major police departments when he accepted the number one police job in America When Bratton arrived at the NYPD New York's Finest were almost hiding they had given up on preventing crime and were trying only to respond to it Narcotics Vice Auto Theft and the Gun Squads all worked banker's hours while the competition the bad guys worked around the clock Bratton changed that He brought talent to the top and instilled pride in the force he listened to the people in the neighborhoods and to the cops on the street Bratton and his dream team created Compstat a combination of computer statistics analysis and an unwavering demand for accountability Cops were called on the carpet and crime began to drop With Bratton on the job New York City was turned around Today New York's plummeting crime rate and improved quality of life remain a national success story Bratton is directly responsible and his strategies are being studied and implemented by police forces across the country and around the world In Turnaround Bratton shows how the war on crime can be won once and for all      **Eco-terrorism Specifically**
