Quranic Sciences:

Quranic Sciences Abbas Jaffer, Masuma Jaffer, 2009-01-01 Until now studies of the Quranic sciences have either been partial brief or sectarian In the main such works have more or less inspired the contribution of the great Shia scholars to our understanding of the Quranic sciences This book has been written not only to redress this gap but also to present a new and more balanced view of this important topic The authors have addressed many more issues than are usually found in a book on Quranic sciences some of which have been hitherto unavailable in English It is hoped that the book will be a useful addition to the material available to undergraduate students who are studying Islam

Quranic Sciences Afzalur Rahman, 1981-01-01 This book introduces everyone to the wealth of knowledge that sprang from the teaching of the Quran and influenced human studies and culture in diverse ways that has led to scientific inventions and growth of knowledge in the Muslim world between the 7th and 14th centuries and brought about the Renaissance in Europe and introduced the Europeans to the fundamental elements i e knowledge inquiry reason and freedom which opened the door for modern scientific inventions This book establishes that Quran and science are two aspects of the same truth and there is no contradiction between them The first revelation of the Quran inspired the Prophet of Islam to acquire knowledge and emphasised the importance of learning in human life 96 1 5 It also advised him to pray to Allah for increase in knowledge 20 114 According to the Quran only men of knowledge really fear Allah most 35 28 because they observe and see Signs and Attributes of Allah both in the Quran and in the material universe They reflect think and understand the parables of the Quran and His manifestations all around them and draw right and beneficial conclusions from them 29 43 The Quran makes it absolutely clear that the whole material structure is full of His Signs but only men of knowledge observe them and understand them It invites them to meditate on it 4 82 and on His creation The Quran introduces new dimensions into the study of religion and its philosophy and seeks to bring men of knowledge scientists closer to Allah through the study of His Attributes and manifestations in the material world We hope and pray this introductory study of the Quran as a science will initiate and encourage investigation and research in this direction and lead to the revival of scientific knowledge as it did in the early period of the Islamic history

A Culture of Ambiguity Thomas Bauer,2021-06-08 In the Western imagination Islamic cultures are dominated by dogmatic religious norms that permit no nuance Those fighting such stereotypes have countered with a portrait of Islam s medieval Golden Age marked by rationality tolerance and even proto secularism How can we understand Islamic history culture and thought beyond this dichotomy In this magisterial cultural and intellectual history Thomas Bauer reconsiders classical and modern Islam by tracing differing attitudes toward ambiguity Over a span of many centuries he explores the tension between one strand that aspires to annihilate all uncertainties and establish absolute uncontestable truths and another competing tendency that looks for ways to live with ambiguity and accept complexity Bauer ranges across cultural and linguistic ambiguities considering premodern Islamic textual and cultural forms from law to Quranic exegesis to literary genres alongside attitudes toward religious minorities and foreigners He emphasizes the relative absence of conflict between religious and secular discourses in classical Islamic culture which stands in striking contrast to both present day fundamentalism and much of European history Bauer shows how Islam s encounter with the modern West and its demand for certainty helped bring about both Islamicist and secular liberal ideologies that in their own ways rejected ambiguity and therefore also their own cultural traditions Awarded the prestigious Leibniz Prize A Culture of Ambiguity not only reframes a vast range of Islamic history but also offers an interdisciplinary model for investigating the tolerance of ambiguity across cultures and eras

Muslim Philosophy Hamid Naseem,2001 Muslims Have Been Provided By Allah A Complete Code Of Conduct In The Form Of Holy Quran In Quran There Are Two Types Of Verses I E Allegorical Mutashabih and Categorical Mukhammat The Mutashabih Verses Of Quran Are Mostly Pertaining To The Essence Of Allah And His Attributes Predestination Soul And Life Here After Death Etc Etc Since These Verses Are Outside The Purview Of Human Reasoning Much Hair Splitting And Question Begging Has Not Been Encouraged In This Regard Yet Many Of The Muslim Thinkers And Philosophers Have Ventured To Enter Into Detailed Discussions In These Matters

Reconstituting the Curriculum M. R. Islam,Gary M. Zatzman,Jaan S. Islam,2013-11-13 Based on groundbreaking new ideas this treatise signals a return to a rebuilding and reshaping of the curriculum as the primary tool for education This book presents a new definition of curriculum and what it should consist of with a view toward creating a more ethical educated and thinking person Rather

than treating students as products for society this approach returns to a view of the curriculum as a tool for educating students to reason through problems be bold in creating new solutions and contribute to a more vibrant just world The university curriculum introduced in the post Renaissance era dominated by doctrinal philosophy is based on learning or skill development suitable for creating a learned society that would eventually serve the establishment This curriculum has been promoted as the only form suitable for the modern education system It has introduced a tremendous amount of tangible advancement in all fields of the structured education system These tangible gains are often promoted as knowledge This has created confusion between education acquiring knowledge and learning training or skill development This book seeks to clarify the difference between these two divergent views of education It has been shown that the current curriculum is not conducive to increasing a student s knowledge because it is based on consolidating preconceived ideas that have been either passed on from previous generations or gained through personal experience In most cases this mode of cognition will not create a pathway for gaining knowledge that brings one closer to discovery The term education on the other hand is always meant to be a process of bringing forth one s inherent qualities and unique traits necessary and sufficient for increasing one s knowledge

The Epistemology of Ibn Khaldun Zaid Ahmad,2004-03 This is an analytical examination of Ibn Khaldun s epistemology centred on Chapter Six of the Muqaddima In this chapter entitled The Book of Knowledge Kitab al Ilm Ibn Khaldun sketched his general ideas about knowledge and science and its relationship with human social organisation and the establishment of a civilisation

Qur'ānic Hermeneutics from the 13th to the 19th Century Georges Tamer,2024-11-04 This project presents the hermeneutical approaches to the Qur n of the most prominent Qur nic scholars in Islamic intellectual history Not only scholars who wrote commentaries on the Qur n in the narrow sense of the word taf s r are to be presented but also those who dealt hermeneutically with the Qur n in various ways The Handbook of Qur nic Hermeneutics is the first book that discusses all the hermeneutical fields of the Qur n It will be published in seven volumes

The Latin Qur'an, 1143-1500 Cándida Ferrero Hernández,John Tolan,2021-10-25 In 1143 Robert of Ketton produced the first Latin translation of the Qur an This translation extant in 24 manuscripts was one of the main ways in which Latin European readers had access to the Muslim holy book Yet it was not the only means of transmission of Quranic stories and concepts to the Latin world there were other medieval translations into Latin of the Qur an and of Christian polemical texts composed in Arabic which transmitted elements of the Qur an often in a polemical mode The essays in this volume examine the range of medieval Latin transmission of the Qur an and reaction to the Qur an by concentrating on the manuscript traditions of medieval Qur an translations and anti Islamic polemics in Latin We see how the Arabic text was transmitted and studied in Medieval Europe We examine the strategies of translators who struggled to find a proper vocabulary and syntax to render Quranic terms into Latin at times showing

miscomprehensions of the text or willful distortions for polemical purposes These translations and interpretations by Latin authors working primarily in twelfth and thirteenth century Spain were the main sources of information about Islam for European scholars until well into the sixteenth century when they were printed reused and commented This volume presents a key assessment of a crucial chapter in European understandings of Islam *Qur'ānic Hermeneutics in the 19th and 20th Century* Georges Tamer, 2023-12-18 The fourth volume of the groundbreaking Handbook of Qur'anic Hermeneutics comprises 29 chapters dealing with the hermeneutical approach to the Qur'an by Muslim authors of the 19th and 20th centuries These authors had to deal with the changes and influences of modernity on Muslim society Scientific progress and related developments in the natural sciences and humanities posed new questions and challenges to the traditional interpretation of the Qur'an The confrontation with the colonial period also shaped the way of thinking of some of these authors and their hermeneutical work This led them to a search for identity and a reassessment of their own traditions and beliefs Authors in this volume reflect on these historical experiences in their interpretation of the Qur'an The hermeneutical approaches to the Qur'an in this volume are thus closely linked to the social political and intellectual conditions in which the authors have done their work They represent a response to the challenges and changes of their time By critically engaging with modernity scientific progress and the colonial legacy these authors contributed to understanding and interpreting Islam in a new context **Evidence and documents: general memoranda and oral evidence** India.
