## **Rabies In The Tropics:**

Rabies in the Tropics E. Kuwert, C. Merieux, H. Koprowski, K. Bögel, 2012-12-06 Rabies as in former times is still today a major killer affecting man and animals especially in many tropical and sub tropical countries of Asia Africa and South America Some 50 000 people and literally millions of animals suffer and die of this disease each year This dramatic death toll and the enormous economic losses which ensue are nowadays un tolerable and no longer justified Worldwide strategy for Rabies control has been established and the World Health Organization recently formulated an elimination programme for dog Rabies Methods for wildlife Rabies control are also under way For the realisation of control campaigns careful epidemiological analysis is necessary This involves antigenical characterisation of Rabies Virus Strains using monoclonal antibodies observation of foci follow up of the front wave of the disease specific ecology of target populations and Rabies carrier species The financial point of view of such campaigns has of course to be ascertained It is for the first time ever that representatives and specialists of different biological disciplines from nearly 70 countries have had the opportunity in Tunis to discuss these important issues and to evaluate on the basis of their own experimental results and personal epidemiological observations the possibility of ultimate elimination of Rabies in tropical and sub tropical countries and also to contribute their share for a better understanding of the natural history of this disease

**Diseases of Cattle in the Tropics** I. Ristic, Ian McIntyre, 2013-11-11 Most of the future increase in livestock production is expected to occur in the tropical and subtropical regions of the world Cattle are the most numerous of the ruminant species in the tropics and provide the largest quantity of animal food products More than one third of the world s cattle are found in the tropics Disease is the major factor which prohibits full utilization of these regions for cattle production Various infectious and transmissible viral rickettsial bacterial and particularly protozoan and helminthic diseases are widespread in the tropics and exert a heavy toll on the existing cattle industry there This uncontrolled disease situation also discourages investment in cattle industries by private and government sectors In Africa alone it is estimated that 125 million head of cattle could be accommodated in the tropical rainbelt if the disease and other animal husbandry factors could be resolved The potential of efficient cattle production under more favorable conditions prompted various international agencies to establish a multi million dollar International Laboratory for Research in Animal Diseases ILRAD in Nairobi Kenya Africa In South America principal sites for raising cattle are shifting to the savannah lands because the more fertile soils are being used for crop production however in the savannahs also disease remains the most powerful deterrent in implementing the cattle industry

**Zoonoses and Communicable Diseases Common to Man and Animals** Pedro N. Acha, Boris Szyfres, 2001 In recent years zoonoses and communicable diseases common to man and animals have gained increasing attention worldwide Human diseases that have their origins in infected animals such as AIDS or Creutzfeldt Jakob have highlighted the need for a better understanding of animal diseases in terms of their epidemiology mechanism of transmission to man diagnosis prevention and control Encroachment into formerly little

known ecological areas has increased exposure to such diseases Also the speed of modern travel facilitates the spread of the diseases once confined to specific geographic areas Animal migration and trade pose a similar threat This new edition provides a detailed overview of the most important zoonotic diseases including its first appearance most important outbreaks latest scientific knowledge and causative agents It includes etiology geographic distribution symptoms and occurrence in man and animals source of infection mode of transmission role of animals in the epidemiology of the disease diagnostic techniques and prevention and control measures name and number according to the International Statistical Classification of Diseases and Related Health Problems ICD 10 It also includes an index covering synonyms and etiologic agents names
