Spear, 2009-06-15 Winner 2009 Kemper and Leila Williams Prize in Louisiana History The Historic New Orleans Collection and the Louisiana Historical Association A microcosm of exaggerated societal extremes poverty and wealth vice and virtue elitism and equality New Orleans is a tangled web of race cultural mores and sexual identities Jennifer M. Spear's examination of the dialectical relationship between politics and social practice unravels the city's construction of race during the eighteenth and early nineteenth centuries Spear brings together archival evidence from three different languages and the most recent and respected scholarship on racial formation and interracial sex to explain why free people of color became a significant population in the early days of New Orleans and to show how authorities attempted to use concepts of race and social hierarchy to impose order on a decidedly disorderly society She recounts and analyzes the major conflicts that influenced New Orleanian culture legal attempts to impose racial barriers and social order political battles over propriety and freedom and cultural clashes over place and progress At each turn Spear's narrative challenges the prevailing academic assumptions and supports her efforts to move exploration of racial formation away from cultural and political discourses and toward social histories Strikingly argued richly researched and methodologically sound this wide ranging look at how choices about sex triumphed over established class systems and artificial racial boundaries supplies a refreshing contribution to the history of early Louisiana *Histories of Race and Racism* Laura Gotkowitz, 2011-11-23 Historians anthropologists and sociologists examine how race and racism have mattered in Andean and Mesoamerican societies from the early colonial era to the present day *Urban Indians in a Silver City* Dana Velasco Murillo, 2016-06-22 In the sixteenth century silver mined by native peoples became New Spain's most important export Silver production served as a catalyst for northern expansion creating mining towns that led to the development of new industries markets population clusters and frontier institutions Within these towns the need for labor raw materials resources and foodstuffs brought together an array of different ethnic and social groups Spaniards Indians Africans and

ethnically mixed individuals or castas On the northern edge of the empire 350 miles from Mexico City sprung up Zacatecas a silver mining town that would grow in prominence to become the Second City of New Spain Urban Indians in a Silver City illuminates the social footprint of colonial Mexico s silver mining district It reveals the men women children and families that shaped indigenous society and shifts the view of indigenous peoples from mere laborers to settlers and vecinos municipal residents Dana Velasco Murillo shows how native peoples exploited the urban milieu to create multiple statuses and identities that allowed them to live in Zacatecas as both Indians and vecinos In reconsidering traditional paradigms about ethnicity and identity among the urban Indian population she raises larger questions about the nature and rate of cultural change in the Mexican north

Patterns of Prejudice

Taxing Blackness Norah L. A. Gharala, 2019-02-19 A definitive analysis of the most successful tribute system in the Americas as applied to Afromexicans During the eighteenth century hundreds of thousands of free descendants of Africans in Mexico faced a highly specific obligation to the Spanish crown a tax based on their genealogy and status This royal tribute symbolized imperial loyalties and social hierarchies As the number of free people of color soared this tax became a reliable source of revenue for the crown as well as a signal that colonial officials and ordinary people referenced to define and debate the nature of blackness

Taxing Blackness Free Afromexican Tribute in Bourbon New Spain examines the experiences of Afromexicans and this tribute to explore the meanings of race political loyalty and legal privileges within the Spanish colonial regime Norah L A Gharala focuses on both the mechanisms officials used to define the status of free people of African descent and the responses of free Afromexicans to these categories and strategies This study spans the eighteenth century and focuses on a single institution to offer readers a closer look at the place of Afromexican individuals in Bourbon New Spain which was the most profitable and populous colony of the Spanish Atlantic As taxable subjects many Afromexicans were deeply connected to the colonial regime and ongoing debates about how taxpayers should be defined whether in terms of reputation or physical appearance Gharala shows the profound ambivalence and often hostility that free people of African descent faced as they navigated a regime that simultaneously labeled them sources of tax revenue and dangerous vagabonds

Some free Afromexicans paid tribute to affirm their belonging and community ties Others contested what they saw as a shameful imposition that could harm their families for generations The microhistory includes numerous anecdotes from specific cases and people bringing their history alive resulting in a wealth of rural and urban gender and family insight

Hacienda and Market in Eighteenth-Century Mexico Eric Van Young, 2006-06-01

This classic history of the Mexican hacienda from the colonial period through the nineteenth century has been reissued in a silver anniversary edition complete with a substantive new introduction and foreword. Eric Van Young explores 150 years of Mexico's economic and rural development, a period when one of history's great empires was trying to extract more resources from its most important colony and when an arguably capitalist economy was both expanding and taking deeper root. The author explains the development of a regional agrarian system centered on the landed estates of late colonial Mexico, the central economic and social institution of an overwhelmingly rural society. With rich empirical detail, he meticulously describes the features of the rural economy, including patterns of land ownership, credit and investment, labor relations, the structure of production, and the relationship of a major colonial city to its surrounding area. The book's most interesting and innovative element is its emphasis on the way the system of rural economy shaped and was shaped by the internal logic of a great spatial system: the region of Guadalajara. Van Young argues that Guadalajara's population growth progressively integrated the large geographical region surrounding the city through the mechanisms of the urban market for grain and meat, which in turn put pressure on local land and labor resources. Eventually, this drove white and Indian landowners into increasingly sharp conflict and led to the progressive proletarianization of the region's peasantry during the last decades of the Spanish colonial era. It is no accident, given this history, that the Guadalajara region was one of the major areas of armed insurrection for most of the decade during Mexico's struggle for independence from Spain. By highlighting the way haciendas worked and changed over time, this indispensable study illuminates Mexico's economic and social history, the movement for independence, and the origins of the Mexican Revolution.
