Black Politics in Transition Candis Watts Smith, Christina Greer, 2018-10-17 Black Politics in Transition considers the impact of three transformative forces immigration suburbanization and gentrification on Black politics today Demographic changes resulting from immigration and ethnic blending are dramatically affecting the character and identity of Black populations throughout the US Black Americans are becoming more ethnically diverse at the same time that they are sharing space with newcomers from near and far In addition the movement of Black populations out of the cities to which they migrated a generation ago a reverse migration to the American South in some cases and in other cases a movement from cities to suburbs shifts the locus of Black politics At the same time middle class and white populations are returning to cities displacing low income Blacks and immigrants alike in a renewal of gentrification All this makes for an important laboratory of discovery among social scientists including the diverse range of authors represented here Drawing on a wide array of disciplinary perspectives and methodological strategies original chapters analyze the geography of opportunity for Black Americans and Black politics in accessible jargon free language Moving beyond the Black white binary this book explores the tri part relationship among Blacks whites and Latinos as well Some of the most important developments in Black politics are happening at state and local levels today and this book captures that for students scholars and citizens engaged in this dynamic milieu

Learning History in America Lloyd S. Kramer, Donald Reid, William L. Barney, 1994-01-01 The essays in this book like all other texts have been written in a historical context that shapes both the themes and the prose styles of the authors A close reading of these texts would in fact lead to many overlapping contexts of politics social hierarchies modern communications and international relations but we want to focus briefly on two contextual influences that carry the most obvious connections to this book the wide ranging public debate about the proper curriculum for American schools and universities and the more specific debate among historians about new trends in historical scholarship

Contours of African American Politics Georgia A. Persons, 2017-07-05 Contours of African American Politics chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyse the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society This two volume set presents a selection of scholarship on African American politics as it appeared in The National Political Science Review from its initial launch in 1989 to the spring of 2009 Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field The volumes are organised around themes that derive from the unfolding real life drama of African American politics and its subsequent scholarly treatment The result is a window into the political efforts that meld the

historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral based mass mobilisation necessary for optimising the impact of the African American vote Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organisation The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics Beyond Red State and Blue State Matthew H. Olson, John Green, 2017-09-19 Beyond Red State and Blue State Electoral Gaps in the 21st Century American Electorate explores the many demographic gaps that exist within the American electorate This book is designed to explore the most important voting gaps in American politics today It shows that twenty first century Americans are divided on a wide range of political fronts that go far beyond the somewhat simplistic red state blue state rubric that has become so popular in American political discourse Reality is far more complex The authors capture and explain this complexity through a collection of chapters by leading scholars of a range of voting gaps including racial ethnic gaps the marriage gap the worship attendance gap the income class gap the rural urban gap the gender gap and the generation gap Also included is a chapter by a leading political pollster and strategist Anna Greenberg on how campaigns use information about voting gaps

Contemporary Patterns Of Politics, Praxis, And Culture Georgia Anne Persons, 2005-01-01 The National Political Science Review is the official publication of the National Conference of Black Political Scientists This new volume Contemporary Patterns of Politics Praxis and Culture reflects major research focuses across religion race gender culture and of course politics Themes that engage a community of scholars also engage them in praxis as individual citizens and practitioners in a democratic society and collectively as member participants in a changing culture Two themes religion and culture are relatively new areas of intellectual curiosity for political scientists Articles in this volume extend the beachheads already established by African American political scientists in studies that gauge the significance and influence of religion in both individual and group behavior They chart religion s inevitable move onto the center stage of U S public affairs The study of culture has essentially languished for almost a generation within political science especially with regard to the study of American politics and society During this time the emphasis has also shifted significantly from an almost exclusive focus on civic culture to an expanding focus on the broad expanse of popular culture in the contemporary period Culture is the crucible within which politics race religion and gender both foment and ferment and artistic products of the culture are manifestations and mirrors of how we envision and construct a changing reality Issues of race religion gender and culture are all dimensions of individual and group identity The dynamics of changing individual and group identities change the underlying cultural canvas against which identity is displayed and politics is acted out The concept of praxis is relatively new to the lexicon of political science However engagement in the practice of politics is not a new idea for African American social scientists Indeed particularly for this group and clearly for many others scholarship influences praxis and praxis influences scholarship This volume will be of particular interest to ethnic studies specialists African American studies

Blacks and the Quest for Economic Equality James W. Button, Barbara A. Rienzo, Sheila L. Croucher, 2015-08-26 The civil rights movement of the 1960s improved the political and legal status of African Americans but the quest for equality in employment and economic well being has lagged behind Blacks are more than twice as likely as whites to be employed in lower paying service jobs or to be unemployed are three times as likely to live in poverty and have a median household income barely half of that for white households What accounts for these disparities and what possibilities are there for overcoming obstacles to black economic progress This book seeks answers to these questions through a combined quantitative and qualitative study of six municipalities in Florida Factors impeding the quest for equality include

employer discrimination inadequate education increasing competition for jobs from white females and Latinos and a lack of transportation job training affordable childcare and other sources of support which makes it difficult for blacks to compete effectively Among factors aiding in the quest is the impact of black political power in enhancing opportunities for African Americans in municipal employment The authors conclude by proposing a variety of ameliorative measures strict enforcement of antidiscrimination laws public policies to provide disadvantaged people with a good education adequate shelter and food and decent jobs and self help efforts by blacks to counter self destructive attitudes and activities

We Have No Leaders Robert C. Smith, 1996-09-26 CHOICE 1997 Outstanding Academic Books This is the first comprehensive study of African American politics from the end of the 1960s civil rights era to the present Not an optimistic book it concludes that the black movement has been almost wholly encapsulated into mainstream institutions co opted and marginalized As a result the author argues African American leadership has become largely irrelevant in the development of organizations strategies and programs that would address the multifaceted problems of race in the post civil rights era Meanwhile the core black community has become increasingly segregated and its society economy culture and institutions of governance and uplift have decayed In exhaustive detail Smith traces this sad state of affairs to certain internal attributes of African American political culture and institutional processes and to the structure of American politics and its economic and cultural underpinnings Sure to be controversial this book challenges both liberal and conservative notions of the black political struggle in the United States It will serve as a major reference for academic study and a point of departure for political activists

Strength in Numbers? Jan E. Leighley, 2001-08-12 America s increasing racial and ethnic diversity is viewed by some as an opportunity to challenge and so reinforce the country s social fabric by others as a portent of alarming disunity While everyone agrees that this diversity is markedly influencing political dynamics not only nationally but often on the state and local levels we know little about how racial and ethnic groups organize and participate in politics or how political elites try to mobilize them This book tells us By integrating class based factors with racial and ethnic factors Jan Leighley shows what motivates African Americans Latinos and Anglos to mobilize and participate in politics Drawing on national survey data and on interviews with party and elected officials in Texas she develops a nuanced understanding of how class race and ethnicity act as individual and contextual influences on elite mobilization and mass participation Leighley examines whether the diverse theoretical approaches generally used to explain

individual participation in politics are supported for the groups under consideration She concludes that the political and social context influences racial and ethnic minorities decisions to participate but that different features of those environments are important for different groups Race and ethnicity structure participation more than previous research suggests Casting new light on an issue at the crux of contemporary American politics Strength in Numbers will be welcomed by scholars and students of political science African American and Latino studies urban politics and social movements
