Taylor, 2002 Examines the environmental experiences of middle working class whites people of color in the U S during the 19th 20th cent Race class gender had profound effects on people s EV experiences consequently their activism While some middle class whites fled the cities their urban ills to focus on outdoor wilderness wildlife issues some stayed in the cities to develop urban parks help improve urban EV conditions The white working class collaborated with white middle class urban EV activists to improve public health worker health safety whereas people of color developed activist agendas that linked racism oppression to worker health safety issues loss or denial of land ownership infringement on human rights Environmental Knowledge, Race, and African American Literature Matthias Klestil, 2023-04-20 This open access book suggests new ways of reading nineteenth century African American literature environmentally Combining insights from ecocriticism African American studies and Foucauldian theory Matthias Klestil examines forms of environmental knowledge in African American writing ranging from antebellum slave narratives and pamphlets to Charlotte Forten s journals Booker T Washington s autobiographies and Charles W Chesnutt s short fiction The volume highlights how literary forms of environmental knowledge in the African American tradition were shaped by the histories of slavery and race mainstream environmental writing traditions and African American forms of expression and intertextuality Turning to the Underground Railroad debates over education and home building and the aesthetics of the pastoral and the georgic Environmental Knowledge Race and African American Literature provides an original perspective on the African American ecoliterary tradition that uncovers new facets of canonical and understudied texts and offers new directions for ecocriticism and African American studies Love Canal Revisited : Race, Class, and Gender in Environmental Activism Elizabeth D. Blum, 2008 Historical snapshots of the Love Canal area Gender at Love Canal Race at Love Canal Class at Love Canal Historical implications of gender race and class at Love Canal *Environmental Sociology* Leslie King, Deborah McCarthy Auriffeille, 2009-03-16 Environmental Sociology intended for use in Environmental Sociology courses uses sociological methods and perspectives to analyze key environmental issues The reader is organized like an introduction to sociology reader and comprised of readings that are accessible to and interesting for undergraduates *American Indian Literature, Environmental Justice, and Ecocriticism* Joni Adamson, 2001 Although much contemporary American Indian literature examines the relationship between humans and the land most Native authors do not set their work in the pristine wilderness celebrated by mainstream nature writers Instead they focus on settings such as reservations open pit mines and contested borderlands Drawing on her own teaching experience among Native Americans and on lessons learned from such recent scenes of confrontation as Chiapas and Black Mesa Joni Adamson explores why what counts as nature is often very different for multicultural writers and activist groups than it is for mainstream environmentalists This powerful book is one of

the first to examine the intersections between literature and the environment from the perspective of the oppressions of race class gender and nature and the first to review American Indian literature from the standpoint of environmental justice and ecocriticism By examining such texts as Sherman Alexie s short stories and Leslie Marmon Silko s novel Almanac of the Dead Adamson contends that these works in addition to being literary are examples of ecological criticism that expand Euro American concepts of nature and place Adamson shows that when we begin exploring the differences that shape diverse cultural and literary representations of nature we discover the challenge they present to mainstream American culture environmentalism and literature By comparing the work of Native authors such as Simon Ortiz with that of environmental writers such as Edward Abbey she reveals opportunities for more multicultural conceptions of nature and the environment More than a work of literary criticism this is a book about the search to find ways to understand our cultural and historical differences and similarities in order to arrive at a better agreement of what the human role in nature is and should be It exposes the blind spots in early ecocriticism and shows the possibilities for building common ground a middle place where writers scholars teachers and environmentalists might come together to work for social and environmental change

Nielsen, 2020-05-05 This volume clearly distinguishes Indigenous environmental justice IEJ from the broader idea of environmental justice EJ while offering detailed examples from recent history of environmental injustices that have occurred in Indian Country With connections to traditional homelands being at the heart of Native identity environmental justice is of heightened importance to Indigenous communities Not only do irresponsible and exploitative environmental policies harm the physical and financial health of Indigenous communities they also cause spiritual harm by destroying land held in a place of exceptional reverence for Indigenous peoples With focused essays on important topics such as the uranium mining on Navajo and Hopi lands the Dakota Access Pipeline dispute on the Standing Rock Indian Reservation environmental cleanup efforts in Alaska and many other pertinent examples this volume offers a timely view of the environmental devastation that occurs in Indian Country It also serves to emphasize the importance of self determination and sovereignty in victories of Indigenous environmental justice The book explores the ongoing effects of colonization and emphasizes Native American tribes as governments rather than ethnic minorities Combining elements of legal issues human rights issues and sovereignty issues Indigenous Environmental Justice creates a clear example of community resilience in the face of corporate greed and state indifference

of which are fervently discussed and debated via websites online forums videos and novels By exploring the worldview of peakists and the unexpected way that the fear of peak oil and climate change transformed many members of this left leaning group into survivalists Schneider Mayerson builds a larger analysis of the rise of libertarianism the role of oil in modern life the political impact of digital technologies the racial and gender dynamics of post apocalyptic fantasies and the social organization of environmental denial

Pests in the City Dawn Day Biehler, 2013-11-01. From tenements to alleyways to latrines, twentieth-century American cities created spaces where pests flourished and people struggled for healthy living conditions. In *Pests in the City*, Dawn Day Biehler argues that the urban ecologies that supported pests were shaped not only by the physical features of cities but also by social inequalities, housing policies, and ideas about domestic space. Community activists and social reformers strived to control pests in cities such as Washington, DC, Chicago, Baltimore, New York, and Milwaukee, but such efforts fell short when authorities blamed families and neighborhood culture for infestations rather than attacking racial segregation or urban disinvestment. Pest control campaigns tended to target public or private spaces, but pests and pesticides moved readily across the porous boundaries between homes and neighborhoods. This story of flies, bedbugs, cockroaches, and rats reveals that such creatures thrived on lax code enforcement and the marginalization of the poor, immigrants, and people of color. As Biehler shows, urban pests have remained a persistent problem at the intersection of public health, politics, and environmental justice, even amid promises of modernity and sustainability in American cities. movement in central Appalachia **Vanishing America** Miles A. Powell, 2016-11-14 Miles Powell explores how early conservationists became convinced that the vitality of America's white races depended on preserving the wilderness. Some conservationists embraced scientific racism, eugenics, and restrictive immigration laws, but these activists also laid the groundwork for the many successes of the modern environmental movement. *American Unexceptionalism* Kathy Knapp, 2014-05 The novels in question all take place in the sprawling terrain that stretches out beyond the Twin Towers, the postwar suburbs that since the end of World War II have served like the Twin Towers themselves as a powerful advertisement of dominance to people around the globe by projecting an image of prosperity and family values. These suburban tales and their everyman protagonists grapple, however indirectly, with the implications of the apparent decline of the economic, geopolitical, and moral authority of the United States. In the context of perceived decay and diminishing influence, these novels actively counteract the narrative of American exceptionalism frequently peddled in the wake of 9/11.
