Race To Fashoda Colonialism And African Resistance:

The Race to Fashoda David L. Lewis, David Levering Lewis, 1988 The fortress of Fashoda is on an obscure junction of the Nile but from 1870 onwards because of its strategic position and the rise of European colonialism it became the subject of conflict between the rival Western powers of Britain France Belgium Germany and Italy The Race to Fashoda David L. Lewis, 1989-01-01 The Race to Fashoda David L. Lewis, 1987 **Muslim Interpreters in Colonial Senegal, 1850-1920** Tamba M'bayo, 2016-07-01 This book investigates the lives and careers of Muslim African interpreters employed by the French colonial administration in Saint Louis Senegal from the 1850s to the early 1920s It focuses on the lower and middle Senegal River valley in northern Senegal where the French concentrated most of their activities in West Africa during the nineteenth century The Muslim interpreters performed multiple roles as mediators military and expeditionary guides emissaries diplomatic hosts and treaty negotiators As cultural and political powerbrokers that straddled the colonial divide they were indispensable for French officials in their relations with African rulers and the local population As such a central concern of this book is the paradoxical and often contradictory roles the interpreters played in mediating between the French and Africans This book argues that the Muslim interpreters exemplified a paradox while serving the French administration they pursued their own interests and defended those of their local communities In doing so the interpreters strove to maintain some degree of autonomy Moreover this book contends that the interpreters occupied a vantage position as mediators to influence the construction of colonial discourse and knowledge because they channeled the flow of information between the French and the African population Thus Muslim interpreters had the capacity to shape power relations between the colonizers and the colonized in Senegal *The Acquisition of Africa (1870-1914)* Mieke van der Linden, 2016-10-05 Over recent decades the responsibility for the past actions of the European colonial powers in relation to their former colonies has been subject to a lively debate In this book the question of the responsibility under international law of former colonial States is addressed Such a legal responsibility would presuppose the violation of the international law that was applicable at the time of colonization In the Scramble for Africa during the Age of New Imperialism 1870 1914 European States and non State actors mainly used cession and protectorate treaties to acquire territorial sovereignty imperium and property rights over land dominium The question is raised whether Europeans did or did not on a systematic scale breach these treaties in the context of the acquisition of territory and the expansion of empire mainly through extending sovereignty rights and subsequently intervening in the internal affairs of African political entities *Encyclopedia of the Age of Imperialism, 1800-1914* Carl C. Hodge, 2007-11-30 In 1800 Europeans governed about one third of the world's land surface by the start of World War I in 1914 Europeans had imposed some form of political or economic ascendancy on over 80 percent of the globe The basic structure of global and European politics in the twentieth century was fashioned in the previous century out of the clash of competing imperial interests and the effects both beneficial and harmful of the imperial powers on the societies they

dominated This encyclopedia offers current detailed information on the major world powers and their global empires as well as on the people events ideas and movements both European and non European that shaped the Age of Imperialism *In Search of Brightest Africa* Jeannette Eileen Jones, 2011-11-01 In the decades between the Berlin Conference that partitioned Africa and the opening of the African Hall at the American Museum of Natural History Americans in several fields and from many backgrounds argued that Africa had something to teach them Jeannette Eileen Jones traces the history of the idea of Africa with an eye to recovering the emergence of a belief in Brightest Africa a tradition that runs through American cultural and intellectual history with equal force to its Dark Continent counterpart Jones skillfully weaves disparate strands of turn of the century society and culture to expose a vivid trend of cultural engagement that involved both critique and activism Filmmakers spoke out against the depiction of savage Africa in the mass media while also initiating a countertradition of ethnographic documentaries Early environmentalists celebrated Africa as a pristine continent while lamenting that its unsullied landscape was vanishing New Negro political thinkers also wanted to save Africa but saw its fragility in terms of imperiled human promise Jones illuminates both the optimism about Africa underlying these concerns and the racist and colonial interests these agents often nevertheless served The book contributes to a growing literature on the ongoing role of global exchange in shaping the African American experience as well as debates about the cultural place of Africa in American thought

China Goes to Sea Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has

turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia *God And The Western World* George Hayes,2019-01-30 This book was inspired by God It brings God s activities on behalf of Earth s citizens from the shadows of history into illumination God s mastery over the universe is brought to life from the Big Bang to modern times A plausible theory is put forth regarding how God has employed His tools only recently discovered but little understood by scientists dark matter and dark energy to create and sustain the universe as we know it God s book this book is a compliment to His Bible from which it differs in that for today s intelligent humans it explains how God advanced creation and evolution After summarizing key portions of the Bible this book focuses sequentially upon God s activities in Roman times the Dark Ages Medieval times Renaissance times Colonial times and the rise of the United States through the big wars up to modern times God led us through every period or we would not have reached these times as we are today God used the West to advance the entire planet as all Earth was afforded the opportunity to know Jesus Christ God s unseen struggles are summarized in the final chapter but there are much more in depth presentations of God s tools dark matter and dark energy containing preliminary information on how to develop necessary communications to initiate their use by mankind to save Earth God sees we are in imminent danger of flooding coastal areas worldwide because of the greenhouse gasses resulting from long over use of fossil fuels and subsequent melting of glaciers and icecaps The author posits that by leading us through the millennia to our current level of understanding and through this very book God has prepared us to partner with Him to save our civilization from devastation

Mistaking Africa Curtis Keim,Carolyn Somerville,2018-04-17 For many Americans the mention of Africa immediately conjures up images of safaris ferocious animals strangely dressed tribesmen and impenetrable jungles Although the occasional newspaper headline mentions authoritarian rule corruption genocide devastating illnesses or civil war in Africa the collective American consciousness still carries strong mental images of Africa that are reflected in advertising movies amusement parks cartoons and many other corners of society Few think to question these perceptions or how they came to be so deeply lodged in American minds *Mistaking Africa* looks at the historical evolution of this mind set and examines the role that popular media plays in its creation The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa Updated throughout the fourth edition covers the entire continent North and sub Saharan Africa and provides new analysis of topics such as social media and the Internet the Ebola crisis celebrity aid and the Arab Spring *Mistaking Africa* is an important book for African studies courses and for anyone interested in unravelling American misperceptions about the continent **The Protection of Human Rights in African Criminal Proceedings** M. Cherif Bassiouni,Ziyad Motala,2023-11-27 This book contains a collection of articles by authors from countries in Africa The topics cover a wide range of issues in the administration of criminal justice and human rights The different scholarly contributions facilitate a better understanding of

certain aspects of the administration of criminal justice in the African sub region and focus on specific human rights issues as they relate to international and African instruments on the protection of human rights

Africans and Britons in the Age of Empires, 1660-1980 Myles Osborne, Susan Kingsley Kent, 2015-03-24 Africans and Britons in the Age of Empires 1660 1980 tells the stories of the intertwined lives of African and British peoples over more than three centuries In seven chapters and an epilogue Myles Osborne and Susan Kingsley Kent explore the characters that comprised the British presence in Africa the slave traders and slaves missionaries and explorers imperialists and miners farmers settlers lawyers chiefs prophets intellectuals politicians and soldiers of all colors The authors show that the oft told narrative of a monolithic imperial power ruling inexorably over passive African victims no longer stands scrutiny rather at every turn Africans and Britons interacted with one another in a complex set of relationships that involved as much cooperation and negotiation as resistance and force whether during the era of the slave trade the world wars or the period of decolonization The British presence provoked a wide range of responses reactions and transformations in various aspects of African life but at the same time the experience of empire in Africa and its ultimate collapse also compelled the British to view themselves and their empire in new ways Written by an Africanist and a historian of imperial Britain and illustrated with maps and photographs Africans and Britons in the Age of Empires 1660 1980 provides a uniquely rich perspective for understanding both African and British history

Conflicts of Colonialism Richard L. Roberts, 2022-02-24 Based around the life of Mademba S ye an African born in the colonial town of Saint Louis du S n gal in 1852 who transformed himself with the help of his French patrons from a telegraph clerk into an African king this book examines Mademba s life and career to reveal how colonialism in French West Africa was articulated differently at different times and how Mademba survived these changes by periodically reinventing himself Investigating Mademba s alleged abuses of power and crimes that pitted French colonial indirect rule policy with its foundations in patronage and loyalty against its stated commitment to the rule of law and the civilizing mission Conflicts of Colonialism sheds light on conflicts between different forms of colonialism and the deep ambiguities of the rule of law in colonial societies which despite serious challenges to Mademba s rule allowed him to remain king until his death in 1918

Historical Dictionary of South Sudan Douglas H. Johnson, Kuyok Abol Kuyok, Nicki Kindersley, 2025-04-15 This is the first ever historical dictionary of South Sudan as an independent nation. It focuses on the events, peoples and cultures of South Sudan that were once treated as marginal to the grand narrative of Sudanese national history but without disentangling South Sudan from wider historical connections across the Nile Valley and Northeast Africa. With an interpretive introduction by the three authors, it offers new perspectives on historical events and personalities, extensive coverage of recent events and current affairs, short biographies of leading social and political figures, an extensive chronology, a comprehensive bibliography and maps based on current research illustrating specific issues confronting the new nation. Building on the classical anthropological and historical studies of South Sudanese peoples as well as new research, especially by South Sudanese authors, it provides a foundation on which to build new research on South Sudan and new perspectives on its shared history with Sudan and the wider region. *Historical Dictionary of South Sudan* contains a chronology, an introduction and an extensive bibliography. The dictionary section has more than 500 cross-referenced entries on important personalities as well as aspects of the country's politics, economy, foreign relations, religion and culture. This book is an excellent resource for students, researchers and anyone wanting to know more about South Sudan.

The Trouble with Empire Antoinette M. Burton, 2015 A short, idea-driven history of resistance to the British empire, written by a senior British historian.

Historical Dictionary of the British Empire Kenneth J. Panton, 2015-05-07 For much of the nineteenth and early twentieth centuries, Britain was the dominant world power, its strength based in large part on its command of an Empire that in the years immediately after World War I encompassed almost one quarter of the earth's land surface and one fifth of its population. Writers boasted that the sun never set on British possessions, which provided raw materials that processed in British factories could be re-exported as manufactured products to expanding colonial markets. The commercial and political might was not based on any grand strategic plan of territorial acquisition; however, the Empire grew piecemeal, shaped by the diplomatic, economic and military circumstances of the times, and its speedy dismemberment in the mid twentieth century was similarly a reaction to the realities of geopolitics in post World War II conditions. Today the Empire has gone, but it has left a legacy that remains of great significance in the modern world. *The Historical Dictionary of the British Empire* covers its history through a chronology, an introductory essay, appendixes and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion and culture. This book is an excellent
