A Breed Apart Mike Helm, 2015-06-23 Mike Helm's entertaining behind-the-scenes study *A Breed Apart* takes the dedicated horse player right to the tracks. Readers will meet Jack Kaenel who booted Aloma's Ruler to victory in the Preakness and Chuck Jenda who trained Brown Bess to an Eclipse Award. These and many other professionals are by your side as races are analyzed, bets placed, and questions answered about everything from claiming races, turf versus dirt, drugs, fixed races, and more. This informed look at the sport of kings offers information unavailable from any other source. **World's Toughest**

Races Ali Clarke, 2015-07-09 What do fierljeppen running 156 miles in the Sahara desert and coal carrying all have in common? They're just some of the wackiest, toughest, and most extreme manpower races and challenges dreamed up by the human race. This fact-packed miscellany is bursting with all the details, statistics, and anecdotes of the world's most unusual competitions ever heard of: bog snorkelling and intense endurance contests. Whether you're an armchair thrill seeker or you're wild enough to have an adventure or two under your belt, this book will entertain and inspire. **Race and New**

Brown Margaret Beale Spencer, Nancy E. Dowd, 2024-05-07 A rallying cry for equitable education informed by a revolutionary re-reading of *Brown v. Board of Education* on the 70th anniversary of the ruling. **The Races of Europe** Richard McMahon, 2016-11-15 This book explores a vital but neglected chapter in the histories of nationalism, racism, and science. It is the first comprehensive study of the transnational scientific community that in the nineteenth and early twentieth centuries attempted to classify Europe's biological races. Anthropological race classifiers produced parallel geographies, histories, and hierarchies of European peoples that were crucial to the creation of national identities and to the overtly political race discourses of eugenics and popular racist ideologues. They lent nationalism the invaluable prestige of natural science and traced the histories, conflicts, and relationships of national races back into prehistory. Racial national character stereotypes meanwhile supported competing political ideologies. The book examines the interplay between class, gender, and national identity narratives and the tensions and interactions between the scientific and political agendas of classifiers. Within the elaborate transnational networks of scientific communities, for example, they had to reconcile competing national narratives. *Transportation and Revolt* Jacob Shell, 2015-07-10 How political regimes have responded when certain

modes of transportation from carrier pigeons to canal boats have been associated with politically subversive activities During World War I German soldiers shot down carrier pigeons for fear the birds were carrying enemy communications In Mexico the United States and other countries mules were used for smuggling and secret travel in mountainous areas in the British Empire in the late nineteenth and early twentieth centuries the British feared that supplies for anti imperialist rebellion were being transported by canal In this book Jacob Shell argues that many political regimes have historically associated certain modes of transportation with revolt or with subversive activities and have responded by acting to destroy or curtail those modes of transportation Constructing a conceptual framework linking physical geography with the politics of mobility Shell presents historical examples of the secret subversive mobilization of people and cargo across watery spaces and harsh terrain carried by watercraft and transport animals including pigeons mules camels elephants and sled dogs Efforts to suppress such clandestine mobilities ranged from the violent the shooting of pigeons to the indirect curtailing financial support certain kinds of social knowledge or schemes for infrastructural development To show how such efforts at immobilization could affect cities and urban transportation Shell looks at the Port of New York in the early twentieth century where potentially transformative plans for inner city freight transportation were rejected likely Shell argues due to fears of anarchist activities The innovative argument advanced by Shell in *Transportation and Revolt* challenges conventional wisdom about the supposed obsolescence of transport methods that have become marginalized in the modern era

literature **Race Defaced** Rodolfo Torres, Christopher Kyriakides, 2012-09-05 From Manifest Destiny to the White Man's Burden Harold Macmillan to Tony Blair and John F Kennedy to Barack Obama the historical development of racial doctrine has been closely connected to the relationship between radical and conservative politics This book compares different forms of racism and anti racism in the United States and Great Britain from the 19th century to today situating the development of racial doctrine within the political movements of the modern capitalist world order In conversation with current debates this work places the treatment of racialized human beings within a wider dynamic of capitalist exploitation It unpacks the influence of anti emancipatory thought on race relations and argues that there is a consensus of thought across the political spectrum underpinned by the contemporary acceptance of the impossibility of human emancipation Ultimately *Race Defaced* is a heretical intervention into questions of race and racism that challenges both conservative and radical orthodoxies

American Pacificism Paul Lyons, 2006-09-27 This powerful critique of American Islander relations draws upon extensive resources including literary works and government documents to explore the ways in which conceptions of Oceania have been entwined in the American imagination *Fishing for Heritage* Jane Nadel-Klein, 2020-05-26 Castles lochs seascapes Coastal Scotland is one of the world's most romanticized tourist destinations yet it is in the midst of severe economic decline The North Atlantic fisheries crisis has hit Scottish communities hard and local fisherfolk are faced with chronic insecurity anxiety over the decline of fishing and doubts about their cultural survival The decline of this traditional industry has been accompanied by growing tourism along Scottish shores Fishing villages are marketed for tourist consumption and culture has become a commodity Drawing upon fieldwork novels folk music and travel literature Nadel Klein explores how these influences have affected locals sense of identity and presence within a modern European nation How is identity linked to power What role do memory and authenticity play in the creation of Scottish heritage How do locals feel about the onslaught of tourists The topical nature of these issues and their relevance to other regions facing similar tensions make this book an important contribution to contemporary anthropology

Official Gazette of the United States Patent and Trademark Office, 2004 *The Political Thought of Anacharsis Cloots* Frank Ejby Poulsen, 2023-11-06 Historians have often either ignored Anacharsis Cloots 1755-1794 or considered him deranged because he claimed to be the orator of the human race and devised a universal republic based on the sovereignty of the human race This book is the first comprehensive study of the entire body of Cloots's written works and political actions By contextualizing them the book not only rehabilitates Cloots as a political thinker worthy of consideration but also argues that his political thought constitutes a specific branch of republicanism in the age of Atlantic revolutions cosmopolitan republicanism The introduction suggests how 18th century French cosmopolitanism was a new philosophical tradition but was composed of several themes which the book then analyses in Cloots's writings The first chapter provides a brief overview of his life The second chapter explains why he called himself orator and wrote pamphlets and why contemporary readers should not discard this as non philosophical Having established

Cloots s writings as constituting a philosophical system the following chapters explores it through the themes laid out in the introduction First the concept of reason and his understanding of science Second the paradigm of natural law and the role of nature in moral and political thought Third the conception of humanity and individuals in nature and society Finally republicanism and its principles The last chapter summarizes the elements of Cloots s cosmopolitan republicanism and opens a research programme to other political thinkers in the age of Atlantic revolutions for historians and political theorists
