What Is Race? Joshua Glasgow, Sally Haslanger, Chike Jeffers, Quayshawn Spencer, 2019-05-15 Across public discourse in the media politics many branches of academic inquiry and ordinary daily interactions we spend a lot time talking about race race relations racial violence discrimination based on race racial integration racial progress It is fair to say that questions about race have vexed our social life But for all we speak about race do we know what race is Is it a social construct or a biological object Is it a bankrupt holdover from a time before sophisticated scientific understanding and genetics or can it still hold up in biological genetic and other types of research Most fundamentally is race real In this book four prominent philosophers and race theorists debate how best to answer these difficult questions applying philosophical tools and the principles of social justice to cutting edge findings from the biological and social sciences Each presents a distinct view of race Sally Haslanger argues that race is a socio political reality Chike Jeffers maintains that race is not only political but also importantly cultural Quayshawn Spencer pursues the idea that race is biologically real And Joshua Glasgow argues that either race is not real or if it is it must be real in a way that is neither social nor biological Each offers an argument for their own view and then replies to the others Woven together the result is a lively debate that opens up numerous ways of understanding race Above all it is call for sophisticated and principled discussion of something that significantly permeates our lives

Race Is about Politics Jean-Frédéric Schaub, 2019-12-31 How the history of racism without visible differences between people challenges our understanding of the history of racial thinking Racial divisions have returned to the forefront of politics in the United States and European societies making it more important than ever to understand race and racism But do we In this original and provocative book acclaimed historian Jean Fr d ric Schaub shows that we don t and that we need to rethink the widespread assumption that racism is essentially a modern form of discrimination based on skin color and other visible differences On the contrary Schaub argues that to understand racism we must look at historical episodes of collective discrimination where there was no visible difference between people Built around notions of identity and otherness race is above all a political tool that must be understood in the context of its historical origins Although scholars agree that races don t exist except as ideological constructions they disagree about when these ideologies emerged Drawing on historical research from the early modern period to today Schaub makes the case that the key turning point in the political history of race in the West occurred not with the Atlantic slave trade and American

slavery as many historians have argued but much earlier in fifteenth century Spain and Portugal with the racialization of Christians of Jewish and Muslim origin These Christians were discriminated against under the new idea that they had negative social and moral traits that were passed from generation to generation through blood semen or milk an idea whose legacy has persisted through the age of empires to today Challenging widespread definitions of race and offering a new chronology of racial thinking Schaub shows why race must always be understood in the context of its political history

'Race Is Everything' David Bindman,2023-06-26 A timely and revealing look at the intertwined histories of science art and racism Race Is Everything explores the spurious but influential ideas of so called racial science in the nineteenth and the first half of the twentieth centuries and how art was affected by it David Bindman looks at race in general but with particular concentration on attitudes toward and representations of people of African and Jewish descent He argues that behind all racial ideas of the period lies the belief that outward appearance and especially skull shape as studied in the pseudoscience of phrenology can be correlated with inner character and intelligence and that these could be used to create a seemingly scientific hierarchy of races The book considers many aspects of these beliefs including the skull as a racial marker ancient Egypt as a precedent for Southern slavery Darwin race and aesthetics the purported Mediterranean race the visual aspects of eugenics and the racial politics of Emil Nolde

How Race Is Made Mark M. Smith,2006-12-08 For at least two centuries argues Mark Smith white southerners used all of their senses not just their eyes to construct racial difference and define race His provocative analysis extending from the colonial period to the mid twentieth century shows how whites of all classes used the artificial binary of black and white to justify slavery and erect the political legal and social structure of segregation Based on painstaking research How Race Is Made is a highly original always frank and often disturbing book After enslaved Africans were initially brought to America the offspring of black and white sexual relationships consensual and forced complicated the purely visual sense of racial typing As mixed race people became more and more common and as antebellum race based slavery and then postbellum racial segregation became central to southern society white southerners asserted that they could rely on their other senses touch smell sound and taste to identify who was white and who was not Sensory racial stereotypes were invented and irrational but at every turn Smith shows these constructions of race immune to logic signified difference and perpetuated inequality Smith argues that the history of southern race relations and the construction of racial difference on which that history is built cannot be understood fully on the basis of sight alone In order to come to terms with the South s past and present Smith says we must explore the sensory dynamics underpinning the deeply emotional construction of race How Race Is Made takes a bold step toward that understanding

What Is Your Race? Kenneth Prewitt, 2016-08-02 A historical overview of the census race question and a bold proposal for eliminating it America is preoccupied with race statistics perhaps more than any other nation Do these statistics illuminate social reality and produce coherent social policy or cloud that reality and confuse social policy Does America still have a color line Who is on which side Does it have a different race line the nativity line separating the native born from the foreign born You might expect to answer these and similar questions with the government's statistical races Not likely observes Kenneth Prewitt who shows why the way we count by race is flawed Prewitt calls for radical change The nation needs to move beyond a race classification whose origins are in discredited eighteenth century race is biology science a classification that once defined Japanese and Chinese as separate races but now combines them as a statistical Asian race One that once tried to divide the white race into good whites and bad whites and that today cannot distinguish descendants of Africans brought in chains four hundred years ago from children of Ethiopian parents who eagerly immigrated twenty years ago Contrary to common sense the classification says there are only two ethnicities in America Hispanics and non Hispanics But if the old classification is cast aside is there something better What Is Your Race clearly lays out the steps that

can take the nation from where it is to where it needs to be It s not an overnight task particularly the explosive step of dropping today s race question from the census but Prewitt argues persuasively that radical change is technically and politically achievable and morally necessary

Why Fascism Is on the Rise in France Ugo Palheta,2025-08-26 Recent polls have indicated for the first time that a far right candidate could win the French presidential election in 2027

Reactionary and racist ideologues increasingly sully the French media Assaults by fascist groups are on the rise as they grow in size and confidence How did this happen in a country once so proud of its revolutionary past Writer and academic Ugo Palheta shows that the fascist threat is rooted in the triple radicalization neoliberal authoritarian and racist of the French ruling class Unable to win majority support for the self interested policies represented by Emmanuel Macron this class has sought support by adopting more radical right wing positions Palheta argues for a renaissance of anti fascism to inspire resistance to the far right and the triple threat encouraging its rise Why Fascism Is on the Rise in France has repositioned the question of fascism to place it at the centre of intellectual debate in France

Quality of Death Rates by Race and Hispanic-origin Harry Michael Rosenberg,1999 This report summarizes current knowledge and research on the quality and reliability of death rates by race and Hispanic origin in official mortality statistics of the United States produced by the National Center for Health Statistics NCHS It provides a quantitative assessment of bias in death rates by race and Hispanic origin and identifies areas for targeted research Death rates are based on information on deaths from death certificates filed in the states and compiled into a national database by NCHS and on population data from the Census Bureau Researchers summarized selected studies of race Hispanic origin misclassification and undercoverage on deaths and population They made estimates on the separate and joint bias on death rates by race and Hispanic origin from the two sources They made simplifying assumptions about the stability of the biases over time and among age groups Original results are presented using an expanded updated database from the National Longitudinal Mortality Study Death rates for all groups show net effects of race misclassification and undercoverage For whites and blacks published death rates are overstated in official publications by 1 0 percent and 5 0 percent respectively resulting mainly from undercounts in the census Death rates for other minority groups are understated as follows American Indians 21 percent Asian or Pacific Islanders 11 percent and Hispanics 2 percent SM

Race and the Politics of the Exception Utz McKnight,2013-07-04 The traditional assumption today about race is that it is not political that it has no political content and is a matter of individual beliefs and attitudes In Race and the Politics of the Exception Utz McKnight argues that race is in fact political and defines how it functions as a politics in the United States McKnight organizes his book into three sections beginning with a theoretical section about racial politics in the United States Using theorists such as Benjamin Agamben and Schmitt McKnight discusses how the idea of racial communities went from being constituted through the idea of racial sovereignty and a politics of the exception that defined blacks as the internal enemy to being constitutionally defined through the institutions of racial equal opportunity In

the second section McKnight further develops his critical race theory by exploring in more detail the social use of race today The election of President Obama has brought the politics of racial equality to a critical point In spite of a very powerful set of political tools to define it as a thing of the past race matters In the final section McKnight engages with important African American fiction from each of the three major periods of racial politics in the US Earlier descriptions of political theory are used throughout these analyses to refine the argument for a new critical politics of race Scholars of political theory identity politics African American studies and American Studies will find this work ground breaking and relevant

A Realist Metaphysics of Race Jeremy Pierce, 2014-12-11 In *A Realist Metaphysics of Race* A Context Sensitive Short Term Retentionist Long Term Revisionist Approach Jeremy Pierce defends a social kind view of racial categories On this view the biological features we use to classify people racially do not make races natural kinds Rather races exist because of contingent social practices single out certain groups of people as races give them social importance and allow us to name them as races Pierce also identifies several kinds of context sensitivity as central to how racial categorization works and argues that we need racial categories to identify problems in how our racial constructions are formed including the harmful effects of racial constructions Hence rather than seeking to eliminate such categories Pierce argues that we should also make efforts to change the conditions that generate their problematic elements with an eye toward retaining only the unproblematic aspects

A Realist Metaphysics of Race contains insights relevant not just to professional philosophers in metaphysics philosophy of race social philosophy philosophy of language and philosophy of science but also to students and scholars working in sociology biology anthropology ethnic studies and political science
