Promising the Earth Robert Lamb, 2012-11-12 This is a tale of our times marking the 25th anniversary

of Friends of the Earth Promising the Earth locates the inside story of pioneering campaigns within a broader canvas No single organization's record can expect to paraphrase the development of environmental consciousness and the growth of grassroots environmental movement but experiences bear intimate witness to a story that is still unfolding Enlivened by arresting illustrations and glimpses of colourful personalities that the issues of the day have brought to the fore Promising the Earth takes stock of changing realities in and attitudes to environmental care over the past quarter century This eventful chronicle acts as a platform from which to survey the future that lies beyond the threshold of the 21st century **Rachel Carson's Silent Spring** Alex MacGillivray, 2004 From the final decades of the eighteenth century to the present day a relatively few social and political documents have been written and circulated then have gone on to change the course of human history The Manifesto Series surveys some of those documents presents an account of each manifesto 1 2s immediate impact then explains how and why its influence spread to a wider audience Brief and concisely written each title in this series makes engrossing reading and provides readers with insights into the dynamics of modern history Each title in this series is enhanced with approximately 70 color illustrations Lengthy excerpts from Rachel Carson 1 2s compelling Silent Spring are presented in this book with extensive commentary and analysis Carson 1 2s book published in the 1960s exposed the hazards inflicted on the earth 1 2s environment by powerful industrial concerns Her book focused especially on the harmful effects of DDT while on a broader level it also questioned the domination of our culture by modern technology Silent Spring thus became a springboard for a multitude of environmental movements and reforms which to the present day influence all of our lives for the better **Rachel Carson** Carol Greene, 1992-03 With easily read short sentences interesting photos and other illustrations the life story of the naturalist who made America conservation conscious is retold **Rachel Carson, Voice for the Earth** Ginger Wadsworth, 1992-01-01 Describes the life and work of the biologist and writer who helped initiate the environmental movement Words on Cassette , 2000 **Earth Day** Jean Griffith, 2019-06-05 Issues They are the conflagrations the bonfires the burning controversies so profound so personal they move people to take action and generate the momentum to change the political system and the course of history Be it the Boston Tea Party of 1773 Jacob Coxey's Army the Bonus Army March of June 1932 the National Moratorium to End the War in Vietnam the Women's March of January 2018 or March for Our Lives to end gun violence in America in March of 2018 all came about because of Americans motivated by issues so much so they took their message of change to the street Driven by issues which galvanized public opinion people protested demonstrating public solidarity for a cause Earth Day America at the Environmental Crossroads is a political history focusing on the issues which generated the first Earth Day in April 1970 It is about the people who brought about this momentous political turning point during a period in American history of unprecedented turmoil and political protest Open its cover and you will learn about the agents of change Some have risen to take their place in the pantheon of environmental history others are all but forgotten in the collective public mind It begins with herbicide contamination and

the Cranberry Scare of November 1959 then explains the use of Agent Orange in Vietnam and its impact on the environmental movement Though the use of two nuclear weapons by the United States military ended World War II in the Pacific the inevitable arms race with the Soviet Union during the Cold War led to the testing of these weapons of mass destruction The second chapter explains how nuclear contaminated fallout became a health threat and a concern for environmentalists and the general public Overpopulation seems to be a nonissue today During the decades prior to Earth Day in 1970 the world s population numbers were a concern of monumental importance This is the focus of chapter three No credible treatment of the twentieth century environmental movement would be complete without addressing the contribution of Rachel Carson and her book *Silent Spring* Unlike pesticides the effects of which oftentimes surface years after exposure deteriorating air quality burned the eyes and made it difficult to breathe Polluted air particularly in the country s urban areas not only left an indelible impression in the minds of environmentalists but it also threatened public health And clean water taken for granted today by most Americans is the subject of chapter six which describes the extent to which the country s waterways were part of a multibillion dollar restoration project on the part of the states mandated by the federal government The seventh chapter is a retelling of the oil spill disaster in Santa Barbara California and the radical fringe of the environmental movement which manifested itself before Earth Day a fitting precursor to the event itself the subject of the final chapter

Rachel Carson Elizabeth Ring,1992 A biography of the biologist focusing on the events that led her to expose pesticide pollution in her book *Silent Spring* and her legacy as a founder of the environmental movement

American Book Publishing Record ,1992 **Biographical Books, 1950-1980** R.R. Bowker Company. Department of Bibliography,1980 **Sea and Earth** Phillip Sterling,1974 A biography of the marine biologist author and conservationist whose book *Silent spring* alerted the public to the possibility of dangerous long range effects of pesticides **BBC Wildlife** ,1998 *Integrating Literature in the Content Areas* Sharon Kane,2017-05-12 This practical accessible resource will help future and practicing teachers integrate literature into their middle school or high school classrooms while also addressing content area standards and improving the literacy skills of their students Two introductory chapters are followed by five chapters that each cover a different genre Chapter 3 Informational Books Chapter 4 Fiction Chapter 5 Biography Autobiography and Memoir Chapter 6 Poetry and Chapter 7 How to and Hands on Books Each genre chapter consists of four parts Part 1 Discusses the genre and how content area teachers can use books within that genre to further content learning and enhance literacy skills Part 2 Offers hands on instructional strategies and activities using literature with activities for use in a variety of disciplines Part 3 Presents individual author studies three or four per chapter with bibliographies and guidelines for using the authors books in content area courses Part 4 Features an annotated bibliography of specially selected children and young adult literature for that genre organized by content area The annotations provide information about the book which can be used to prepare booktalks and teaching ideas for using in a specific content area Altogether

these sections contain more than 600 annotated entries tabbed by subject area including art English language arts languages and culture math and technology music PE health science and social studies history
