Racial Stratification In America:

Problem of the Century Elijah Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and low rates of marriage in black communities as well as the way race affects a person's chances of economic success African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants The final part of the book shows how the color line manifests itself at work and in schools Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world In the schools the book explores how race defines a student's peer group and how peer pressure affects a student's grades *Problem of the Century* draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for *The Philadelphia Negro* The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches *Problem of the Century* blends ethnographies and surveys statistics and content analyses census data and historical records to provide a far reaching examination of racial inequality in all its contemporary manifestations

Racial Stratification in America James A. Geschwender, 1978-01-01 [Problem of the Century](#) Elijah Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and low rates of marriage in black

communities as well as the way race affects a person's chances of economic success African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants The final part of the book shows how the color line manifests itself at work and in schools Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world In the schools the book explores how race defines a student's peer group and how peer pressure affects a student's grades Problem of the Century draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for The Philadelphia Negro The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches Problem of the Century blends ethnographies and surveys statistics and content analyses census data and historical records to provide a far reaching examination of racial inequality in all its contemporary manifestations

Categorically Unequal Douglas S. Massey, 2007-04-02 The United States holds the dubious distinction of having the most unequal income distribution of any advanced industrialized nation While other developed countries face similar challenges from globalization and technological change none rivals America's singularly poor record for equitably distributing the benefits and burdens of recent economic shifts In Categorically Unequal Douglas Massey weaves together history political economy and even neuropsychology to provide a comprehensive explanation of how America's culture and political system perpetuates inequalities between different segments of the population Categorically Unequal is striking both for its theoretical originality and for the breadth of topics it covers Massey argues that social inequalities arise from the universal human tendency to place others into social categories In America ethnic minorities women and the poor have consistently been the targets of stereotyping and as a result they have been exploited and discriminated against throughout the nation's history African Americans continue to face discrimination in markets for jobs housing and credit Meanwhile the militarization of the U S Mexican border has discouraged Mexican migrants from leaving the United States creating a pool of exploitable workers who lack the legal rights of citizens Massey also shows that women's advances in the labor market have been concentrated among the affluent and well educated while low skilled female workers have been relegated to occupations that offer few chances for earnings mobility At the same time as the wages of low income men have fallen more working class women are remaining unmarried and raising children on their own Even as minorities and women continue to face these obstacles the progressive legacy of the New Deal has come under frontal assault The government has passed anti union legislation made taxes more regressive allowed the real value of the federal minimum wage to decline and drastically cut social welfare spending As a result the income gap between the richest and poorest has dramatically widened since 1980 Massey attributes these anti poor policies in part to the increasing segregation of neighborhoods by income which has insulated the affluent from the social consequences of poverty and to the

disenfranchisement of the poor as the population of immigrants prisoners and ex felons swells America's unrivaled disparities are not simply the inevitable result of globalization and technological change As Massey shows privileged groups have systematically exploited and excluded many of their fellow Americans By delving into the root causes of inequality in America Categorical Unequal provides a compelling argument for the creation of a more equitable society A Volume in the Russell Sage Foundation's Centennial Series

Class, Race, and Gender in American Education Lois Weis, 1988-01-01 Most educators might agree that the hidden agendas on class race and gender to a large extent condition and determine the form and the content of schooling But how much of this situation is due to school factors and how much to social background factors is heatedly discussed and debated by scholars working within both the mainstream and critical traditions in the field of education Class Race and Gender in American Education represents a groundbreaking overview of current issues and contemporary approaches involved in the areas of class race and gender in American education In this book the first to combine a consideration of these issues and to investigate the manner in which they connect in the school experience authors consider the particular situations of males and females of divergent racial and class backgrounds from their earliest childhood experiences through the adult university years While providing valuable original in depth ethnographic and statistical analyses the volume also incorporates some of the important current theoretical debates the debate between structuralists and culturalists is highlighted for example

Racial Attitudes and Asian Pacific Americans Karen Kurotsuchi Inkelas, 2006 This study examines the complex sources and implications of the racial attitudes of Asian Pacific American APA college students who as one of the fastest growing demographics in higher education enrollments play an increasingly significant role in campus race relations

Critical Social Theory in the Interests of Black Folks Lucius T. Outlaw, 2005-09-09 Examining the situations of African Americans in the U S A Lucius Outlaw's essays illustrate over twenty years of work dedicated to articulating a critical theory of society that would account for issues and limiting factors affecting African descended peoples in the U S Outlaw envisions a democratic order that is not built upon racist projections of the past but instead seeks a transformative social theory that would help create a truly democratic social order

Race, Money, and the American Welfare State Michael E. Brown, 2018-10-18 The American welfare state is often blamed for exacerbating social problems confronting African Americans while failing to improve their economic lot Michael K Brown contends that our welfare system has in fact denied them the social provision it gives white citizens while stigmatizing them as recipients of government benefits for low income citizens In his provocative history of America's safety net from its origins in the New Deal through much of its dismantling in the 1990s Brown explains how the forces of fiscal conservatism and racism combined to shape a welfare state in which blacks are disproportionately excluded from mainstream programs Brown describes how business and middle class opposition to taxes and spending limited the scope of the Social Security Act and work relief programs of the 1930s and the Great Society in the 1960s These decisions produced a welfare state that relies heavily on

privately provided health and pension programs and cash benefits for the poor In a society characterized by pervasive racial discrimination this outcome Michael Brown makes clear has led to a racially stratified welfare system by denying African Americans work whites limited their access to private benefits as well as to social security and other forms of social insurance making welfare their main occupation In his conclusion Brown addresses the implications of his argument for both conservative and liberal critiques of the Great Society and for policies designed to remedy inner city poverty Critical Social Theory in the Interests of Black Folks Lucius T. Outlaw Jr.,2005-09-15 Examining the situations of African Americans in the U S A Lucius Outlaw s essays illustrate over twenty years of work dedicated to articulating a critical theory of society that would account for issues and limiting factors affecting African descended peoples in the U S Attempting to put politics aside Outlaw writes from a non partisan standpoint in the hopes that the issues he raises in his essays will inspire improvement for the well bring of African Americans and will also strengthen America s democracy Outlaw envisions a democratic order that is not built upon racist projections of the past Instead he seeks in these essays a transformative social theory that would help create a truly democratic social order **Poverty & Race in America** Chester W.

Hartman,2006-01-01 Divided into topical sections this volume considers the issues of race poverty housing education health and democracy Poverty Race in America is especially concerned with the links between and among these areas both for purposes of analysis and policy prescriptions **Killing African Americans** Noel A. Cazenave,2018-05-16 Killing African Americans examines the pervasive disproportionate and persistent police and vigilante killings of African Americans in the United States as a racial control mechanism that sustains the racial control system of systemic racism Noel A Cazenave s well researched and conceptualized historical sociological study is one of the first books to focus exclusively on those killings and to treat them as political violence Few issues have received as much conventional and social media attention in the United States over the past few years or have for decades now sparked so many protests and so often strained race relations to a near breaking point Because of both its timely and its enduring relevance Killing African Americans can reach a large audience composed not only of students and scholars but also of Movement for Black Lives activists politicians public policy analysts concerned police officers and other criminal justice professionals and anyone else eager to better understand this American nightmare and its solutions from a progressive and informed African American perspective **Skin Color,**

Power, and Politics in America Mara Cecilia Ostfeld,Nicole Yadon,2022-04-30 A person s skin color affects their life experiences including income educational attainment health outcomes exposure to discrimination interactions with the criminal justice system and one s sense of ethnoracial group belonging But do these disparate experiences affect the relationship between skin color and political views In Skin Color Power and Politics in America political scientists Mara Ostfeld and Nicole Yadon explore the relationship between skin color and political views in the U S among Latino Black and White Americans They examine how skin color influences an individual s politics and whether a person s political views

influence how they assess their own skin color Ostfeld and Yadon surveyed over 1 300 people about their political views including party affiliation their opinions on welfare and the importance of speaking English in the U S The authors created a matrix grounded in their Roots of Race framework which predicts the relationship between skin color and political attitudes for each ethnoracial group based on the blurriness of the group s boundaries and historical levels of privilege They draw upon three distinct measures of skin color to conceptualize the relationship between skin color and political views Machine Rated Skin Color measured with a light reflectance meter Self Assessed Skin Color using the Yadon Ostfeld Skin Color Scale and Skin Color Discrepancy the difference between one s Machine Rated and Self Assessed Skin Color Ostfeld and Yadon examine patterns that emerge among these measures and their relationships with life experiences and political stances Among Latinos a group with relatively blurry group boundaries and low levels of historical privilege the authors find a robust relationship between political views and Self Assessed Skin Color Latinos who overestimate the lightness of their skin color are more likely to hold conservative views on current racialized political issues such as policing Latinos who overestimate the darkness of their skin color on the other hand are more likely to hold liberal political views As America s major political parties remain divided on issues of race this suggests that for Latinos self reported skin color is used as a means of aligning oneself with valued political coalitions African Americans another group with low levels of historical privilege but with more clearly defined group boundaries demonstrated no significant relationship between skin color and political attitudes Thus the lived experiences associated with being African American appeared to supersede the differences in life experiences due to skin color Whites a group with more historical privilege and increasingly blurry group boundaries showed a clear relationship between machine assessed skin color and attitudes on political issues Those with darker Machine Rated Skin Color are more likely to hold conservative views suggesting that they are responding to the threat of losing their privilege in a multicultural society At a time when the U S is both more diverse and politically divided Skin Color Power and Politics in America is a timely account of the ways in which skin color and politics are intertwined

Life of North American Suburbs Jan Nijman,2020-02-24 This book chronicles and explains the role of suburbs in North American cities since the mid twentieth century Examining fifteen case studies from New York to Vancouver Atlanta to Chicago Montreal to Phoenix The Life of North American Suburbs traces the insightful connection between the evolution of suburbs and the cultural dynamics of modern society Suburbs are uniquely significant spaces their creation and evolution reflect the shifting demographics race relations modes of production cultural fabric and class structures of society at large The case studies investigate the place of suburbs within their wider metropolitan constellations the crucial role they play in the cultural economic political and spatial organization of the city Together the chapters paint a compelling portrait of North

American cities and their dynamic suburban landscapes *Hidden in Blackness* Chrystal A. George and Adaurennaya C. Onyewuenyi Mwangi, 2025 *Hidden in Blackness* analyzes the experiences, perspectives, and development of Black immigrant students while also complicating how race, ethnicity, nativity, and nationality are understood across the P-20 education landscape. The authors unpack how Blackness and anti-Black racism in the United States can foster Black immigrants becoming hidden in Blackness in schools and education research, meaning their Black identity is homogenized into a U.S. construction of Blackness while their ethnicity, nationality, and nativity go unacknowledged or is weaponized to subjugate other people of Color. The book culminates by offering the Black Diasporic Illumination (BDI) framework with recommendations for supporting these students with a positive sense of self and abilities in the face of racial realities. BDI bridges sociocultural ecology, ethnic/racial identity, and socialization; scholarship; asset orientations; and critical constructions of race and racism into a transdisciplinary approach for understanding the experiences of Black immigrants in U.S. education. At a time when the importance of diversity, equity, and inclusion and social justice are being debated, this book strikes at the heart of how these issues are both present and absent in the research narratives related to Black immigrant students. From the Foreword by Janice B. Fournillier, Georgia State University: Essential insights for better seeing and serving the rich diversity of the Black immigrant student population. A groundbreaking contribution. Carola Suárez-Orozco, Harvard Graduate School of Education **America Becoming** National Research Council, Commission on Behavioral and Social Sciences and Education, 2001-02-25 The 20th Century has been marked by enormous change in terms of how we define race. In large part, we have thrown out the antiquated notions of the 1800s, giving way to a more realistic sociocultural view of the world. The United States is perhaps more than any other industrialized country distinguished by the size and diversity of its racial and ethnic minority populations. Current trends promise that these features will endure. Fifty years from now, there will most likely be no single majority group in the United States. How will we fare as a nation when race-based issues such as immigration, job opportunities, and affirmative action are already so contentious today? In *America Becoming*, leading scholars and commentators explore past and current trends among African Americans, Hispanics, Asian Americans, and Native Americans in the context of a white majority. This volume presents the most up-to-date findings and analysis on racial and social dynamics with recommendations for ongoing research. It examines compelling issues in the field of race relations, including: Race and ethnicity in criminal justice; Demographic and social trends for Hispanics, Asian Americans, and Native Americans; Trends in minority-owned businesses; Wealth, welfare, and racial stratification; Residential segregation and the meaning of neighborhood; Disparities in educational test scores among races and ethnicities; Health and development for minority children, adolescents, and adults; Race and ethnicity in the labor market, including the role of minorities in America's military; Immigration and the dynamics of race and ethnicity; The changing meaning of race; Changing racial attitudes. This collection of papers, compiled and edited by distinguished leaders in the behavioral and social sciences, represents the most current literature in the field.

Volume 1 covers demographic trends immigration racial attitudes and the geography of opportunity Volume 2 deals with the criminal justice system the labor market welfare and health trends Both books will be of great interest to educators scholars researchers students social scientists and policymakers

Ethnic Studies Philip Q. Yang, 2000-04-13 Defines the field of ethnic studies and explores its methodologies

Racism without Racists Eduardo Bonilla-Silva, 2006-08-03 The first edition of this best selling book showed that alongside the subtle forms of discrimination typical of the post Civil Rights era new powerful ideology of color blind racism has emerged Bonilla Silva documented how beneath the rhetorical maze of contemporary racial discourse lies a full blown arsenal of arguments phrases and stories that whites use to account for and ultimately justify racial inequities In the new edition Bonilla Silva has added a chapter dealing with the future of racial stratification in America that goes beyond the white black dichotomy He argues that the U S is developing a more complex and apparently plural racial order that will mimic Latin American patterns of racial stratification Another new chapter addresses a variety of questions from readers of the first edition And he has updated the book throughout with new information data and references where appropriate The book ends with a new Postscript What is to be Done For Real As in the highly acclaimed first edition Bonilla Silva continues to challenge color blind thinking
