named that because corona is crown and you can see that has a crown What we know is that some time in December the virus started spreading from animals to humans We knew that that was happening and then we also learned that it was spreading from human to human that's what really got the public health's health communities attention on this And what we now know is that this is spreading from human to human fourth generation which is exactly what it sounds like someone spreads it to someone else they spread it to several more people and so on and so on And that's where the spread and the concern about this becoming more widespread really comes from Now when you look at a pathogen like this take a quick look at this box there's there are two things that matter really how quickly it spreads what I was just talking about and then how deadly it is If it's not that deadly and doesn't spread that much that would put you in the A box The concern is the worst case scenario is that this goes into the D box there highly transmissible and highly lethal as well As far as the containment efforts I mean it's chaos as you've probably seen now in at least in this area around Wuhan Tens of millions of people who are on lockdown meaning they're not allowing vehicles in or vehicles to go out This is a it's a very strong policy it's an aggressive policy it's typically a policy that is done later in stages of an outbreak as opposed to this early And it's unclear whether China's just being very aggressive or whether they are dealing with data that we are not yet familiar with because it is an aggressive policy over there They're also recommending everyone wear masks for example in Wuhan And just a quick tidbit I'll tell you The masks as you might imagine are not going to stop viral particles from getting into your nose and your mouth They can get through the mask or around the mask What they really do more than anything else as I've seen covering these stories is that they prevent you from touching your nose and your mouth which is also one of the most common ways this virus is transmitted CNN CNN SARS SARS A D Global Epidemic WHO Declares Coronavirus a Global Health Emergency as Virus Continues to Spread 1 3 0 The Race for Containment An Overview of Coronavirus and the Measures Taken to Avoid an Epidemic A Regal Split Friction in the Royal Family as Harry and Meghan Announce Plans to Step Back IG Brexit Round Two Britain Leaves the EU But It Is Far from Over 1 31 11 Jeans for All Levi's How Levi's Went from Workmen's Wear to a Cultural Icon Levi's 21 Oscars Highlights 2020 The Glitz and Glamour of the 92nd Academy Awards 92 Speed and Pedigree Checking Out Porsche's Legendary Racing Cars CNN Creepy Crawly Cuisine Could Insects Be the Food of the Future Capital Defense Floods Caused by Sea Level Rise Could Devastate London 30 Towering Vista Exploring the Sights and Sounds of Downtown Dubai CNN Donald Trump Acquitted Storm Ciara Aids Subsonic Flight Record Jeff Bezos Pledges Billions for Climate Change CNN CNN China's New Forbidden City
