## **Reflections Of Eden My Years With The Orangutans Of Borneo:**

**Reflections of Eden** Biruté Marija Filomena Galdikas,1996 Since 1971 Birute Galdikas has lived and worked in the forests of Borneo documenting the lives of the orangutans This text describes her groundbreaking scientific and conservation work that has been recorded in more than a dozen television documentaries **Reflections of Eden** Birute M. F.

Galdikas,2000-05 The riveting story of Birute Galdikas who has spent much of her life studying orangutans In 1971 at age 25 she began living in the remote jungles of Indonesian Borneo where she encountered menacing poachers blood sucking leeches swarms of insects Galdikas embarked on a quest of more than 25 years to become the foremost chronicler or orangutan life Her first task was to forge a bond of trust but her initial forays into their world were thwarted by territorial orangutans Eventually Galdikas became a surrogate member of their community An exotic adventure a history of vital scientific research the memoir of a remarkable woman Reflections of Eden Birute Marija Filomena Galdikas,1996-08-01

*The Mentalities of Gorillas and Orangutans* Sue Taylor Parker,Robert W. Mitchell,H. Lyn Miles,1999-08-26 Research on the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution In contrast less attention has been paid to the abilities of gorillas and orangutans This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees bonobos and humans The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes including performances in the classic domains of tool use and tool making imitation self awareness social communication and symbol use All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove The Madame Curie

Complex Julie Des Jardins,2010-10-06 Why are the fields of science and technology still considered to be predominantly male professions The Madame Curie Complex moves beyond the most common explanations limited access to professional training lack of resources exclusion from social networks of men to give historical context and unexpected revelations about women s contributions to the sciences Exploring the lives of Jane Goodall Rosalind Franklin Rosalyn Yalow Barbara McClintock Rachel Carson and the women of the Manhattan Project Julie Des Jardins considers their personal and professional stories in relation to their male counterparts Albert Einstein Robert Oppenheimer Enrico Fermi to demonstrate how the gendered culture of science molds the methods structure and experience of the work With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have often asked different questions used different methods come up with different explanations for phenomena in the natural world and how they have forever transformed a scientist s role

Storytelling Apes Mary Sanders Pollock,2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the

chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Encyclopedia of Anthropology H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories

**Just Another Ape?** Helene Guldberg, 2013-11-12 Today the belief that human beings are special is distinctly out of fashion Almost every day we are presented with new revelations about how animals are so much more like us than we ever imagined The argument is at its most powerful when it comes to our closest living relatives the great apes This book argues that whatever first impressions might tell us apes are really not just like us Science has provided strong evidence that the boundaries between us and other species are vast Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future in which case we might as well be monkeys

*Art and Adaptability* Gregory F. Tague, 2017-11-13 Art and Adaptability argues for a co evolution of theory of mind and material art culture The book covers relevant areas from great ape intelligence hominin evolution Stone Age tools Paleolithic culture and art forms to neurobiology We use material and art objects whether painting or sculpture to modify our own and other people's thoughts so as to affect behavior We don't just make judgments about mental states we create objects about which we make judgments in which mental states are inherent Moreover we make judgments about these objects to facilitate how we explore the minds and feelings of others The argument is that it's not so much art because of theory of mind but art as theory of mind

**Centralizing Fieldwork** Jeremy MacClancy, Agustín Fuentes, 2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and

primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology *The Environmental Communication Yearbook* Stephen P. Depoe, 2014-04-08 First Published in 2006 For scholars and students in environmental communications journalism rhetoric PR mass communication and other related areas **Delia Akeley and the Monkey** Iain McCalman, 2022-02-01 By telling this story Iain McCalman illuminates much about human animal relations and the tyranny of gender inequality He reinstates a twentieth century story of a dedicated amateur primatologist and her adopted Vervet monkey On an East African hunting expedition in 1909 Delia Akeley a forty year old American woman captured a baby female monkey Delia's loneliness in an isolating patriarchal world and her long frustrated desire to adopt a child had motivated her to nurture the animal She named the monkey JT Jr and decided to study her interactions with humans The unique relationship between Delia and JT unlocked Delia's latent talents of research and observation anticipating both Jane Goodall's chimpanzee writings and Margaret Mead's Samoan ethnographies However Delia's love for JT clashed with her husband Carl's obsession to create a temple of African wildlife dioramas at the Museum of Natural History in New York Nursing Carl's broken body and realising their diverging interests pushed Delia into a breakdown in Uganda which led to a savage divorce in Manhattan and the heartbreaking caging of JT in a Washington zoo Carl's death triggered a long battle between Delia and Carl's widow who succeeded in obliterating most of Delia's achievements In *Delia Akeley and the Monkey* Iain McCalman uses official records and personal documents to build a story of passionate love and hate among women men animals and museums that predates our times but speaks to our present It illuminates much about human animal relations and the tyranny of gender inequality through reinstating an obscured story of a dedicated amateur primatologist **Marriage and Civilization** William Tucker, 2014-02-03 In his stunning new book *Marriage and Civilization* author William Tucker looks at the evidence from biology evolution anthropology history and culture to come to a remarkable conclusion it was the monogamous pairing of male and female unusual among mammals that led to human evolution Moreover it is monogamous marriage that has shaped Western Civilization giving us our sense of justice undergirded Western democracy and is the greatest institution we have for perpetuating human freedom and happiness Yet marriage is now under threat and perhaps not in ways that people suspect We could actually see the de facto abolition of marriage with the state taking many of the responsibilities formerly assumed by the nuclear family Among Tucker's many eye opening

observations How primitive polygamy was a retrogression from the original monogamous structure of the human family Why monogamy was essential to the development of ancient Greek democracy Why it was the Catholic Church not the Bible or Christianity in general that was the great defender of monogamous marriage in Western Civilization Why polygamous societies from primitive farming communities to the Mongols to the Muslim world to the early Mormons are internally violent and have bloody borders Why same sex marriage utterly irrelevant in evolutionary terms is a distraction from the real marriage debate we should be having The prospects for monogamous marriage and the dangers if it collapses Marriage and Civilization might be the most important provocative and talked about book of the year **In Praise of Animals** Edward Searl,2007-01-01

Companionship love labor even survival animals offer all of these and more In Praise of Animals honors the animals in our lives In this unique collection Edward Searl has gathered poems prose blessings chants tributes of all kinds ancient and modern He explores the varied topics of pets wildlife stewardship ecology evolution and the spiritual connection among all creatures In Praise of Animals is the ideal gift for animal lovers of all kinds from those who work with animals to those who are welcoming a new pet or grieving the loss of one to nature lovers in general Perfect for animal blessing ceremonies and other rituals that honor the animal kingdom Inspiring selections culled from a variety of sources ancient and modern This collection features poetry and prose from across the ages and around the world and includes passages from fiction science and children s literature From pets to wildlife an anthology unlike any other Offers selections on mammals insects reptiles amphibians birds work animals and more Edward Searl is a seasoned minister of other successful collected anthologies on such topics as birth marriage and death Inspiring selections culled from a variety of sources ancient and modern This collection features poetry and prose from across the ages and around the world and includes passages from fiction science and children s literature From pets to wildlife an anthology unlike any other Offers selections on mammals insects reptiles amphibians birds work animals and more Edward Searl is a seasoned minister of other successful collected anthologies on such topics as birth marriage and death **Humans and Animals** Julie Urbanik,Connie L.

Johnston,2017-01-26 An engaging and at times sobering look at the coexistence of humans and animals in the 21st century and how their sometimes disparate needs affect environments politics economies and culture worldwide There is an urgent need to understand human animal interactions and relations as we become increasingly aware of our devastating impact on the natural resources needed for the survival of all animal species This timely reference explores such topics as climate change and biodiversity the impact of animal domestication and industrial farming on local and global ecosystems and the impact of human consumption of wild species for food entertainment medicine and social status This volume also explores the role of pets in our lives advocacy movements on behalf of animals and the role of animals in art and media culture Authors Julie Urbanik and Connie L Johnston introduce the concept of animal geography present different aspects of human animal relationships worldwide and highlight the importance of examining these interconnections Alphabetical entries

illustrate key relationships concepts practices and animal species The book concludes with a comprehensive appendix of select excerpts from key primary source documents relating to animals and a glossary

**Rousseau's Rejuvenation of Political Philosophy** Nelson Lund, 2016-09-17 This book reads Jean Jacques Rousseau with a view toward deepening our understanding of many political issues alive today including the place of women in society the viability of traditional family structures the role of religion and religious freedom in nations that are becoming ever more secular and the proper conduct of American constitutional government Rousseau has been among the most influential modern philosophers and among the most misunderstood The first great philosophic critic of the Enlightenment he sought to revive political philosophy as it was practiced by Plato and to make it useful in the modern world His understanding of politics rests on deep and often prescient reflections about the nature of the human soul and the relationship between our animal origins and the achievements of civilization This book demonstrates that the implications Rousseau drew from those reflections continue to deserve serious attention

*Humans and Other Animals* Prof. Samantha Hurn, 2012-04-20 What are our attitudes towards other animals and how does this affect our humanity This work of anthrozoology explores the myriad and evolving ways in which humans and animals interact the divergent cultural constructions of humanity and animality found around the world and individual experiences of other animals This book looks at case studies covering blood sports such as hunting fishing and bull fighting pet keeping and petism eco tourism and wildlife conservation working animals and animals as food It addresses the idea of animal exploitation raised by the animal rights movements as well as the anthropological implications of changing attitudes towards animal personhood and the rise of a posthumanist philosophy in the social sciences more generally

Through the Lens of Anthropology Robert J. Muckle, Laura Tubelle de González, 2018-11-23 Through the Lens of Anthropology is a concise introduction to anthropology that uses the twin themes of food and sustainability to illustrate the connected nature of the discipline's many subfields Beautifully illustrated throughout with over 150 full color images figures feature boxes and maps this is an anthropology book with a fresh perspective a lively narrative and plenty of popular topics The new edition enhances the food and sustainability focus and builds a stronger narrative voice with extended examples and case studies An entirely new section on decolonization more Indigenous content and updated material on biological anthropology make the second edition even more relevant for those interested in learning more about the discipline of anthropology

Primate Behavioral Ecology Karen B. Strier, 2021-07-29 This comprehensive introductory text integrates evolutionary ecological and demographic perspectives with new results from field studies and contemporary noninvasive molecular and hormonal techniques to understand how different primates behave and the significance of these insights for primate conservation Each chapter is organized around the major research themes in the field with Strier emphasizing the interplay between theory observations and conservation issues Examples are drawn from the classic primate field studies as well as more recent studies including many previously neglected species to illustrate the vast behavioral variation that exists across the primate

order Primate Behavioral Ecology 6th Edition integrates the impacts of anthropogenic activities on primate populations including zoonotic disease and climate change and considers the importance of behavioral flexibility for primate conservation This fully updated new edition brings exciting new methods theoretical perspectives and discoveries together to provide an incomparable overview of the field of primate behavioral ecology and its applications to primate conservation It is considered to be a must read for all students interested in primates      **Eating Apes** Dale Peterson, 2003-05 Eating Apes is an eloquent book about a disturbing secret the looming extinction of the African great apes In bringing the facts of this crisis into a single accessible book Peterson takes readers one step closer to averting one of the most disturbing threats to our closest relatives 16 photos Maps
