New Deal Medicine The Rural Health Programs Of The Farm Security Administration:

New Deal Medicine Michael R. Grey, 2002-05-24 In New Deal Medicine physician and historian Michael Grey brings to light the diversity reach and complexity of the medical care programs of the Farm Security Administration Drawing on oral histories archival records and medical journals from the 1930s and 1940s Grey finds the programs were both a rehearsal for more modern forms of medical organization and a lightning rod for critics of socialized medicine He assesses the compromises made to try to preserve the programs somewhat secret objective of providing the poor with health care while not running afoul of conservative politicians and their colleagues in the AMA Acknowledging the effect of changing demographics doctors nurses and farmers alike marched off to war and economics Grey contends that these factors do not fully explain the demise of the FSA experiment in health care Rather the political winds shifted at the same time that the medical profession acted to protect its authority over the practice of medicine New Deal Medicine shows that by the peculiarly American style of incrementalism many of the FSA medical care structures and goals have been at least partially realized in the United States and in Canada The lessons learned by the FSA personnel were transferred into health programs in Canada in the labor unions and finally in Lyndon Johnson s Great Society [The Farm Security Administration and Rural Rehabilitation in the South](#) Charles Kenneth Roberts, 2024-01-12 This book fills an important void in the historical literature on New Deal reform and significantly updates Sidney Baldwin s 1968 book on the FSA Through the lens of the programs of the FSA Charles Kenneth Roberts does an excellent job of relating how New Deal programs attempted to rehabilitate poor rural southerners Aaron D Purcell author of Arthur Morgan A Progressive Vision for American Reform As the roaring twenties turned into the depressed thirties southern farmers far removed from the urban prosperity Americans had enjoyed during the 1920s heyday found already difficult farming conditions greatly intensified by the onset of the Great Depression Agricultural incompetence plagued the rural South through the misuse of land depletion of natural resources and a system of single crop farming that failed to adequately provide for growing families on small farms especially in the cotton producing Southeast Poverty and desperation came to define the farming communities of the rural South both in reality and in Americans collective conscious In [The Farm Security Administration and Rural Rehabilitation in the South](#) Charles Kenneth Roberts traces the administrative and political history of the Farm Security Administration FSA and reconciles the administration s goals with Franklin D Roosevelt s overall vision for the New Deal Roberts takes a grassroots approach to dissecting the FSA s history While other studies have focused on FSA photography or community building or even policy making in terms of top down government directives Roberts focuses on the people and state governments who faced an immediate need to aid southern farmers within their own borders and to boost their states crumbling agricultural economic bases Roberts focuses on rural rehabilitation as a key aspect of the FSA and defines the agency s legacy not in terms of its failures but rather in terms of an idealistic program whose modest successes were ultimately too few to effect real change for

southern farmers Though Roosevelt failed to adequately recognize the plight of the southern farmer and political infighting hindered many of the administration's goals the creation of the FSA stands as one of the first efforts to provide sustained relief to struggling southern farmers In light of other federal programs of the era the FSA may seem like a mere footnote to the New Deal outside of its small but revered photography program But as Roberts shows the FSA's legacy has endured to the present day Charles Kenneth Roberts is a lecturer in history at Georgia Perimeter College His articles have appeared in the *Alabama Review* *Southern Historian* and *Agricultural History* *The New Deal and Beyond* Elna C. Green, 2003 This collection of ten original studies covers a wide range of issues related to the regional distinctiveness of welfare provision in the South and the development of the larger federal welfare state The studies examine New Deal and Great Society programs from the Works Progress Administration and Civilian Conservation Corps to Social Security and Medicare In addition they draw attention to such private sector organizations as the Salvation Army and the National Association for the Advancement of Colored People Some essays look at the degree of federal responsiveness to or actual engagement with recipients of assistance One such study examines the dynamics between the New Deal bureaucracy poor women who worked in WPA organized sewing rooms in Atlanta and local political activists concerned about the women's working conditions The power of race and racism to shape the delivery of social services in the region as well as the strong connections between social welfare and civil rights is a concern common to many studies One study shows how linking the availability of federal Medicare funds to racial equality helped end segregation in southern hospitals Others focus on topics ranging from the pioneering North Carolina Fund a state program that shaped Great Society initiatives to the public health nurses and home economists of the Farm Security Administration to Georgia governor Eugene Talmadge's maneuverings against the Federal Emergency Relief Administration *The New Deal and Beyond* is filled with many new insights into initiating and maintaining social programs in the South a region whose welfare history is key to understanding the larger story of the American welfare state **Health Security for All** Alan Derickson, 2005-02-09 This provocative work explores the invention and reinvention of a fundamental goal of American social policy universal health care In *Health Security for All* Alan Derickson examines the emergence of diverse proposals for all encompassing health reform since the early twentieth century This study discovers not only a number of imaginative arguments for extending health services but also an unexpectedly wide array of passionate advocates for universalism An innovative approach to one of the great unresolved social and political problems of our time *Health Security for All* will be of interest to social scientists health policy scholars historians and idealists across the political spectrum *Birthing the West* Jennifer J. Hill, 2022-03 Reading the West Longlist for Nonfiction Childbirth defines families communities and nations In *Birthing the West* Jennifer J Hill fills the silences around historical reproduction with copious new evidence and an enticing narrative describing a process of settlement in the American West that depended on the nurturing connections of reproductive caregivers and the authority of mothers over birth Economic and cultural development

depended on childbirth Hill's expanded vision suggests that the mantra of cattle drives and military campaigns leaves out essential events and falls far short of an accurate representation of American expansion. The picture that emerges in *Birthing the West* presents a more complete understanding of the American West no less moving or engaging than the typical stories of extraction and exploration but concurrently intriguing and complex. *Birthing the West* unearths the woman-centric practice of childbirth across Montana, the Dakotas, and Wyoming, a region known as a death zone for pregnant women and their infants. As public health entities struggled to establish authority over its isolated inhabitants, they collaborated with physicians, eroding the power and control of mothers and midwives. The transition from home to hospital and from midwife to doctor created a dramatic shift in the intimately personal act of birth.

The Body at Risk Carol Squiers, 2005. *The Body at Risk: Photography of Disorder, Illness, and Healing* is the first book to explore the ways that photojournalists and social documentarians have conceptualized the human subject as a site of both good and ill health. The volume looks at photographs depicting child laborers, Depression-era health programs, general medical care in the southern United States at mid-century, people with HIV/AIDS and polio along with their caretakers, and the health workers who advocate for them, environmental pollution, physical and psychological injuries received during warfare, domestic violence, and emergency care in the modern urban hospital. It brings together ten significant bodies of photographs made over the past one hundred years to show how human health topics have been represented for the general public and how the emphasis on health has shifted, how photography has been used to present and promote certain points of view about health and the social circumstances that affect it both positively and negatively, and how photography has helped shape public knowledge of and opinion about health care and some of the events and circumstances that engender it.

New Deal Art in Arizona Betsy Fahlman, 2016-05-26. Arizona's art history is emblematic of the story of the modern West, and few periods in that history were more significant than the era of the New Deal. From Dorothea Lange and Ansel Adams to painters and muralists including Native American Gerald Nailor, the artists working in Arizona under New Deal programs were a notable group whose art served a distinctly public purpose. Their photography, paintings, and sculptures remain significant exemplars of federal art patronage and offer telling lessons positioned at the intersection of community history and culture. Art is a powerful instrument of historical record and cultural construction, and many of the issues captured by the Farm Security Administration photographers remain significant issues today: migratory labor, the economic volatility of the mining industry, tourism, and water usage. Art tells important stories too, including the work of Japanese American photographer Toyo Miyatake in Arizona's internment camps, murals by Native American artist Gerald Nailor for the Navajo Nation Council Chamber in Window Rock, and African American themes at Fort Huachuca. Illustrated with 100 black and white photographs and covering a wide range of both media and themes, this fascinating and accessible volume reclaims a richly textured story of Arizona history with potent lessons for today.

Organization, and the Cold War John Farley,2009-01-01 This is the story of a man and an institution Brock Chisholm was one of the most influential Canadians of the twentieth century A world renowned psychiatrist he was the first director general of the World Health Organization and built it up against overwhelming political odds in the years immediately following the Second World War During Chisholm s lifetime the only other Canadians as internationally prominent were Lester B Pearson and Marshall McLuhan Yet today he has been largely forgotten perhaps because he was so controversial An atheist and a fierce critic of jingoistic nationalism he supported world peace and world government and became a champion of the United Nations and the WHO Official histories of the WHO place the organization in a political vacuum but John Farley focuses on the battles Chisholm and his allies waged during the early Cold War as the United States and the Soviet Union eyed each other warily and the Roman Catholic Church flexed its muscle on morally sensitive medical issues Post 1945 international politics global health issues and medical history intersect in this highly readable account of a remarkable Canadian *For All These Rights* Jennifer Klein,2010-01-02 The New Deal placed security at the center of American political and economic life by establishing an explicit partnership between the state economy and citizens In America unlike anywhere else in the world most people depend overwhelmingly on private health insurance and employee benefits The astounding rise of this phenomenon from before World War II however has been largely overlooked In this powerful history of the American reliance on employment based benefits Jennifer Klein examines the interwoven politics of social provision and labor relations from the 1910s to the 1960s Through a narrative that connects the commercial life insurance industry the politics of Social Security organized labor s quest for economic security and the evolution of modern health insurance she shows how the firm centered welfare system emerged Moreover the imperatives of industrial relations Klein argues shaped public and private social security Looking closely at unions and communities Klein uncovers the wide range of alternative community based health plans that had begun to germinate in the 1930s and 1940s but that eventually succumbed to commercial health insurance and pensions She also illuminates the contests to define security job security health security and old age security following World War II *For All These Rights* traces the fate of the New Deal emphasis on social entitlement as the private sector competed with and emulated Roosevelt s Social Security program Through the story of struggles over health security and old age security social rights and the welfare state it traces the fate of New Deal liberalism as a set of ideas about the state security and labor rights in the 1950s the 1960s and beyond **Market Structure of the Health Insurance**

Diabetes Arleen Marcia Tuchman,2020-08-05 Who gets diabetes and why An in depth examination of diabetes in the context of race public health class and heredity Who is considered most at risk for diabetes and why In this thorough engaging book historian Arleen Tuchman examines and critiques how these questions have been answered by both the public and medical communities for over a century in the United States Beginning in the late nineteenth century Tuchman describes how at different times Jews middle class whites American Indians African Americans and Hispanic Americans have been labeled most at risk for developing diabetes and that such claims have reflected and perpetuated troubling assumptions about race ethnicity and class She describes how diabetes underwent a mid century transformation in the public s eye from being a disease of wealth and civilization to one of poverty and primitive populations In tracing this cultural history Tuchman argues that shifting understandings of diabetes reveal just as much about scientific and medical beliefs as they do about the cultural racial and economic milieus of their time **A History of Global Health** Randall M. Tommy Douglas and the Quest for Medicare in Canada Gregory Marchildon, 2024-11-30 How and why was universal health coverage implemented so early in a poverty stricken province in Canada Why was its design so faithfully replicated in the national standards that ultimately shaped Medicare across the rest of Canada Seeking to answer these questions Tommy Douglas and the Quest for Medicare in Canada explores the history of universal health care through the life of Canadian politician Tommy Douglas identifying the pivotal moments and decisions that led to the establishment of Medicare in Canada The book traces the origins of Medicare back to the 1930s Depression and its devastating impact on the Prairie populations Marchildon examines how Tommy Douglas and a new generation of reformers radicalized by the Depression prioritized socialized health care The book reveals how as the provincial party leader Douglas leveraged support from both local and

external allies to rapidly implement universal hospital insurance and lay the groundwork for a new health system Despite strong opposition from physician and business lobbies Douglas continued to pressure the government for federal cost sharing of universal health coverage Drawing on archival sources including speeches television broadcasts and cabinet documents Tommy Douglas and the Quest for Medicare in Canada illuminates how Douglas's vision leadership and coalition building among unions were crucial to the successful establishment of Medicare in Canada

The Health Care Safety Net in a Post-Reform World Sara Rosenbaum, Mark A. Hall, 2012-08-03 The Health Care Safety Net in a Post Reform World examines how national health care reform will impact safety net programs that serve low income and uninsured patients The safety net refers to the collection of hospitals clinics and doctors who treat disadvantaged people including those without insurance regardless of their ability to pay Despite comprehensive national health care reform over twenty million people will remain uninsured And many of those who obtain insurance from reform will continue to face shortages of providers in their communities willing or able to serve them As the demand for care grows with expanded insurance so will the pressure on an overstretched safety net This book with contributions from leading health care scholars is the first comprehensive assessment of the safety net in over a decade Rather than view health insurance and the health care safety net as alternatives to each other it examines their potential to be complementary aspects of a broader effort to achieve equity and quality in health care access It also considers whether the safety net can be improved and strengthened to a level that can provide truly universal access both through expanded insurance and the creation of a well integrated and reasonably supported network of direct health care access for the uninsured Seeing safety net institutions as key components of post health care reform in the United States as opposed to stop gap measures or as part of the problem is a bold idea And as presented in this volume it is an idea whose time has come
