The Contextual Challenges of Occupational Sex Segregation Stephanie Steinmetz, 2011-12-15 This study untangles the complex interplay of individual and contextual factors shaping cross national differences in horizontal and vertical occupational sex segregation It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society Following this approach Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross national differences in occupational sex segregation She offers insights into the positioning of 21 EU Members States particularly of former CCE countries Based on advanced multi level models the study shows that institutional factors such as the organization of educational systems post industrial developments social policies and the national gender culture play a crucial role in shaping sex segregation processes apart from individual factors The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions some reduce horizontal segregation while at the same time aggravating the vertical aspect Finally the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market

Demographic Research, Volume 17: Book I Demographic Research, 2008 **Interpersonal Relations Across the Life Course** Timothy J Owens, J. Jill Suitor, 2007-09-05 This volume number 12 is subtitled Interpersonal Relations across the Life Course It is inspired by the increased awareness in recent years of the way in which structural and psychosocial dimensions of the life course shape interpersonal relations Interest in this issue has included both the maintenance of long term relationships that may span many phases of the life course and the development of relationships that are specific to

particular phases The volume is a combination of invited and author initiated papers all anonymously peer reviewed that seeks to present a cohesive source of information on the multiform nature and influences of interpersonal relations from a variety of perspectives theoretical frames and substantive areas Contributions reflect Macro micro linkages and interpersonal relations i e age structures social institutions and race ethnicity Parenting across the life course Parent adult child relations and transitions Transitions in non kin relationships Social relationships and well being The European Second Generation Compared Maurice Crul, Jens Schneider, Frans Lelie, 2012-08-01 Based on data collected by the TIES survey in 15 cities across 8 European countries looks at the place and position of the children of immigrants from Turkey Morocco and the former Yugoslavia **Population and Society** Gregg Lee Carter, 2016-04-29 This exciting new book presents the field of social demography animating the study of population with a vibrant sociological imagination Gregg Lee Carter provides multiple demonstrations of how taking a demographic perspective can give us a better understanding of social phenomena once thought to be largely the products of culture politics or the economy Five key chapters concentrate on 1 the social and individual determinants of fertility mortality and migration 2 the social and individual impacts of changing levels of fertility mortality and migration and 3 the impacts of overpopulation on the environment and how changes in the environment in turn impact the human condition especially regarding migration What gives these analyses coherence is how each emphasizes the ways in which demographic forces both reflect and limit individual choices Written in a straightforward and engaging style and without getting bogged down in academic debates this concise book is the ideal introduction and primer for courses in social demography and population and society *What Democracy Is For* Stein Ringen, 2009-03-09 In this provocative book Stein Ringen argues that the world's democracies are failing to live up to their ideals the United States and Great Britain most especially The core value of democracy he contends is freedom the freedom to live a good life according to one's own choosing Yet he shows that democracy's freedom is on the decline Citizens are increasingly distrustful of political systems weighted by money and they don't participate in political affairs as they once did Ringen warns of the risks we face if this trend continues and puts forth an ambitious proposal for democratic reforms The issues that concern him are ones that should concern us all They include education poverty the social and economic roles of families the lack of democracy in our economic lives and the need to rejuvenate municipal democracy Along the way Ringen proposes policy solutions aimed at restoring democracy such as universal vouchers for education substituting the principle of individual insurance for social welfare pensions and rethinking how we measure poverty in rich and poor countries He calls for the revival of local democracy a democratically grounded global economy and the protection of political democracy from the transgressions of economic power The way to protect democracy is not to cheer it but to reform it *What Democracy Is For* offers a bold defense of democratic ideals grounded in real reforms **Families in Converging Europe** E. Oinonen, 2008-04-30 This book examines common familial trends and differences throughout Europe from the 1960s onwards

and discusses the most common theoretical explanations for convergence and divergence Eriikka Oinonen reveals how structural factors such as the labour market the welfare state and the EU affect Europeans family related choices Social Structures K. ensemble of soft instruments in this policy realm in the 2000s unveiled an original pattern of EU policy formation Can there be Europeanization without an EU competence That is the question this original piece of research tackles It shows how the way in which the policy emerged at EU level affected policy outputs adopted thereafter throughout the policy cycle Mixing qualitative and quantitative methods it explains the development of the EU integration policy and examines its main policy device the European Integration Fund from negotiation to implementation

Integration Processes and Policies in Europe Blanca Garcés-Mascareñas,Rinus Penninx,2015-10-26 In this open access book experts on integration processes integration policies transnationalism and the migration and development framework provide an academic assessment of the 2011 European Agenda for the Integration of Third Country Nationals which calls for integration policies in the EU to involve not only immigrants and their society of settlement but also actors in their country of origin Moreover a heuristic model is developed for the non normative analytical study of integration processes and policies based on conceptual demographic and historical accounts The volume addresses three interconnected issues What does research have to say on the study of integration processes in general and on the relevance of actors in origin countries in particular What is the state of the art of the study of integration policies in Europe and the use of the concept of integration in policy formulation and practice Does

the proposal to include actors in origin countries as important players in integration policies find legitimation in empirical research A few general conclusions are drawn First integration policies have developed at many levels of government nationally locally regionally and at the supra national level of the EU Second a multitude of stakeholders has become involved in integration as policy designers and implementers Finally a logic of policymaking and not an evidence based scientific argument can be said to underlie the European Commission s redefinition of integration as a three way process This book will appeal to academics and policymakers at international European national regional and local levels It will also be of interest to graduate and master level students of political science sociology social anthropology international relations criminology geography and history
