present an unprecedented challenge to Christians to articulate a biblical theological framework to navigate times of rapid change The work of the French theologian Jacques Ellul is a theological time bomb primed for times like these Accounts of Ellul s career often divide off his sociology and theology but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God tackling the phenomenon he named technique the pursuit of maximal power and efficiency implicit in the technological enterprise with a profound depth of biblical and ethical insight Centering himself on the apocalypse or revelation of Jesus Christ in history Ellul offers a monumental timely though far from flawless contribution to contemporary ethical debates about the uses and abuses of technologies His work blazes a trail that Christians and all concerned for the future would do well to follow as we avoid both the naivety of technological neutrality and the dread of technological determinism
