Databases and Information Systems V Hele-Mai Haav, Ahto Kalja, 2009 The Eighth International Baltic Conference on Databases and Information Systems took place on June 2-5 2008 in Tallinn Estonia This conference is continuing a series of successful bi annual Baltic conferences on databases and information systems IS The aim is to provide a wide international forum for academics and practitioners in the field of databases and modern information systems for exchanging their achievements in this area The original research results presented in Databases and Information Systems V mostly belong to novel fields of IS and database research such as database technology and the semantic web ontology based IS IS and AI technologies and IS integration The contribution of Dr Jari Palomäki showed how different ontological commitments affect the way we are modeling the world when creating an information system As semantic technologies have been gaining more attention recently a special session on semantic interoperability of IS was organized The invited talks from each Baltic State gave a good insight how semantic interoperability initiatives are developing in each of the Baltic States and how they relate to the European semantic interoperability framework

New Dimensions of Deep Analysis Jan Ehrenwald, 2025-01-06 Originally published in 1954 *New Dimensions of Deep Analysis* was a systematic attempt at integrating facts which were once misrepresented as occult into the framework of modern dynamic psychiatry Defining the concepts and criteria of so called telepathic or psi phenomena Dr Ehrenwald bases his discussion on a detailed analysis of a series of telepathic dreams observed in the psychoanalytic situation These observations indicated that telepathy between analyst and patient between mother and child and in interpersonal relationships in general was far more frequent and of much greater significance than was generally allowed for Indeed its very occurrence described by the author as telepathic leakage called for a revision and restatement of some of the classical propositions of psychoanalytic theory and practice similar to that which had become necessary in the field of modern theoretical physics nearly half a century before He redefines personality as an open versus a closed system made up of a three fold stratification of ego id and psi levels In his outline of what he describes as three level therapy he tries to apply these concepts to the doctor patient relationship and to come to grips with the magic element involved in the therapeutic process in accordance with established psychodynamic principles Today it can be read in its historical context

[The Great Transition](#) Ann Frazier West Ed.D., 2014-01-31

Have you ever wondered if it is possible to stay in touch with your loved ones and share their journey in the afterlife? What happens after death is far too important for us to rely on hand-me-down teachings. We need the authority of first-hand experience. This is what Ann West provides in her moving narrative of her remarkable attempt to continue her friendship with three extraordinary women for many years after their deaths. As we join her on her excursions, we learn about lifestyle and real estate options on the Other Side, the anatomy of subtle bodies, and how the law of attraction applies in all realities. She describes her personal journey, including her discovery of the consequences of bleedthroughs from past or parallel lives, with candor and humility. She draws on the theory and practice of esoteric orders but comes to understand that the heart of the matter is very simple: we can dream with the deceased, and in dreaming, we travel to the realms where they are at home. The Great Transition confirms that there is life beyond life, and that learning and creative evolution never cease. ROBERT MOSS, author of *Conscious Dreaming*, *Dreamgates*, and *The Boy Who Died and Came Back*. This book will take you on a very unusual journey with warmth, wit, and wonder. Dr. West describes in vivid detail life in the next world as revealed in her own dreams and intriguing visions. Anyone seeking to gain a synthesis of the after-death experience will find value, insight, and I dare say, inspiration in this deeply researched and intriguingly written text. REVEREND LEROY E. ZEMKE, author of *Thoughts for Transformation*. Inspired by three remarkable women in her life, Ann invites you to embark upon an incredible journey with her to continue relationships with loved ones as they make the great transition to the Other Side of life. Ann shares her personal experiences of contact with other dimensions, the afterlife, to help you discover new and less painful ways to approach the loss of loved ones in your life. It is comforting to know that the connection is still there and that our goodbyes do not have to be permanent. Because of an increase in reports of the phenomenon of near-death experiences (NDEs), great interest in the evidence of an afterlife has arisen, igniting a growing trend of research on the topic. In this book, Ann captivantly reveals past research as well as current scientific research about our contact with the afterlife dimensions.

Handbook of Research Methods in Health Psychology Deborah Ragin, Julian Keenan, 2020-11-29. In this comprehensive handbook, Ragin and Keenan present an all-encompassing analysis of the variety of different methods used in health psychology research. Featuring interdisciplinary collaborations from leading academics, this meticulously written volume is a guide to conducting cutting-edge research using tested and vetted best practices. It explains important research techniques, why they are selected, and how they are conducted. The book critically examines both cutting-edge methods such as those used in NextGen genetics, nudge theory, and the brain's vulnerability to addiction, as well as the classic methods including cortisol measurement, survey, and environmental study. The topics of the book span the gamut of health psychology, from neuroimaging and statistical analysis to socioeconomic issues such as the policies used to address diseases in Africa, anti-vaxers, and the disproportionate impact of climate change on impoverished people. With each section featuring examples of best research practices, recommendations for study samples, accurate use of instrumentation, analytical
