New Dimensions In Adult Development:

New Dimensions Adult Calvin A. Colarusso, 1990 Contributions from a wide range of disciplines are organized into sections the transition to adulthood new concepts in adult development clinical perspectives and applications of adult developmental theory to anthropology biology dream psychology literature political science and self psych *Child and Adult Development* Calvin A. Colarusso, 2013-11-21 Developmental theory is the essence of any psychodynamic psychotherapy and certainly of psychoanalysis It is through an understanding of progressive life events and the way these events relate to associated biological and social events that we come to understand both psychopathology and psychological strengths For a long time we have needed a clinically oriented book that surveys normal development in both childhood and adulthood This book should be particularly helpful to all mental health professionals whose daily work requires a constant awareness and appraisal of developmental issues Dr Colarusso has integrated and summarized a tremendous amount of theoretical empirical and clinical material in a format that makes it come alive through clinical examples This book should be of great interest to all students of human behavior as well as to seasoned clinicians SHERWYN M WOODS M D PH D vii Preface Each year as I gave a lecture series on child and adult development to the adult and child psychiatric residents at the University of California at San Diego someone inevitably would ask Is there a book that I could understand that has all of this information in it I would reply that I did not know of any single source but I could refer the person to many articles and books on development

When the Bubble Bursts Eda Goldstein, 2013-05-13 There are common midlife events that account for the special narcissistic vulnerabilities of this period of life and Eda Goldstein ably reviews these events and the theoretical perspectives commonly brought to bear on them In When the Bubble Bursts however Goldstein's special concern is those individuals who come to midlife with heightened narcissistic vulnerabilities that make the navigation of this stage of life more difficult still In understanding the latter such patients and devising a treatment approach appropriate to their self issues Goldstein adopts a broadly self psychological frame of reference It is a matter she finds again and again of understanding how current stressors frustrate healthy self needs and trigger narcissistic vulnerabilities Self psychologically informed treatment which in Goldstein's pragmatic purview embraces modalities that are to varying degrees supportive psychodynamic and psychoanalytic reworks and strengthens self structures in helping patients find new ways of affirming their sense of self Her substantive case studies which accompany the reader through all the chapters in her study draw on personal and supervisory experiences to illustrate crucial foci of the treatment process with a range of midlife patients in psychotherapy Eda Goldstein presents a study that

comprises an admirable blend of theoretical astuteness clinical wisdom and personal honesty Her clinical study of midlife narcissistic pathology is bracketed by her balanced discussion of theoretical perspectives on adult development and her concluding consideration of the countertransference issues elicited by midlife patients in midlife therapists When the Bubble Bursts is an edifying contribution to the literatures of psychodynamic psychotherapy self psychology and adult development

The Race Against Time Robert A. Nemiroff, Calvin A. Colarusso, 2013-11-21 This is the second book in the pioneering investigation of adult development by Robert A. Nemiroff and Calvin A. Colarusso. The first *Adult Development: A New Dimension in Psychodynamic Theory and Practice* arrived to critical acclaim in 1981. It presented a psychodynamic theory of development during the second half of life and a model of normal adult functioning. This book is the

logical sequel expanding and elaborating the original formulations and applying them to the clinical practice of psychotherapy and psychoanalysis Nemiroff and Colarusso demonstrate that these are appropriate techniques for patients in the second half of life regardless of age They lay to rest many stereotypes and myths that have long interfered with the dynamic treatment of older patients and they propose exciting new conceptualizations such as that of adult developmental arrests The genetic approach reaches beyond childhood and adolescence and takes on important new meaning by incorporating an adult developmental past that influences both psychopathology and transference The relationship between theory and therapy is richly demonstrated in the clinical presentations including ten detailed case histories of patients between the ages of 40 and 80 These and other clinical discussions provide ample evidence that a psychodynamic approach that is based on a sound adult developmental psychology can be extraordinarily effective They also demonstrate both the similarities and differences in working with older versus younger patients This work is a major contribution in a long neglected dimension of clinical psychiatry SHERWYN M
