Peters,Andrzej Skowron,2004-07-05 The LNCS journal Transactions on

Rough Sets is devoted to the entire spectrum of rough sets related issues starting from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining knowledge discovery and intelligent information processing to relations between rough sets and other approaches to uncertainty vagueness and incompleteness such as fuzzy sets and theory of evidence This first volume of the Transactions on Rough Sets opens with an introductory article by Zdzislaw Pawlak the originator of rough sets Nine papers deal with rough set theory and eight are devoted to applications in various domains **Meeting the Challenge of Social Problems via Agent-Based Simulation** T. Terano,H. Deguchi,K. Takadama,2012-12-06 The series of international workshops on Agent Based Approaches in Economic and Social Complex Systems AESCS is part of the worldwide activities on computational social and organizational sciences The second workshop AESCS 02 focusing on progress of agent based simulation was held in Tokyo in August 2002 AESCS 02 explored the frontiers of the field The importance of cumulative progress was emphasized in discussions of common tasks standard computational models replication and validation issues and evaluation and verification criteria Promoting multidisciplinary work in computational economics organizational science social dynamics and complex systems AESCS 02 brought together researchers from diverse fields This book contains the invited papers by Robert Axtell Shu Heng Chen and Takao Terano along with selected papers collected in three major sections Economic Systems Marketing and Management and Social Systems and Methodology *Transactions on Rough Sets V* ,2006-11-18 This book is dedicated to the monumental life work and creative genius of Zdzislaw Pawlak the originator of rough sets who passed away in April 2006 It opens with a commemorative article that gives a brief coverage of Pawlak s works in rough set theory molecular computing philosophy painting and poetry Fifteen papers explore the theory of rough sets in various domains as well as new applications of rough sets Active Mining Hiroshi Motoda,2002 Focusing on data mining this work is a joint effort from researchers in Japan and includes a report on the forefront of data collection user centred mining and user interaction reaction It offers an overview of modern solutions with real world applications sharing hard learned experiences **Rough Set Theory and Granular Computing** Masahiro Inuiguchi,Shusaku Tsumoto,Shoji Hirano,2012-12-06 After 20 years of pursuing rough set theory and its applications a look on its present state and further prospects is badly needed The monograph Rough Set Theory and Granular Computing edited by Masahiro Inuiguchi Shoji Hirano and Shusaku Tsumoto meets this demand It presents the newest developments in this area and gives fair picture of the state of the art in this domain Firstly in the keynote papers by Zdzislaw Pawlak Andrzej Skowron and Sankar K Pal the relationship of rough sets with other important methods of data analysis Bayes theorem neuro computing and pattern recognitio is thoroughly examined Next several interesting generalizations of the the ory and new directions of research are presented Furthermore application of rough sets in data mining in particular rule induction methods based on rough set theory is presented and discussed Further important issue dis cussed in the monograph is rough set based data analysis including study of decisions

making in conflict situations Last but not least some recent engi neering applications of rough set theory are given They include a proposal of rough set processor architecture organization for fast implementation of ba sic rough set operations and discussion of results concerning advanced image processing for unmanned aerial vehicle Thus the monograph beside presenting wide spectrum of ongoing research in this area also points out new emerging areas of study and applications which makes it a valuable source of information to all interested in this do main **Novel Developments in Granular Computing: Applications for Advanced Human Reasoning and Soft Computation** Yao, JingTao,2010-06-30 This book investigages granular computing GrC which emerged as one of the fastest growing information processing paradigms in computational intelligence and human centric systems Provided by publisher **Life-Like Characters** Helmut Prendinger,Mitsuru Ishizuka,2013-03-09 Life like characters is one of the most exciting technologies for human computer interface applications today They convincingly take the roles of virtual presenters synthetic actors and sales personas teammates and tutors A common characteristic underlying their life likeness or believability as virtual conversational partners is computational models that provide them with affective functions such as synthetic emotions and personalities and implement human interactive behavior The wide dissemination of life like characters in multimedia systems however will greatly depend on the availability of control languages and tools that facilitate scripting of intelligent conversational behaviour This book presents the first comprehensive collection of the latest developments in scripting and representation languages for life like characters rounded off with an in depth comparison and synopsis of the major approaches Introducing toolkits for authoring animated characters further supports the ease of use of this new interface technology Life like characters being a vibrant research area various applications have been designed and implemented This book offers coverage of the most successful and promising applications ranging from product presentation and student training to knowledge integration and interactive gaming It also discusses the key challenges in the area and provides design guidelines for employing life like characters *Discovery Science* Steffen Lange,Ken Satoh,Carl H.
