Handbook of Research on Foreign Language Education in the Digital Age Wang, Congcong, Winstead, Lisa, 2016-07-13
The role of technology in the learning process can offer significant contributions to help meet the increasing needs of students. In the field of language acquisition, new possibilities for instructional methods have emerged from the integration of such innovations. The *Handbook of Research on Foreign Language Education in the Digital Age* presents a comprehensive examination of emerging technological tools being utilized within second language learning environments. Highlighting theoretical frameworks, multidisciplinary perspectives, and technical trends, this book is a crucial reference source for professionals, curriculum designers, researchers, and upper-level students interested in the benefits of technology-assisted language acquisition. *Transforming Postsecondary Foreign Language Teaching in the United States* Janet Swaffar, Per Urlaub, 2014-07-25. This volume addresses critical challenges and issues facing foreign language departments in colleges and universities across the U.S. It presents the insights of individuals who have built or are in the process of building foreign language curricula during a major transition period in postsecondary institutions. The authors of this volume come from various language departments and institutional experience from across the U.S., including private and public postsecondary foreign language teachers, researchers, and administrators. The chapters address issues and provide templates for curricular change at all learning levels. The five sections of this book explore: Changing Perceptions about Foreign Language Learning; The Case for a Multi-literacy FL Curriculum in Concept and Assessment; Praxis; Curricular Transformations; Historical Hurdles and Faculty Heuristics; Rethinking the Graduate Curriculum; Foreign Languages Integration into the Interdisciplinary University. This thought-provoking and timely volume addresses the question of how historic and current disciplinary, institutional, and political conditions affect curricular transformation in collegiate foreign language programs. Responding to the issues raised in the 2007 MLA Report, this collection of nine essays presents a diversity of curricular models and approaches from different theoretical perspectives, focusing on the integration of language and content. The book will undoubtedly be of great interest to a broad audience such as foreign language educators, curriculum designers, administrators, graduate students, and researchers. Nelleke Van Deusen Scholl, Yale College, CT, USA. *Resources in Education*, 1991. **Evaluation in Foreign Language Education in the Middle East and North Africa** Sahbi Hidri, Christine Coombe, 2016-09-27. Recent Perspectives on Task-Based Language Learning and Teaching Mohammad Ahmadian, María del Pilar García Mayo, 2017-12-04 The last three decades have witnessed a growth of interest in research on tasks from various perspectives and numerous books and collections of articles have been published focusing on the notion of task and its utility in different contexts Nevertheless what is lacking is a multi faceted examination of tasks from different important perspectives This edited volume with four sections of three chapters each views tasks and Task based Language Teaching TBLT from four distinct but complementary vantage points In the first section all chapters view tasks from a cognitive interactionist angle with each addressing one key facet of either cognition or interaction or both in different contexts CALL and EFL ESL Section two hinges on the idea that language teaching and learning is perhaps best conceptualized understood and investigated within a complexity theory framework which accounts for the dynamicity and interrelatedness of the variables involved Viewing TBLT from a sociocultural lens is what connects the chapters included in the third section Finally the fourth section views TBLT from pedagogical and curricular vantage points
