Five Ways of Doing Qualitative Analysis Frederick J. Wertz,Kathy Charmaz,Linda M. McMullen,Ruthellen Josselson,Rosemarie Anderson,Emalinda McSpadden,2011-06-17 This unique text provides a broad introduction to qualitative analysis together with concrete demonstrations and comparisons of five major approaches Leading scholars apply their respective analytic lenses to a narrative account and interview featuring Teresa a young opera singer who experienced a career changing illness The resulting analyses vividly exemplify what each approach looks like in action The researchers then probe the similarities and differences among their approaches their distinctive purposes and strengths the role style and subjectivity of the individual researcher and the scientific and ethical complexities of conducting qualitative research Also included are the research participant s responses to each analysis of her experience A narrative account from another research participant Gail can be used by readers to practice the kinds of analysis explored in the book Human Sciences and Human Interests Mikael Klintman,2016-08-05 Within the disciplines of social economic and evolutionary science a proud ignorance can often be found of the other areas approaches This text provides a novel intellectual basis for breaking this trend Certainly Human Sciences and Human Interests aspires to open a broad debate about what scholars in the different human sciences assume imply or explicitly claim with regard to human interests Mikael Klintman draws the reader to the core of human sciences how they conceive human interests as well as how interests embedded within each discipline relate to its claims and recommendations Moreover by comparing theories as well as concrete examples of research on health and environment through the lenses of social economic and evolutionary sciences Klintman outlines an integrative framework for how human interests could be better analysed across all human sciences This fast paced and modern contribution to the field is a necessary tool for developing any human scientist s ability to address multidimensional problems within a rapidly changing society Avoiding dogmatic reasoning this interdisciplinary text offers new insights and will be especially relevant to scholars and advanced students within the aforementioned disciplines as well as those within the fields of social work social policy political science and other neighbouring disciplines

Soft Computing Methods in Human Sciences Vesa A Niskanen,2013-06-05 This book considers Soft Computing methods and their applications in the

human sciences Soft Computing methods including fuzzy systems neural networks evolutionary computing and probabilistic reasoning are state of the art methods in theory formation and model construction They mainly stem from the natural sciences and they have already proved to be powerful in their applications because Soft Computing models particularly fuzzy system models are simple and correspond well to the actual world and to human reasoning Hence we no longer have to use the complicated mathematical models that have prevailed in this research area Dozens of books and thousands of articles have been devoted to applications of Soft Computing in the natural sciences but only a few studies have focused on its applications in the human sciences such as the social and the behavioral sciences this despite the fact that these novel methods seem to open a number of inspiring prospects in these disciplines In quantitative research in the human sciences typical application areas include statistical models that can be replaced by simpler numerical or linguistic Soft Computing models In qualitative research Soft Computing methods can enhance modelling because instead of having to do manual work we can use computer simulations with approximate and or linguistic constituents

Human Significance in Theology and the Natural Sciences Christopher L. Fisher,2010-02-03 The medieval worldview that regarded human beings as at the center of God s plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity s place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century

Science reveals just the opposite providing solid evidence in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity's indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world's situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history

Review of the Restructured Research and Analysis Programs of NASA's Planetary Science Division National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Review of NASA's Planetary Science Division's Restructured Research and Analysis Program, 2017-06-22 The Research and Analysis R laboratory research theoretical modeling and computational studies geological and astrobiological fieldwork in planetary analog environments on Earth geological mapping of planetary bodies analysis of data from Earth and space based telescopes and development of flight instruments and technology needed for future planetary science missions The primary role of the PSD R A program is to address NASA's strategic objective for planetary science and PSD's science goals Recently PSD reorganized the R A program to provide better alignment with the strategic goals for planetary sciences The major changes in the R A program involved consolidating a number of prior program elements many of which were organized by subdiscipline into a smaller number of thematic core research program elements Despite numerous efforts by PSD to communicate the rationale for the reorganization and articulate clearly the new processes there has been significant resistance from the planetary science community and concerns in some sectors regarding the major realignment of funding priorities Review of NASA's Planetary Science Division's Restructured Research and Analysis Programs examines the new R A program and determines if it appropriately aligns with the agency's strategic goals supports existing flight programs and enables future missions This report explores whether any specific research areas or subdisciplinary groups that are critical to NASA's strategic objectives for planetary science and PSD's science goals are not supported appropriately in the current program or have been inadvertently disenfranchised through the reorganization

Sexual Paradox: Complementarity, Reproductive Conflict and Human Emergence Christine Fielder, Chris King, 2006 Unlocks the keys to the paradox of how sexual selection fertilized the explosion of culture

and the resulting fallout in sexual dominion of man over woman and nature How sexuality generates the universe through symmetry broken complementarity The implicit conflict of interests of sexual intrigue in the prisoners dilemma and its ecstatic resolution in the cosmology of love Sexual dominance as a koan for planetary crises 560 pages containing 270 illustrations **Human Development Report 1994** United Nations Development Programme,1994 Expounds a new concept of human security one that focuses on the security of people in their homes in their jobs in their communities and in their environment *Adaptive Agents, Intelligence, and Emergent Human Organization* National Academies of Sciences and Engineering,2002-01-01
