Going Multinational Frédérique Sachwald,2013-01-11 At the beginning of the 1990s Korean firms embarked on an impressive wave of direct investment abroad This dramatic multinationalization was considered as yet another sign of Korea s remarkable economic performance especially as a high proportion of the foreign ventures were located in advanced countries But this unbalanced quest for globalization actually tested the Korean model to its limits after

the 1997 crisis a new policy prepared the way for a surge of inward investment Using empirical tests and case studies this collection shows that Korean groups have invested in developed countries to jump over trade barriers but also to source advanced technology and marketing capabilities Moreover their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols From a policy perspective the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system By shedding light on the pattern of Korea s internationalization these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation led growth Innovation Policy in the Knowledge-Based Economy M.P. Feldman,Albert N. Link,2012-12-06 Scholars in the science and technology field have not collectively questioned much less proposed an agenda for policy makers Now is an appropriate time for such an undertaking First there is a growing belief that the U S national research and development system like that of many industrial nations is changing due to global competitive pressures and advancements in information technology and electronic commerce Second industry s R D relationship with the academic research community is changing not only because of the global competition but also because of alterations in the level of government support of fundamental research As a result policy makers will need to rethink their approaches to science and technology issues This volume is a collection of essays by scholars about innovative policy in the knowledge based economy By knowledge based economy we mean one for which economic growth is based on the creation distribution and use of technology As such innovation policy in such an economy must enhance the creation distribution and use of knowledge that leads to the creation distribution and use of technology This volume considers elements of an innovation policy innovation policy and academic research innovation policy in electronic commerce and innovation policy and globalization issues
