## **New Instruments For Environmental Policy:**

New Instruments for Environmental Policy in the EU Jonathan Golub, 1998-06-04 *New Instruments for Environmental Policy in the EU* provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union. The conclusions draw attention to critical aspects of instrument design as well as the difficulty of accommodating national policy diversity without contravening EU and international law. *Environmental Policy in Search of New Instruments* B. Dente, 2013-03-09 Environmental policy is undergoing a dramatic transformation. The problems connected with global change, the need for preventative action and the growing importance of non source pollution call for new courses of action and new institutional arrangements. In this situation it is fairly obvious that both the traditional command and control policy instruments and the more modern financial and economic instruments are increasingly under stress. This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies. In doing so it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors. On the basis of a shared theoretical framework the book explores the potential of new policy instruments such as policy evaluation or mediation, proposes alternative institutional arrangements for dealing with the issues, classifies existing instruments and illuminates the process through which old and new tools can be set into operation. New Instruments of Environmental Governance? Andrew Jordan, Rüdiger K.W. Wurzel, Anthony R. Zito, 2004-11-23 The use of so called new environmental policy instruments such as eco taxes, tradable permits, voluntary agreements and eco labels has prompted widespread claims that these devices have replaced regulation. These papers offer a fresh perspective on the evolving tool box of environmental policy. New Instruments of Environmental Governance? Andrew Jordan, Rüdiger Wurzel, Anthony R. Zito, 2003 These papers offer a fresh perspective on the evolving tool box of environmental policy such as eco taxes, tradable permits, voluntary agreements and eco labels. New Instruments for Environmental Policy in the EU. Jan Willem Biekart, 1998 *Market-Based Instruments for Environmental Management* Mikael Skou Andersen, Rolf-Ulrich Sprenger, 2000-01-01 This volume brings together contributions from political scientists and environmental economists and will prove invaluable for academics, practitioners and policymakers interested in the experiences of countries where market based instruments are well established. **BOOK JACKET** Global Competition and EU Environmental Policy Jonathan Golub, 1998-03-19 *Global Competition and EU Environmental Policy* is the first book to examine the relationship between economic competitiveness and environmental protection in European Union policy. A wide range of international case studies addresses key agreements and policies including those dealing with ozone layer protection, pesticide exports, shipping, climate. *Instrument Mixes for Environmental Policy* OECD, 2007-05-31 Presents case studies analysing instrument mixes applied in OECD countries to address household waste, non point sources of water pollution in agriculture, residential energy efficiency, regional air

pollution and emissions to air of mercury

**Environmental Policy in the EU** Andrew Jordan, 2012-04-27 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors.

Handbook of Global Environmental Politics Peter Dauvergne, 2005 The book's greatest strength is the range and theoretical ambition of its contributions to regime theory governance and international cooperation. Recommended Graduate students researchers and faculty D L Feldman Choice The first Handbook of original articles by leading scholars of global environmental politics this landmark volume maps the latest theoretical and empirical research in this young and growing field. Captured here are the dynamic and energetic debates over concerns for the health of the planet and how they might best be addressed. The introductory chapters explore the intellectual trends and evolving parameters in the field of global environmental politics. They make a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change. The remaining chapters are divided into three broad themes states governance and security capitalism trade and corporations and knowledge civil societies and ethics with each section providing a cohesive discussion of current issues. In depth explorations are given to topics such as global commons renewable energy the effectiveness of environmental cooperation regulations and corporate standards trade liberalization and global environmental governance and science and environmental citizenship. A comprehensive survey of the latest research the Handbook is a necessary reference for scholars students and policymakers in the field of global environmental politics.

*Handbook of Research on Environmental Taxation* Janet E. Milne, Mikael Skou Andersen, 2012-01-01 Ingeniously organized in a life cycle format the Handbook covers environmental taxation concepts design acceptance implementation and impact. The universal themes discussed in each area will appeal to a broad range of readers. Larry Kreiser Cleveland State University US This book is a smart and useful reader's guide providing analytical tools for a full comprehension of environmental taxes with an interdisciplinary approach that looks at all the different phases of environmental taxation from the design to the implementation the political acceptance and the impact on the economy. The authors' effort is very successful in endowing academicians policy makers and the general public with an excellent proof of the effectiveness of environmental taxes and green tax reforms. Alberto Majocchi University of Pavia Italy Putting the words environment next to taxation might not always be the flavour of the month but no modern society can ignore the value of the natural environment and the need to maintain its good quality and no competitive economy can prosper without the

necessary tax revenues to function Environmental taxation offers the prospect of moving towards a more resource efficient economy where preference is given to tax more what we burn less what we earn I welcome this contribution to the literature Commissioner Connie Hedegaard European Commission The Milne and Andersen volume provides a splendid treatment of environmental taxation that encompasses the basic conceptual issues problems of tax design and implementation and several insightful case studies that show how environmental taxes actually work in practice It is the best overall treatment of environmental taxation available comprehensive rigorous and readable Wallace Oates University of Maryland US The Handbook of Research on Environmental Taxation captures the state of the art of research on environmental taxation Written by 36 specialists in environmental taxation from 16 countries it takes an interdisciplinary and international approach focusing on issues that are universal to using taxation to achieve environmental goals The Handbook explores the conceptual foundations of environmental taxation essential elements for designing environmental tax measures factors that influence the acceptance of environmental taxation the variety of ways to implement environmental taxes their environmental and economic impact and finally the larger question of the role of taxation among other policy approaches to environmental protection Intermixing theory with case studies the Handbook offers readers lessons that can be applied around the world It identifies key bodies of research for people who are already working in the field or entering the field and highlights issues that call for more research in the future With systematic analysis of key issues in environmental taxation this book will appeal to researchers governments think tanks NGOs and academics in law economics political science and public finance as well as students specializing in environmental taxation and other market based instruments **Designing Government** F. Pearl Eliadis, Margaret M. Hill, Michael Howlett, 2005 This collection of readings examines the tools used by today's government to achieve legitimacy effectiveness and accountability The contributors examine the instrument choice perspective on government and public policy over the past two decades moving beyond the preoccupation with deregulation and efficiency to trace the complex relationships between instrument choices and governance Readers are encouraged to consider factors in the design of complex mixes such as issues of redundancy context the rule of law and accountability These latter factors are especially central in today's world to the design and implementation of effective instrument choices by governments and ultimately to good governance The authors conclude that instrument choice itself is integral to government and governance

**European Perspectives on Environmental Law and Governance** Suzanne Kingston, 2013-01-25 This book provides a range of perspectives on some of the most pressing contemporary challenges in EU environmental law and governance from some of today's leading European environmental academics and practitioners The book maintains a focus on three key cross cutting issues each of which is carefully analysed through the lens of governance The first theme to be addressed is that of climate change and the problems it poses for EU governance The second issue explored concerns the challenge of integrating environmental considerations into other policy areas as is required by the Treaty on the Functioning of the European Union

and the EU's Charter of Fundamental Rights. Finally, the third theme centres on the important challenge of improving environmental enforcement within the EU and considers issues such as the Aarhus Convention and the evolution of the Commission's work on implementation and enforcement throughout the past twenty years. Each of these three themes is situated within the broader ongoing debate about the changing nature of European environmental governance post-Lisbon and the ways in which developments in this area fit within broader trends in European governance theory and policy. Generally, European Perspectives on Environmental Law and Governance contains contributions from experts in the field, including Mary Robinson, Alan Boyle, Ludwig Kramer, and Liam Cashman, and will be of interest to academics, students, and practitioners of EU environmental law.

**Understanding Environmental Policy Convergence** Helge Jörgens, Andrea Lenschow, Duncan Liefferink, 2014-01-09. Over recent decades, national environmental policies have become increasingly alike. This book analyses the driving forces of this process of policy convergence, providing an in-depth empirical analysis of the international forces at work. It does so by investigating how four countries—France, Hungary, Mexico, and the Netherlands—have shaped their domestic environmental policies in the context of international institutions and relationships while taking into account various domestic factors and national conditions. Employing a qualitative approach, the authors seek to deepen understanding of the processes and mechanisms through which international forces such as legal harmonisation, institutionalised information flows, and global trade dynamics affect domestic environmental policy change. Together with its companion volume, *Environmental Policy Convergence in Europe: The Impact of Trade and International Institutions* (2008), this book provides a showcase of mixed methodologies combining quantitative and qualitative approaches in an innovative way.

**Institutional Dynamics in Environmental Governance** Bas Arts, Pieter Leroy, 2006-09-09. Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades. That observation is nothing new, attested to by the number of publications, conferences, and both private and public projects that have been initiated. However, our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects, leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective. This book presents fresh analyses of a number of well-known cases but does so from one comprehensive view: the so-called policy arrangement approach. Cases discussed range over organic farming, integrated water management, nature policy, cultural heritage policy, integrated region-oriented policy, corporate environmental management, and target group policy, always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives.

**The Politics of Environmental Performance** Detlef Jahn, 2016-10-27. Machine-generated contents note: 1 Introduction Part I Approach: Method and Concepts 2 Explaining environmental performance 3 Preferences in environmental politics 4 The institutional settings in 21 OECD countries Part II Environmental Performance in 21 OECD Countries 5 Measuring environmental performance 6 Aggregating environmental performance data Part III Analysis 7 Domestic politics 8

International politics 9 The nexus of domestic and international politics 10 Conclusion      **The European Union's Eco-Management and Audit Scheme (EMAS)** Michael S. Wenk, 2005-07-09 This text definitively breaks down each component of the Eco Management and Audit Scheme regulation EMAS even its appendices and EU guidance documents providing a step by step analysis of the Scheme In addition the work offers case examples of three of Akzo Nobel manufacturing locations which have been registered to EMAS providing real world advice on how to meet the requirements of the Scheme      Achieving Sustainable Development Hans T. Bressers, Walter A. Rosenbaum, 2003-12-30 Bressers Rosenbaum and their contributors analyze what until recently has been among the least examined issues implicit in the growing global discourse about sustainable development the creation of institutions and processes for effective governance of sustainability policies The creation and endurance of governance institutions capable of implementing sustainability policies is in fact fundamental for any viable conception of sustainable development The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles in the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union The writers focus particularly upon the special problem embedded in the sustainability paradigm that of organizing governance across scales that is to say across and between geographic political ecological or other social levels in a sustainable regime In recent years the scale problem has emerged as a major and enlarging concern as international efforts proliferate to implement various sorts of sustainability policies The analyses focus not only on how societies can organize but on how they do organize to overcome such daunting obstacles The analyses place considerable emphasis upon the history and lessons to be learned from ongoing efforts to achieve such governance in several diverse international settings including the Netherlands the Northwest United States Costa Rica Madagascar Senegal and the European Union      A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very important book More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability Through close examination of numerous case studies a balanced perspective that takes government business and civil society into account and fresh interdisciplinary thinking about a range of policy tools the Handbook offers a treasure trove of new concepts and new perspectives The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums national

governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science

**Green Buildings and the Law** Julie Adshead, 2011-04-12 In countries such as the UK the energy used in constructing occupying and operating buildings represents approximately fifty percent of greenhouse gas emissions Pressure to improve the environmental performance of buildings during both construction and occupancy particularly to reduce carbon emissions from buildings has become intense Understandably legislation and regulation are driving green development and compliance And this is happening in a wide variety of ways This review of the law in key jurisdictions for the research community lawyers the construction industry and government examines some of the mechanisms in place from the more traditional building regulation controls to green leases and the law relating to buildings and their natural environment Members of the CIB TG69 research group on Green Buildings and the Law review aspects of the law relating to green development in a range of jurisdictions
